GAT ANDRES BONIFACIO HIGH SCHOOL

# Nexora User Manual

A screen-by-screen guide for learners, teachers, administrators, and future IT faculty

**Locked evidence edition**

Application snapshot 211483f07b901299b48ae42eda318c7448f1cbfd. Screens use synthetic documentation-only records; no production data or credentials are included.

Prepared 2026-10-01 · English edition · External-drive reference

## How to use this book

**Fast reading pattern**

Every screen uses the same five-part pattern: purpose, do this, done when, if stuck, and behind the screen.

Use only an account assigned to your role. Read the current state before acting. On destructive or policy-governed screens, stop when the preview or blocker differs from your intent.

**Contents**

Use search or the Navigation pane to jump to any heading. The screen guide is grouped by role and task.

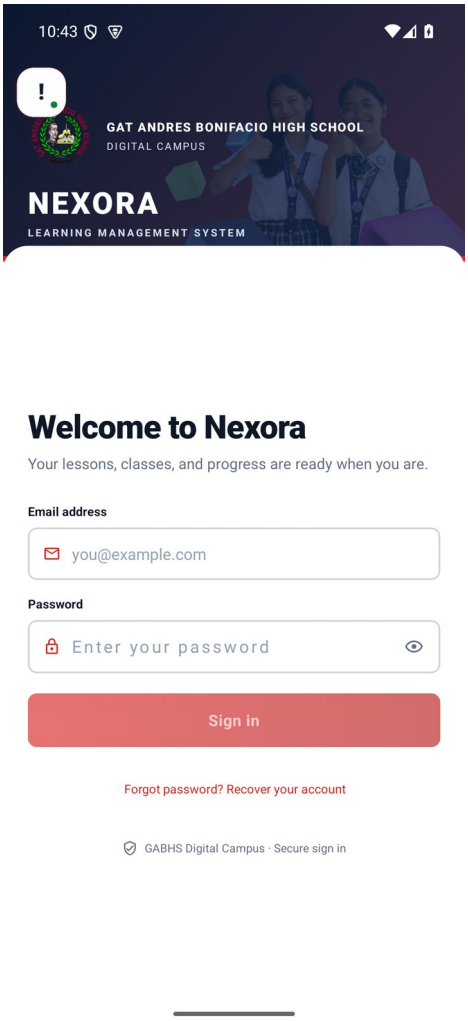

1. How to use this book
2. Mobile workspace guide
3. Complete web screen guide
4. Glossary

## Mobile workspace guide

**Why mobile is grouped**

The app has many registered routes that reuse the same task workspace. Each evidence page lists every route covered by that workspace, so no route is silently omitted.

## Everyone mobile screens

### Mobile sign-in and account recovery

**Role:** Everyone

**Purpose:** The public mobile entry point groups secure sign-in, verification, first-password setup, and account recovery.

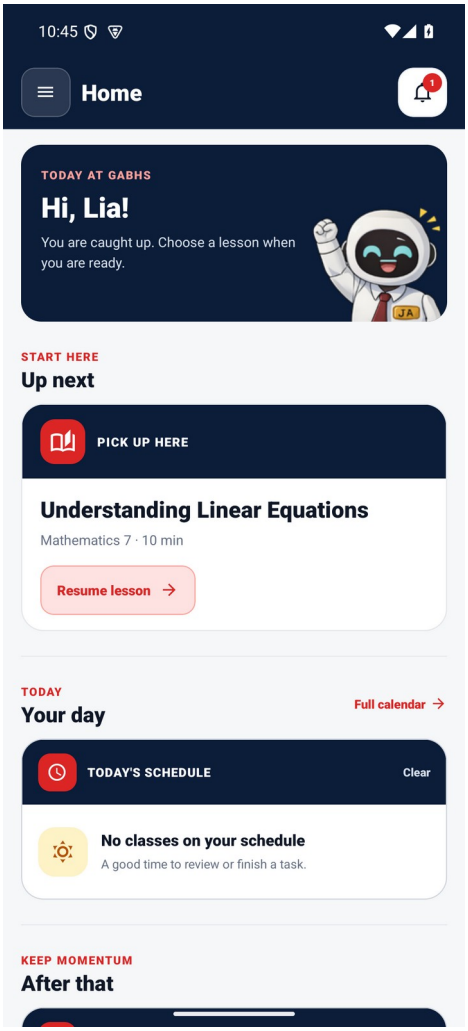

**Routes covered:** Login, VerifyEmail, ForgotPassword, ResetPassword, SetInitialPassword

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner mobile screens

### Learner home

**Role:** Learner

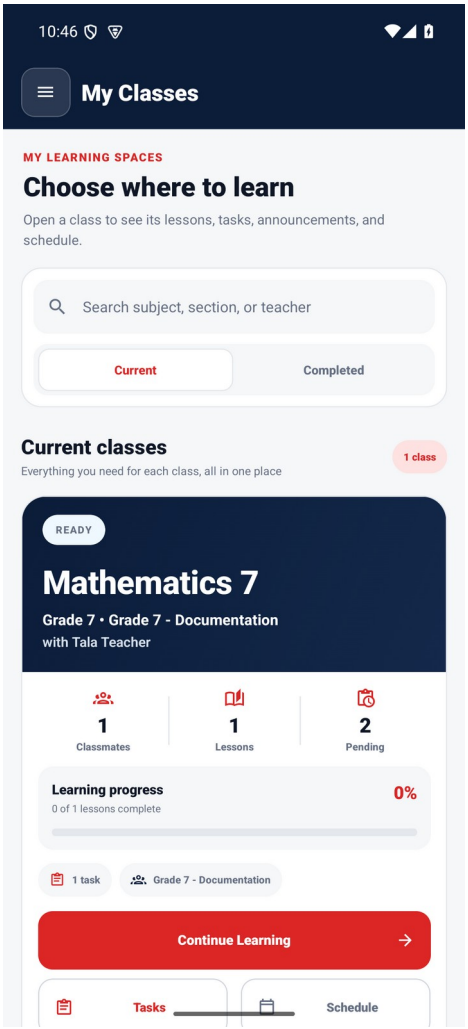

**Purpose:** The learner home page summarizes the next useful actions without requiring the learner to understand the whole system.

**Routes covered:** Dashboard

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner classes and lessons

**Role:** Learner

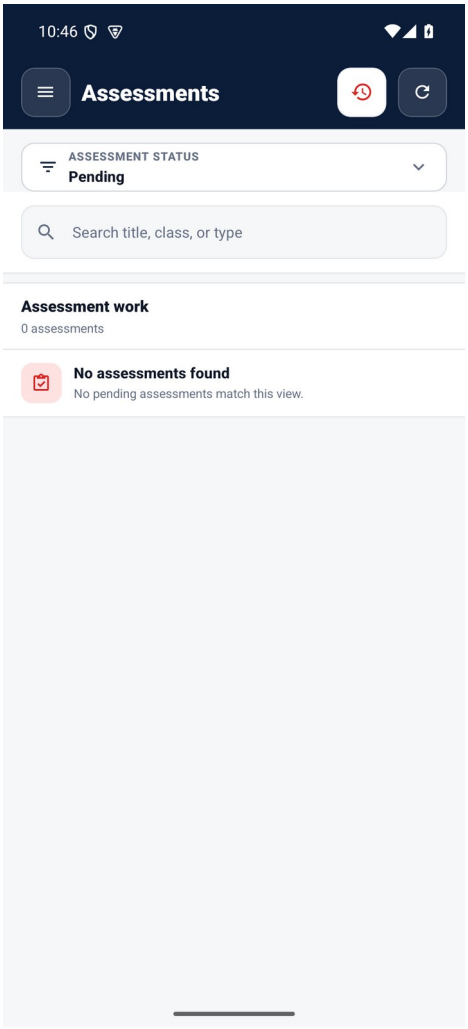

**Purpose:** Class, module, course, and lesson routes use the same classroom workspace and evidence-backed learning content.

**Routes covered:** Classes, ClassWorkspace, ClassDetail, ModuleDetail, Courses, Lessons, LessonDetail

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner assessments

**Role:** Learner

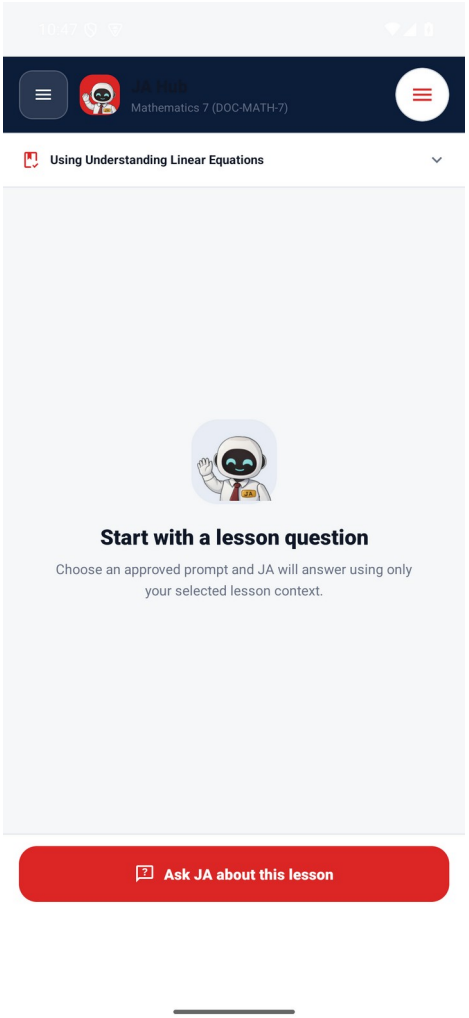

**Purpose:** Assessment routes cover the work list, instructions, answer flow, returned results, and attempt history.

**Routes covered:** Assessments, AssessmentDetail, AssessmentTake, AssessmentResults, AssessmentHistory

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner JA support hub

**Role:** Learner

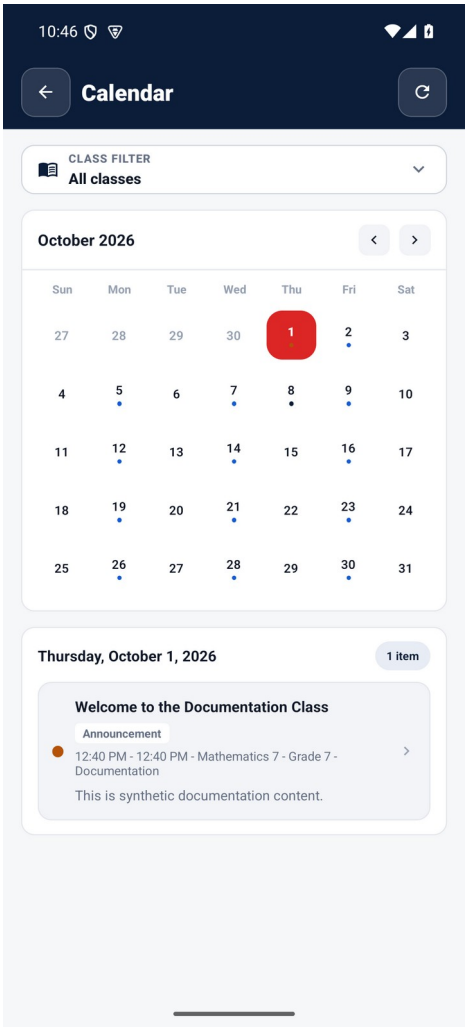

**Purpose:** JA, guided checks, generated support lessons, and review routes remain assistive and do not replace official grades.

**Routes covered:** JA, LXP, Chatbot, AiTutor, StudentGuidedAssessment, StudentGeneratedLesson, StudentJaReviewAssessment

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner schedule and announcements

**Role:** Learner

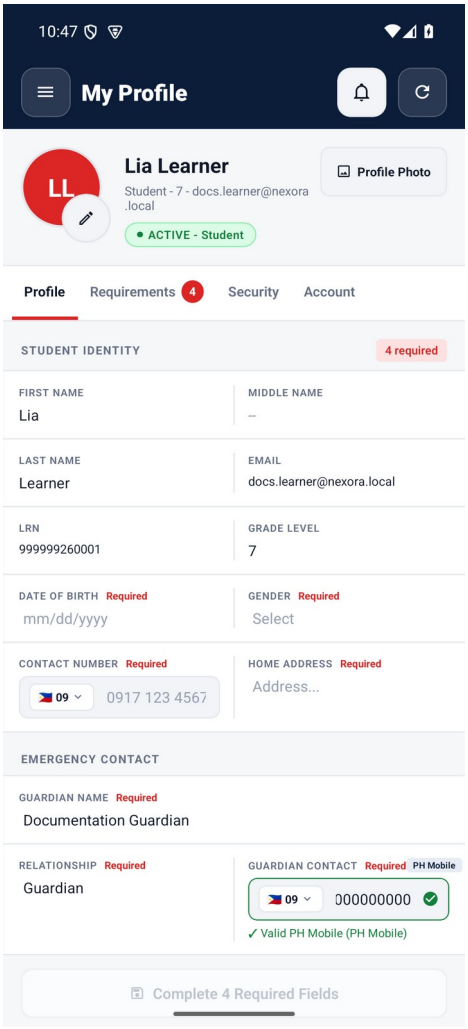

**Purpose:** Calendar, announcements, and evaluation routes help learners organize school activity and respond to school requests.

**Routes covered:** StudentCalendar, Calendar, Announcements, StudentEvaluations

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Learner progress and account

**Role:** Learner

**Purpose:** Progress, transcript, notification, and profile routes explain current evidence and account information in one family of screens.

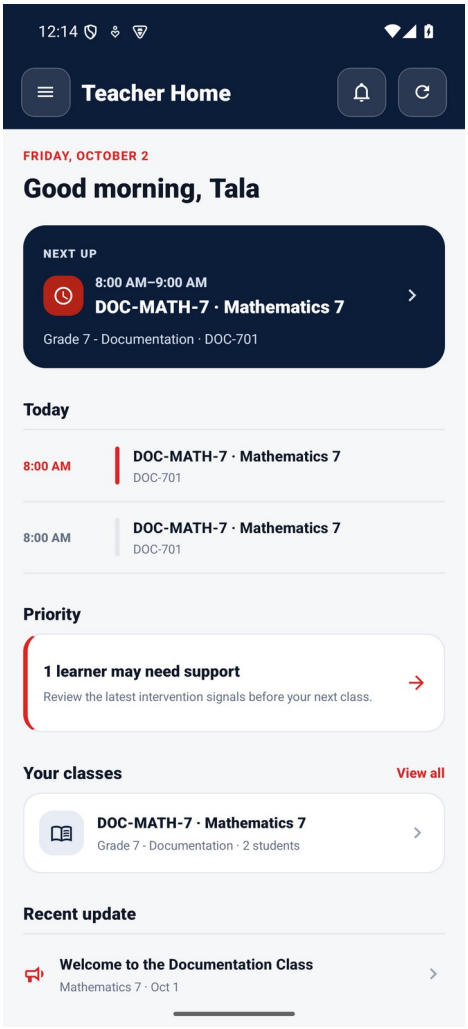

**Routes covered:** Performance, Transcript, Profile, Notifications, CompleteProfile

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher mobile screens

### Teacher home

**Role:** Teacher

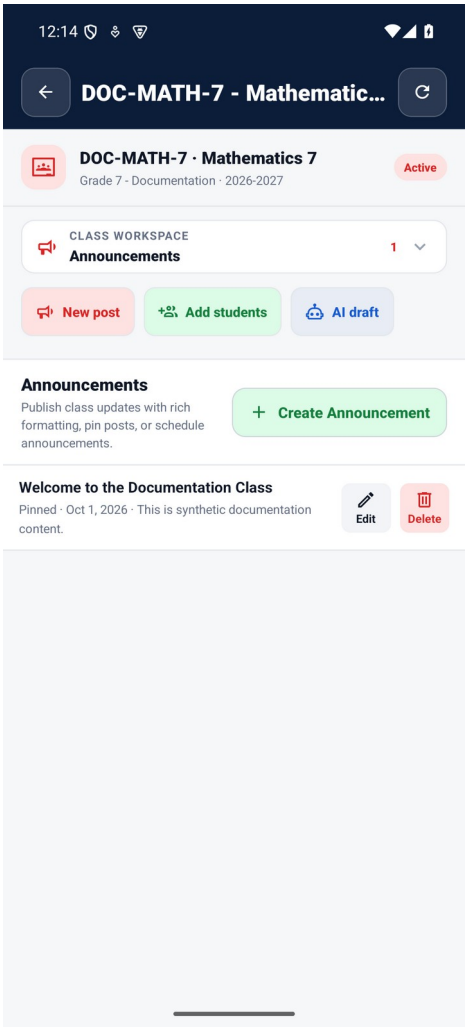

**Purpose:** The teacher home page prioritizes classes, submissions, notices, and the next instructional actions.

**Routes covered:** Home

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher classroom workspace

**Role:** Teacher

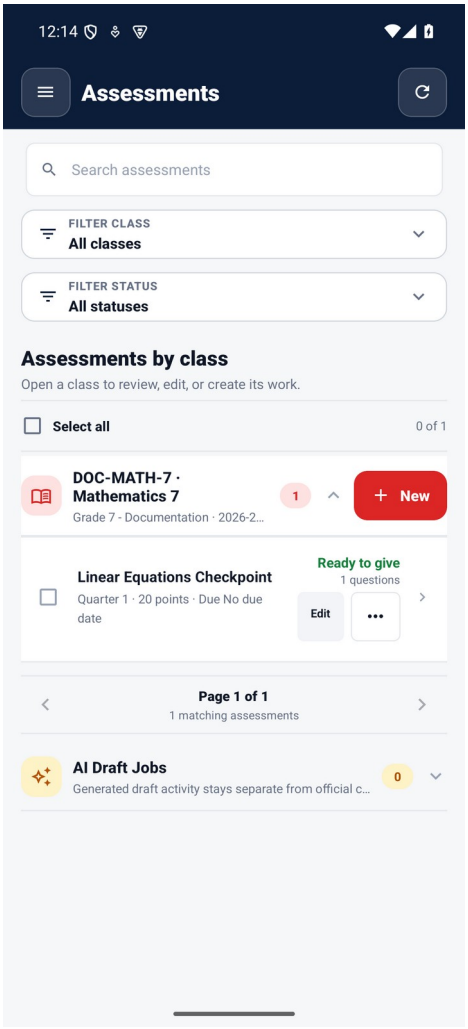

**Purpose:** Class, section, module, lesson, file, roster, and learner-detail routes share the teacher classroom workspace.

**Routes covered:** Classes, Sections, TeacherClassDetail, TeacherModuleDetail, TeacherModuleFileDetail, TeacherLessonDetail, TeacherLessonEditor, TeacherCreateModule, TeacherClassAddStudents, TeacherClassStudentOverview, TeacherSectionDetail, TeacherSectionAddStudents, TeacherSectionStudentProfile

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher assessment workflow

**Role:** Teacher

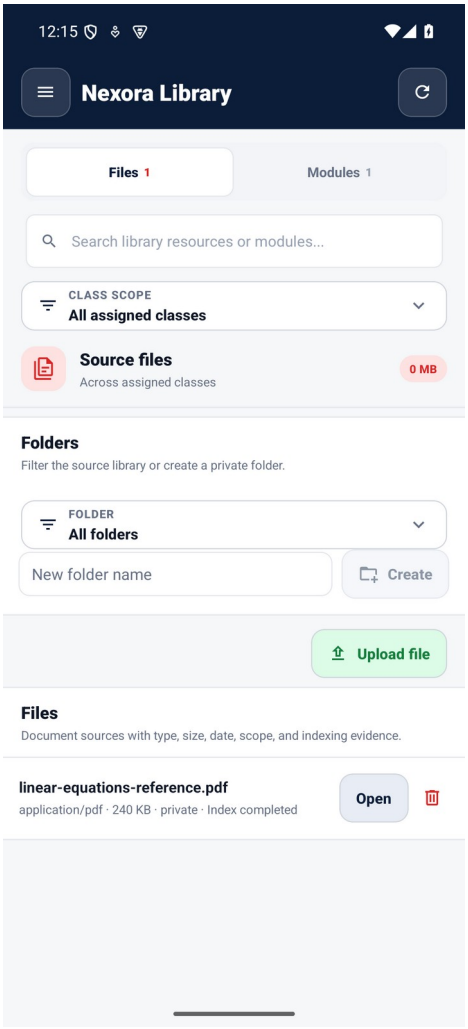

**Purpose:** Teachers create, review, edit, release, inspect, and grade assessments through this connected route family.

**Routes covered:** Assessments, TeacherAssessmentDetail, TeacherAssessmentEditor, TeacherAssessmentReview, TeacherAssessmentAttemptResult, TeacherCreateAssessment

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher content and communication

**Role:** Teacher

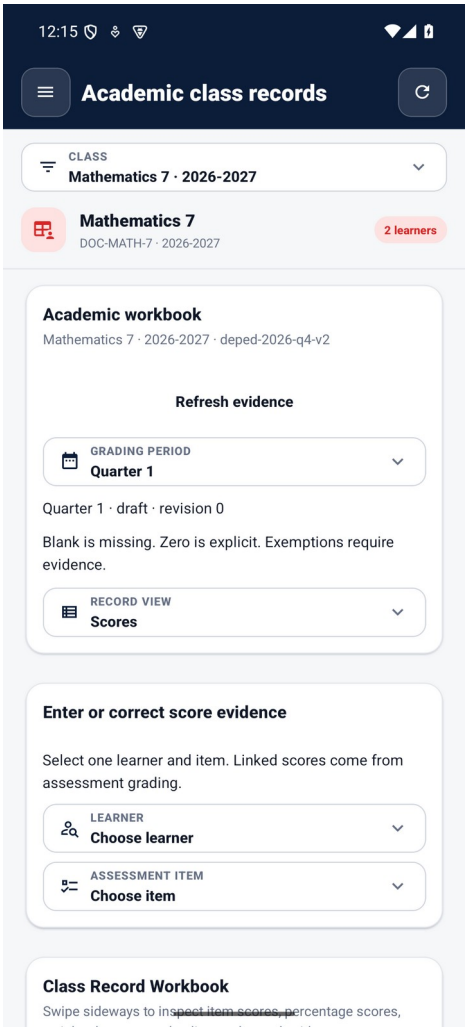

**Purpose:** Calendar, lessons, library, announcements, extraction review, and AI draft routes support content preparation and delivery.

**Routes covered:** TeacherCalendar, TeacherLessons, TeacherLibrary, TeacherAnnouncements, TeacherExtractionDetail, TeacherAiDraft

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher records and intervention

**Role:** Teacher

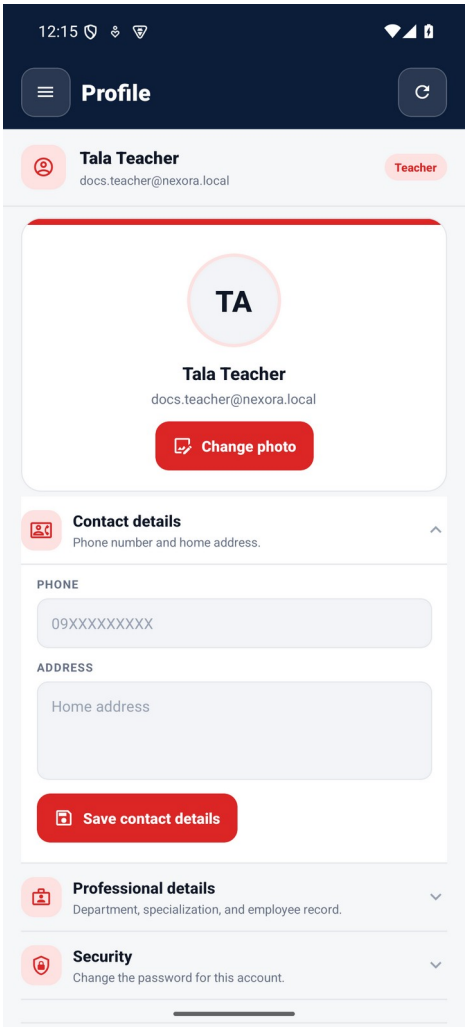

**Purpose:** Class records, reports, performance, evaluations, and intervention routes preserve academic evidence and follow-up decisions.

**Routes covered:** TeacherClassRecord, TeacherReports, TeacherInterventions, TeacherInterventionDetail, TeacherPerformance, TeacherEvaluations

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Teacher profile and notifications

**Role:** Teacher

**Purpose:** Teacher profile, completion, notifications, and overflow destinations keep account and supporting tools together.

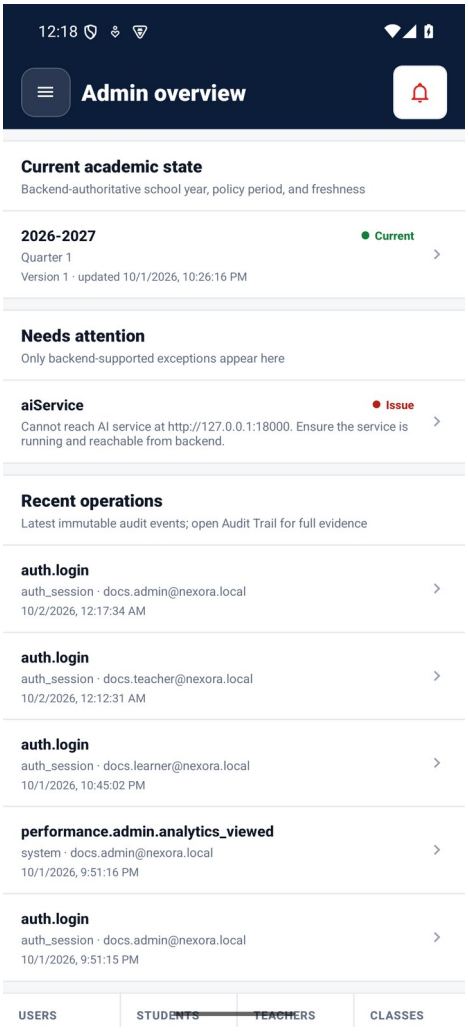

**Routes covered:** Profile, Notifications, CompleteProfile, TeacherMore

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator mobile screens

### Administrator home

**Role:** Administrator

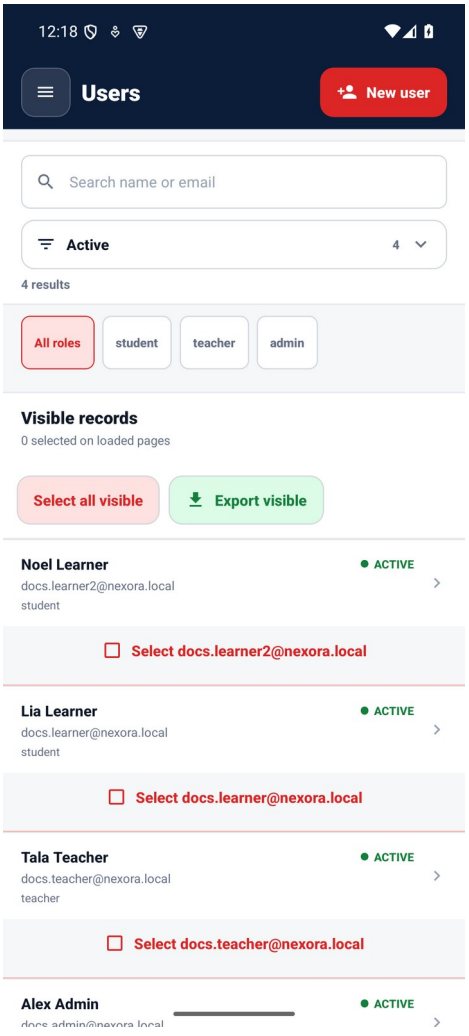

**Purpose:** The administrator home page summarizes school operations, academic setup, safety, and the next required actions.

**Routes covered:** Home

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator people and classes

**Role:** Administrator

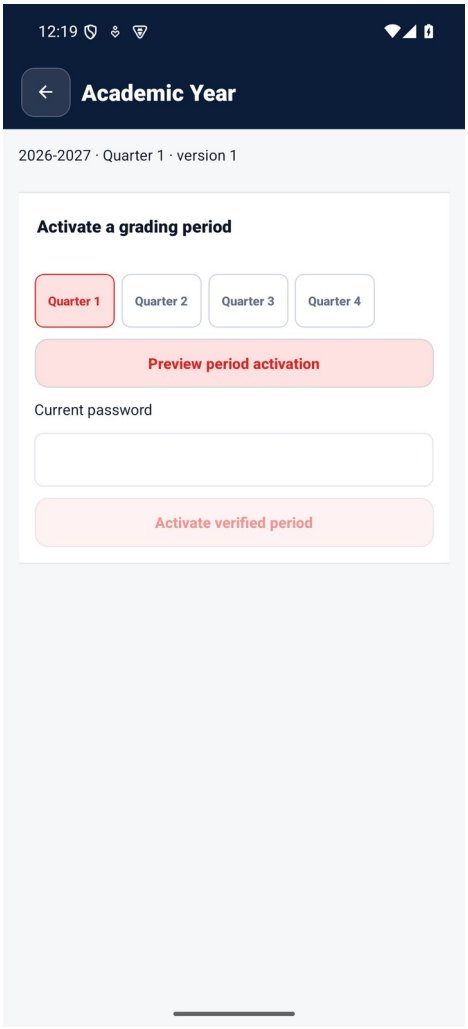

**Purpose:** User, roster, section, class, readiness, and lifecycle routes provide governed people and enrollment administration.

**Routes covered:** AdminUsers, AdminSections, AdminClasses, AdminRoster, Classes, AdminStudentReadiness, AdminLifecycleReview, AdminCreateUser, AdminUserDetail, AdminSectionDetail, TeacherClassDetail, TeacherSectionDetail, TeacherSectionAddStudents, TeacherSectionStudentProfile, TeacherClassAddStudents, TeacherClassStudentOverview

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator academic governance

**Role:** Administrator

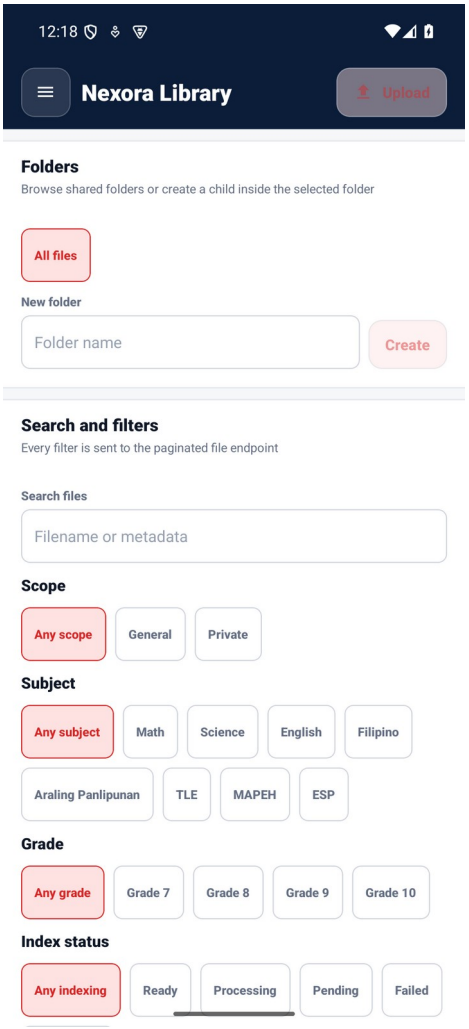

**Purpose:** Academic year, assessment, template, record, module, and lesson routes let administrators review governed academic state.

**Routes covered:** Assessments, Academic, AdminTemplates, AdminAcademic, AdminSettingsAcademicYear, AdminSettingsAssessmentsGrading, AdminSettingsYearTransition, AdminSettingsLearnerCompletion, AdminClassRecord, AdminUserReports, AdminTemplateDetail, TeacherAssessmentDetail, TeacherAssessmentEditor, TeacherAssessmentReview, TeacherAssessmentAttemptResult, TeacherModuleDetail, TeacherLessonDetail, TeacherLessonEditor, TeacherLessons, TeacherCreateModule, TeacherCreateAssessment, TeacherModuleFileDetail, TeacherClassRecord

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator content and reporting

**Role:** Administrator

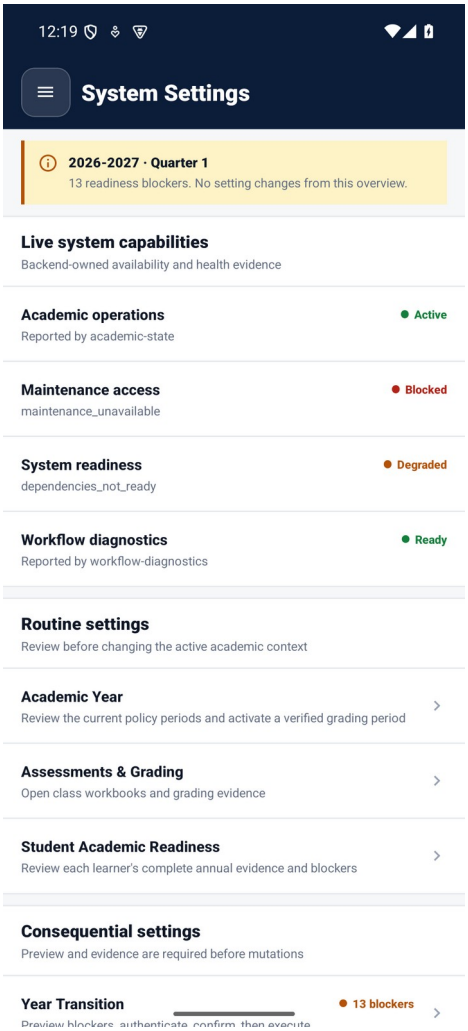

**Purpose:** Calendar, library, communication, evaluation, reporting, and intervention routes support school-wide oversight.

**Routes covered:** AdminCalendar, AdminLibrary, AdminAnnouncements, AdminReports, AdminEvaluations, AdminChatbot, TeacherCalendar, TeacherExtractionDetail, TeacherAiDraft, TeacherInterventionDetail, TeacherLibrary, TeacherReports, TeacherInterventions, TeacherPerformance, TeacherEvaluations, TeacherAnnouncements

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator safety and system tools

**Role:** Administrator

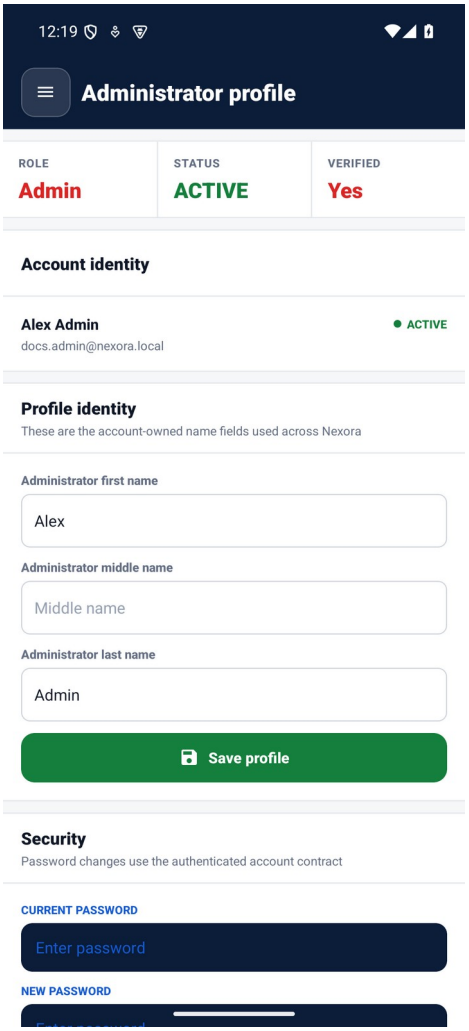

**Purpose:** Diagnostics, audit, recovery, maintenance, and reset routes require explicit intent and protect school records.

**Routes covered:** AdminDiagnostics, AdminAudit, AdminSettings, AdminTools, AdminSettingsAuditRecovery, AdminSettingsMaintenance, AdminSettingsResetSchoolData

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Administrator profile and notifications

**Role:** Administrator

**Purpose:** Administrator profile, completion, and notification routes keep account status and operational notices together.

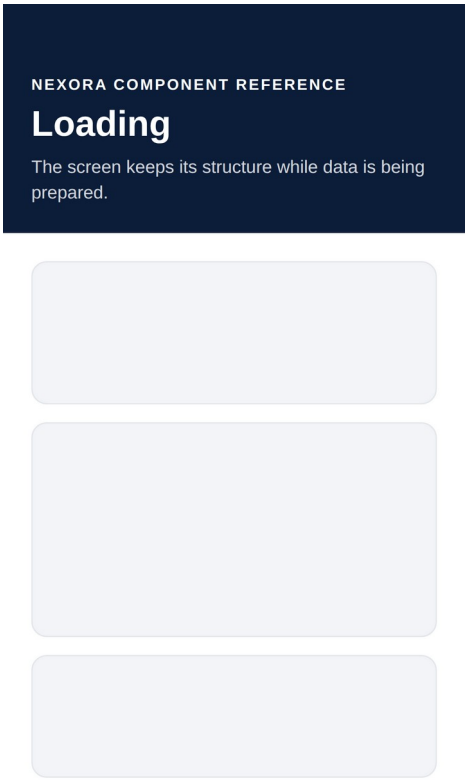

**Routes covered:** Profile, Notifications, CompleteProfile

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## All roles mobile screens

### Loading state

**Role:** All roles

**Purpose:** The current mobile loading components show stable placeholders while the requested data is still being prepared.

**Routes covered:** ComponentGallery:loading

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

NEXORA COMPONENT REFERENCE

## Nothing here yet

An empty result explains the situation instead of looking broken.

**Nothing here yet**

New items will appear here when they are ready.

### Empty state

**Role:** All roles

**Purpose:** The current mobile empty-state component explains why a list is empty and gives a useful next action.

**Routes covered:** ComponentGallery:empty

**Read it in this order**

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

NEXORA COMPONENT REFERENCE

# Unable to load this workspace

The message identifies the failure and points to a safe retry.

This workspace could not be loaded. Check the connection, then retry.

## Error state

**Role:** All roles

**Purpose:** The current error banner states what failed and directs the user toward a safe retry instead of a dead end.

**Routes covered:** ComponentGallery:error

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

NEXORA COMPONENT REFERENCE

## Saved successfully

The message confirms the completed action and resulting state.

Your changes were saved successfully.

### Success state

**Role:** All roles

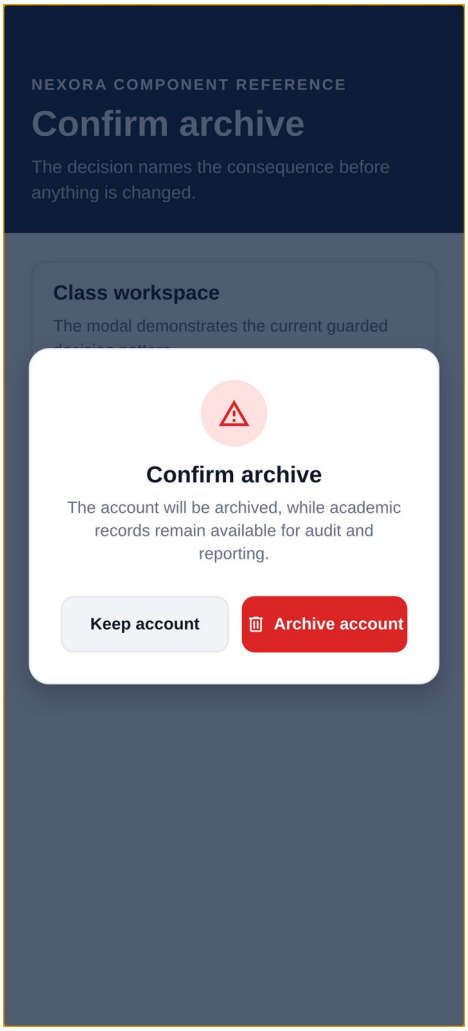

**Purpose:** The current success banner confirms that the operation finished and makes the resulting state explicit.

**Routes covered:** ComponentGallery:success

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Confirmation state

**Role:** All roles

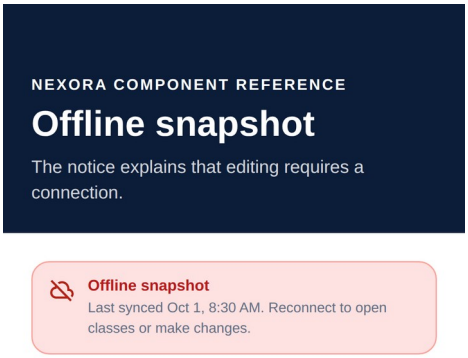

**Purpose:** The current confirmation modal names the consequence and separates the cancel and confirm actions clearly.

**Routes covered:** ComponentGallery:confirmation

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

## Offline state

**Role:** All roles

**Purpose:** The current offline notice explains that the visible data is a snapshot and that editing requires reconnection.

**Routes covered:** ComponentGallery:offline

### Read it in this order

1. Page title and current state. 2. Main card or form. 3. Primary action. 4. Success, empty, offline, or error feedback.

**Evidence:** Android 15; app 0.1.56 build 57

**Complete web screen guide**

**Everyone web screens**

**Access and account setup**

## Public home

**Role and path:** Everyone · /

**Purpose:** Nexora landing page rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Public home from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

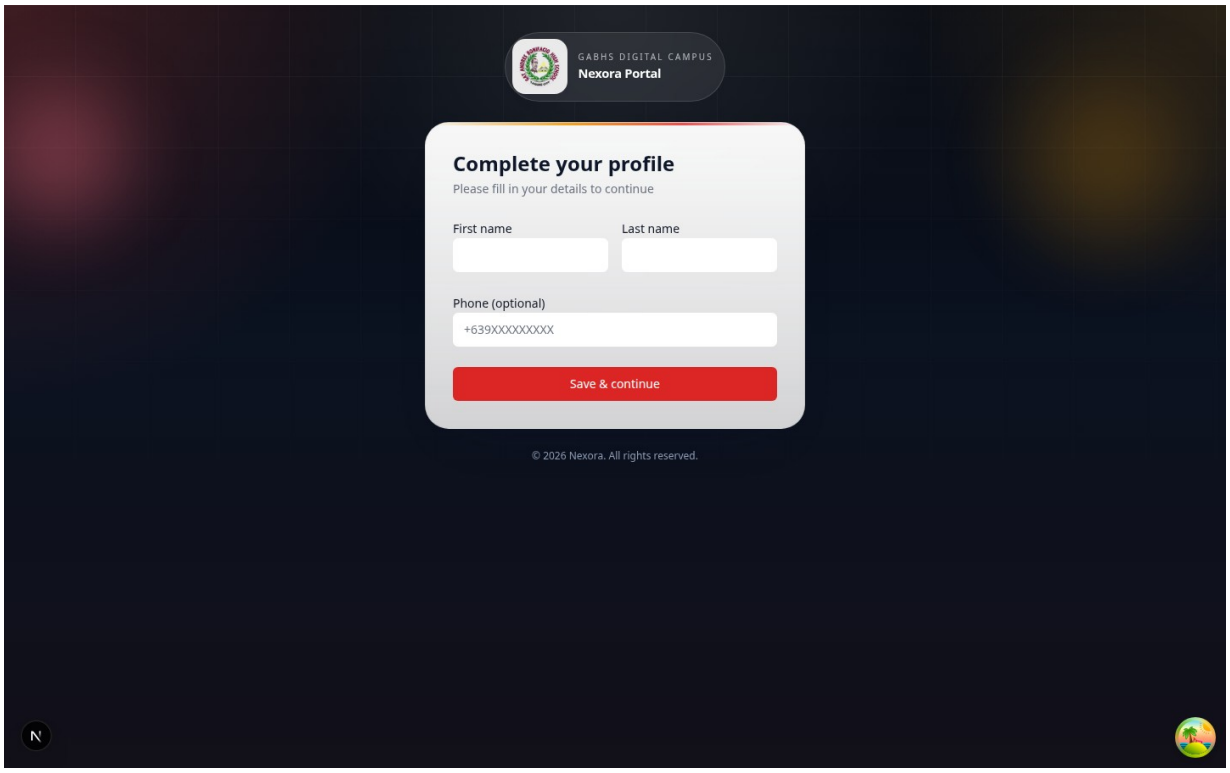

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/page.tsx · evidence 211483f0

## Complete Profile

**Role and path:** Everyone · /complete-profile

**Purpose:** Complete Profile rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Complete Profile from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

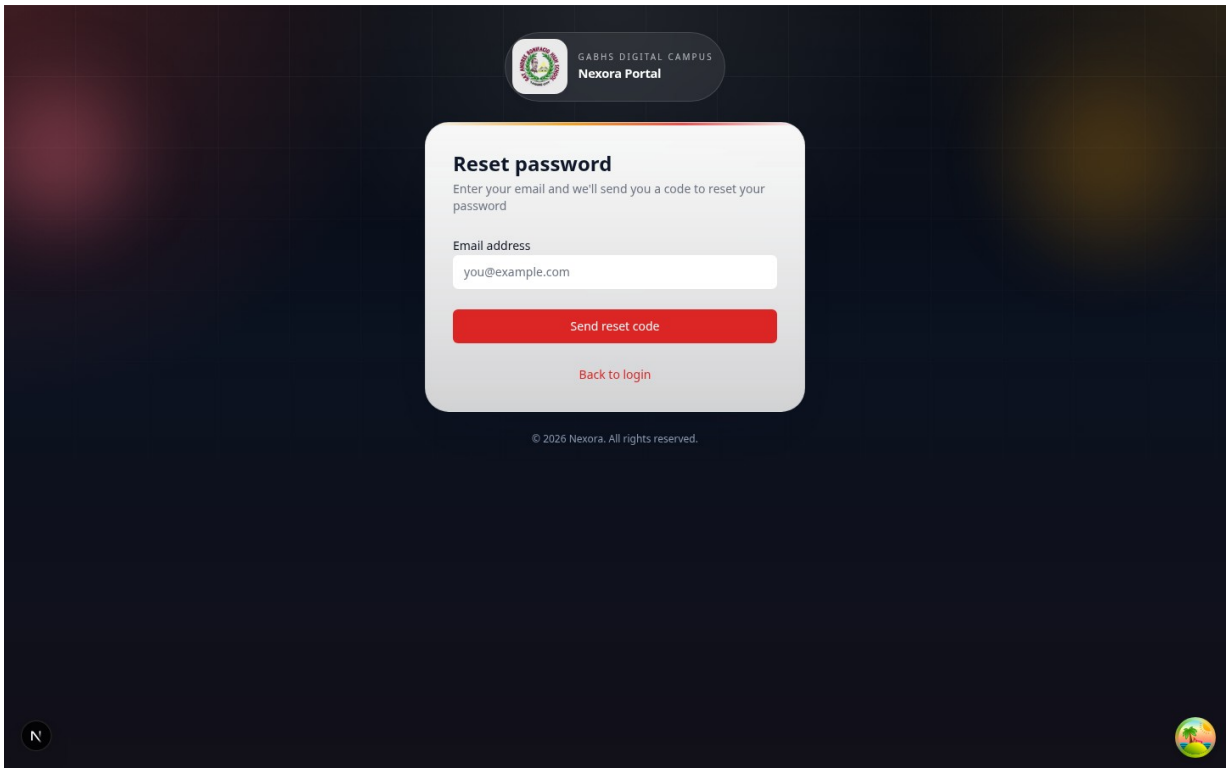

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/complete-profile/page.tsx · evidence 211483f0

## Forgot Password

**Role and path:** Everyone · /forgot-password

**Purpose:** Forgot Password rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Forgot Password from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

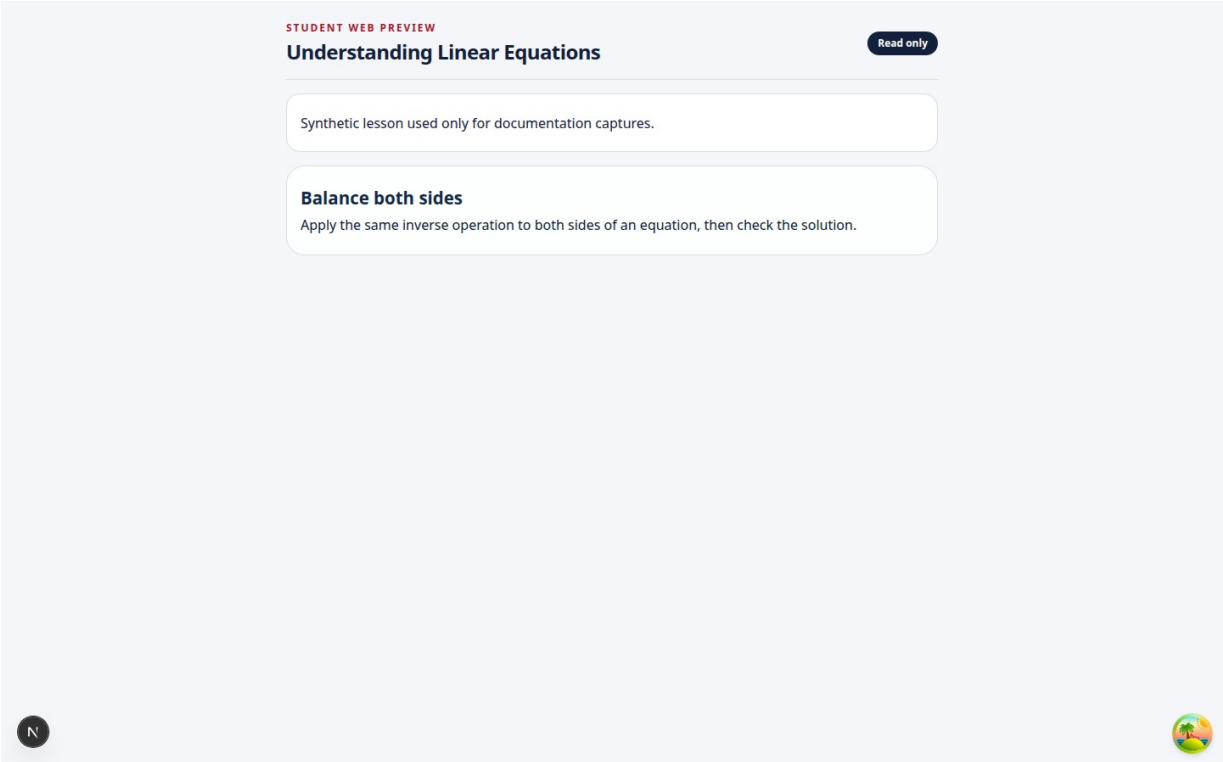

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/forgot-password/page.tsx · evidence 211483f0

## Lesson Preview - selected item

**Role and path:** Everyone · /lesson-preview/[token]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Lesson Preview - selected item from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

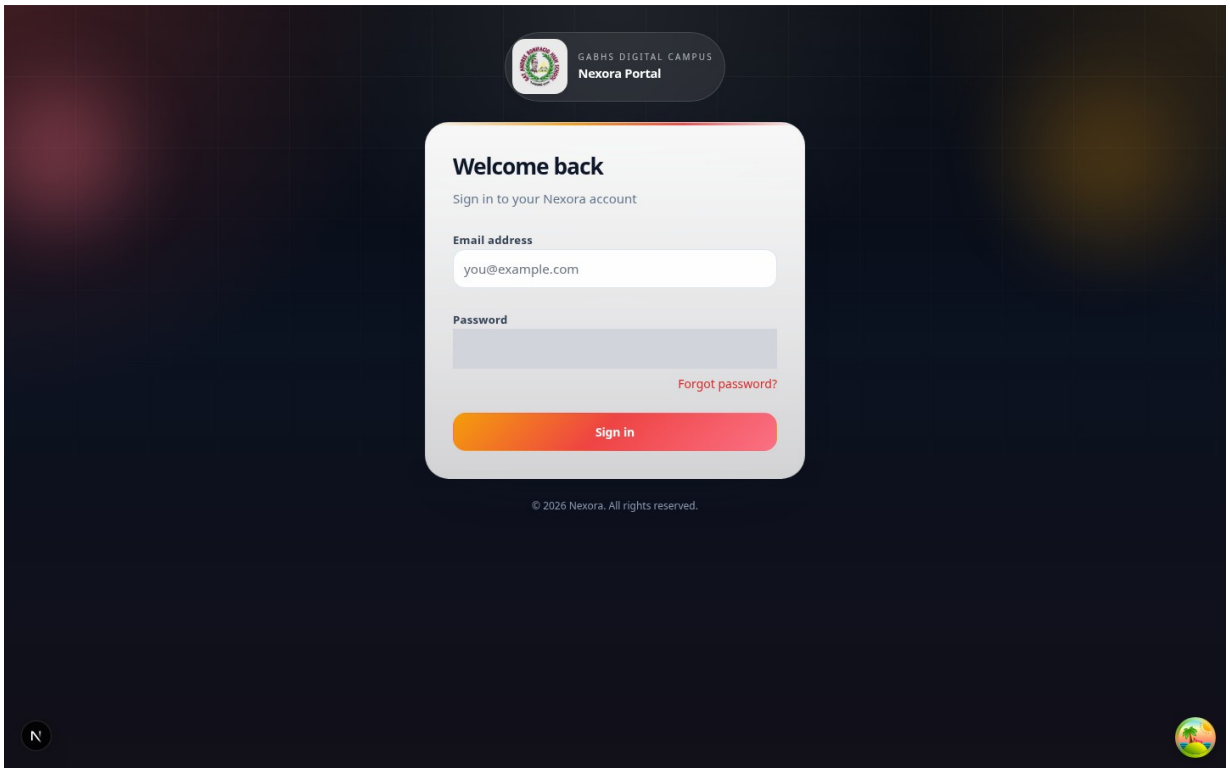

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/lesson-preview/[token]/page.tsx · evidence 211483f0

## Login

**Role and path:** Everyone · /login

**Purpose:** Login rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Login from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

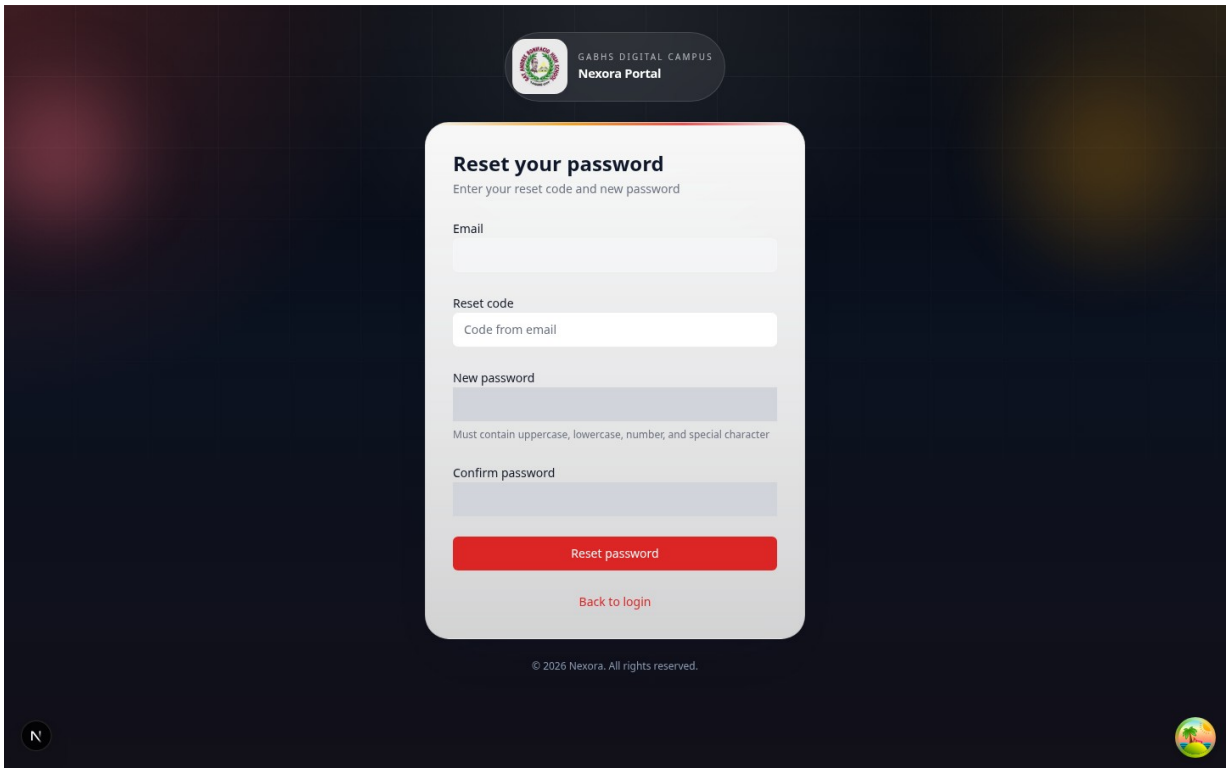

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/login/page.tsx · evidence 211483f0

## Reset Password

**Role and path:** Everyone · /reset-password

**Purpose:** Reset Password rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Reset Password from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

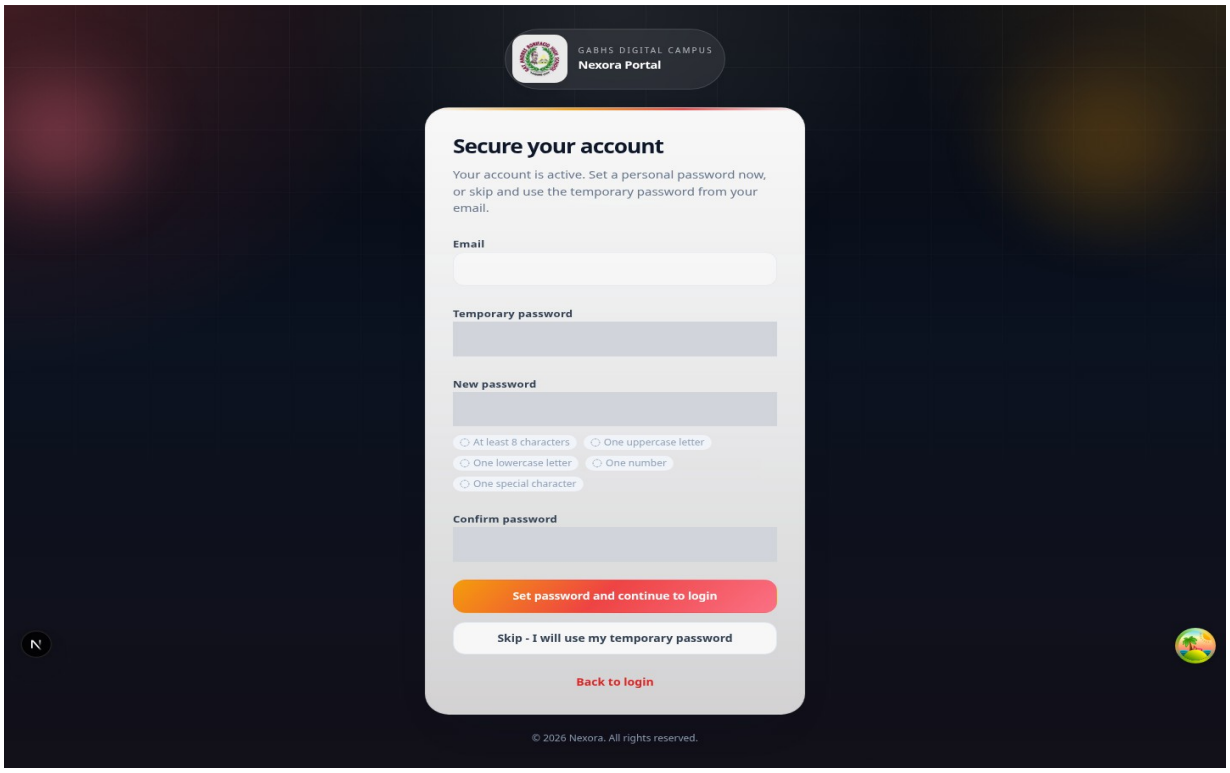

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/reset-password/page.tsx · evidence 211483f0

## Set Initial Password

**Role and path:** Everyone · /set-initial-password

**Purpose:** Set Initial Password rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Set Initial Password from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

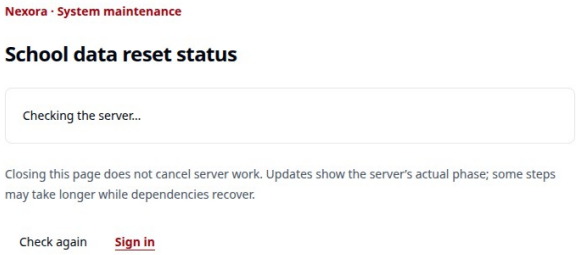

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/set-initial-password/page.tsx · evidence 211483f0

## System Maintenance

**Role and path:** Everyone · /system-maintenance

**Purpose:** System Maintenance rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open System Maintenance from the visible navigation or its parent workspace.
3. Preview the impact, read every blocker, reauthenticate, and confirm only when the evidence is correct.
4. Stop if the preview, blockers, or affected records differ from the intended scope.

**Done when:** The preview, confirmation, resulting state, and audit evidence agree.

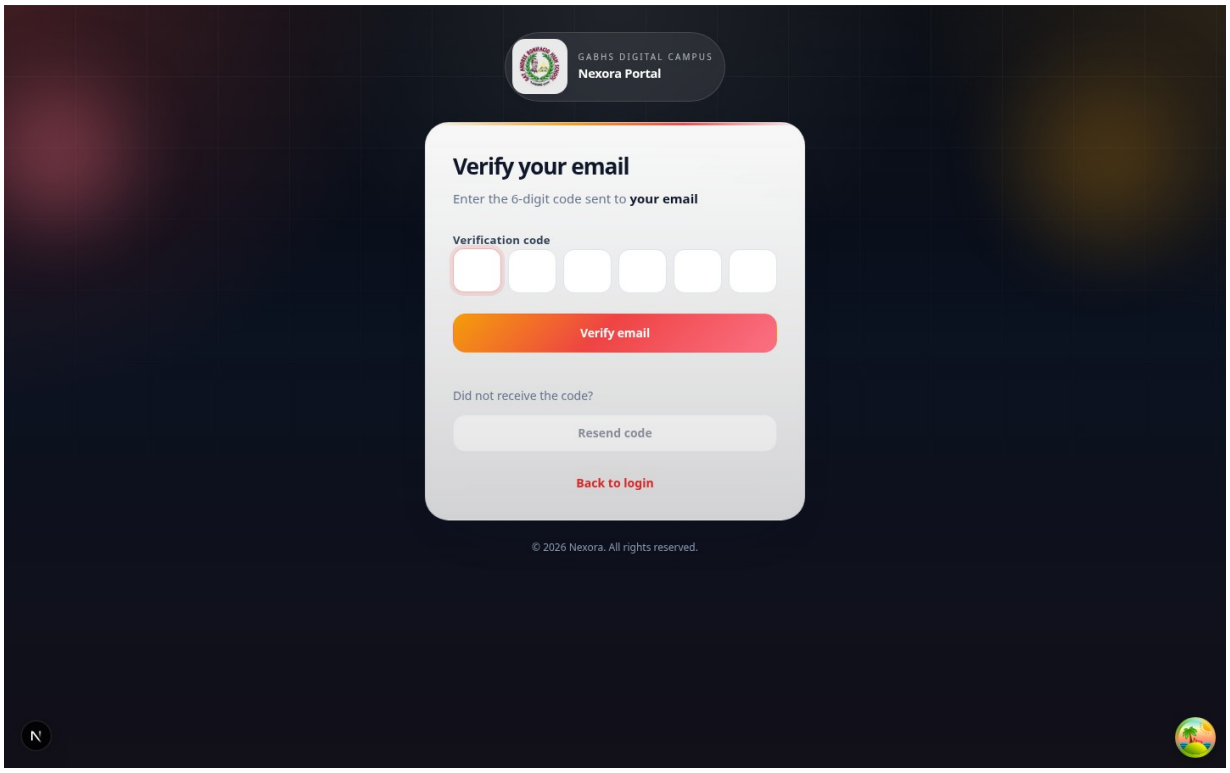

**If stuck:** Stop. Save the blocker text and ask an administrator to verify policy and readiness before retrying.

**Behind the screen:** next-frontend/app/system-maintenance/page.tsx · evidence 211483f0

## Verify Email

**Role and path:** Everyone · /verify-email

**Purpose:** Verify Email rendered from the locked application snapshot

### Do this

1. Open the Nexora address supplied by the school.
2. Open Verify Email from the visible navigation or its parent workspace.
3. Choose an approved class or source, ask one focused question, and review AI output before applying it.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(auth)/verify-email/page.tsx · evidence 211483f0

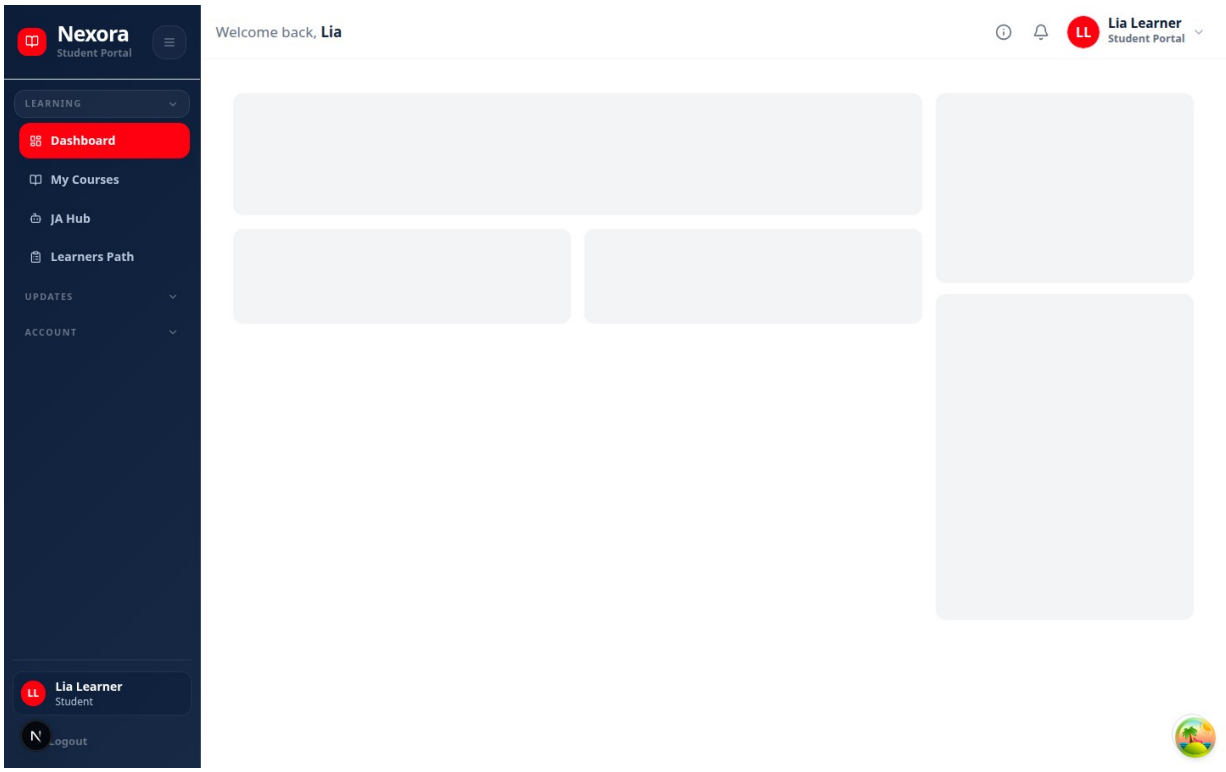

**Learner web screens**

**Student workflows**

## Student

**Role and path:** Learner · /dashboard/student

**Purpose:** Student rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Student from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

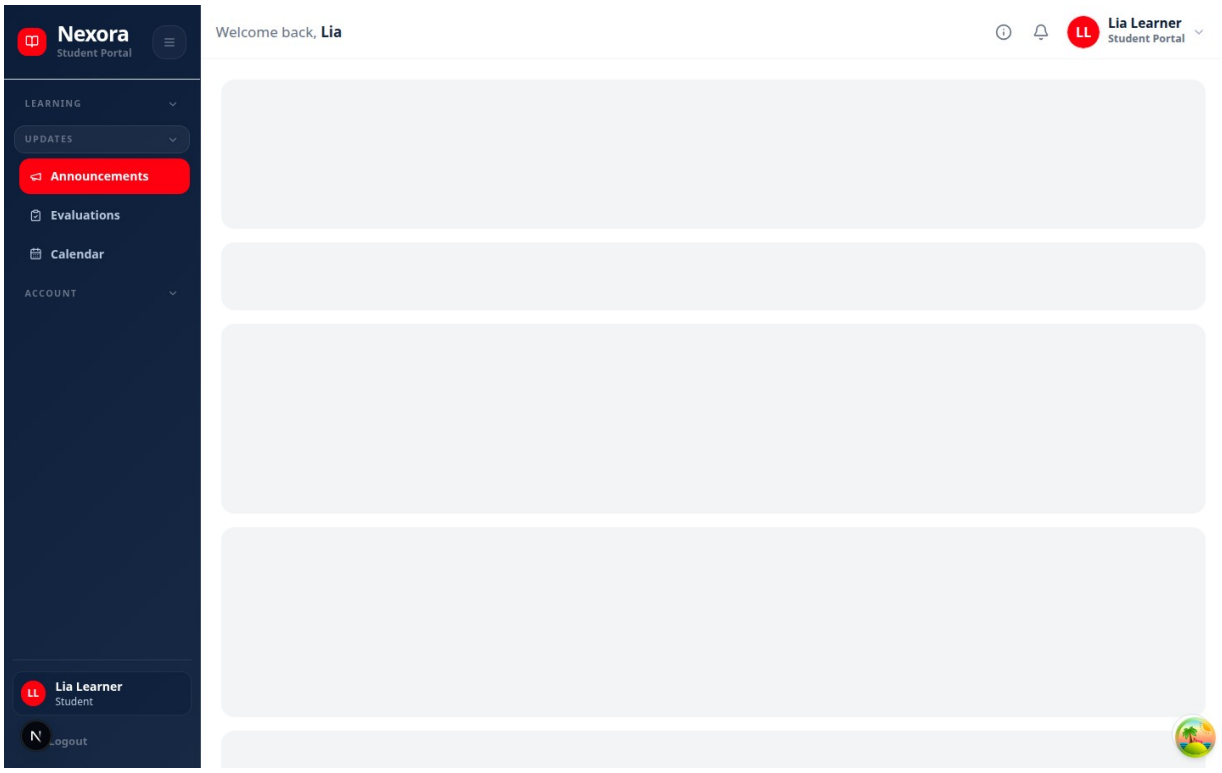

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/page.tsx · evidence 211483f0

## Announcements

**Role and path:** Learner · /dashboard/student/announcements

**Purpose:** Announcements rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Announcements from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

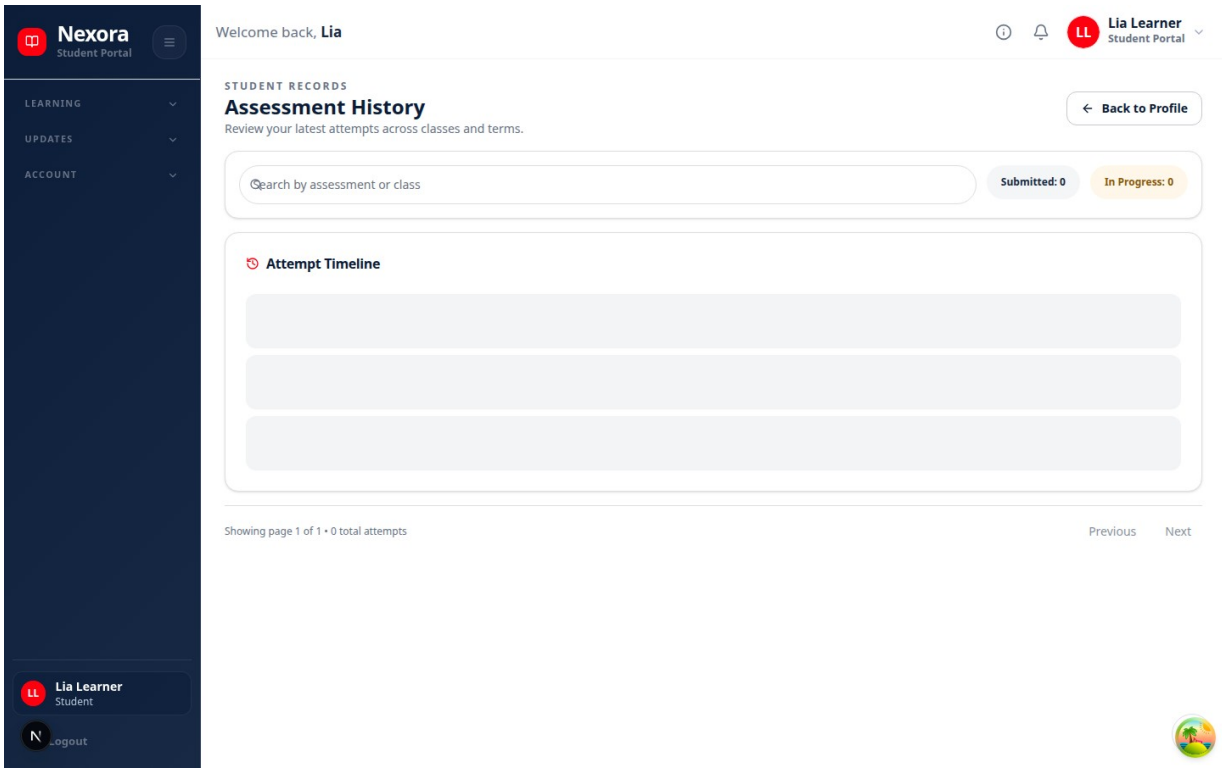

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/announcements/page.tsx · evidence 211483f0

## Assessment History

**Role and path:** Learner · /dashboard/student/assessment-history

**Purpose:** Assessment History rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Assessment History from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

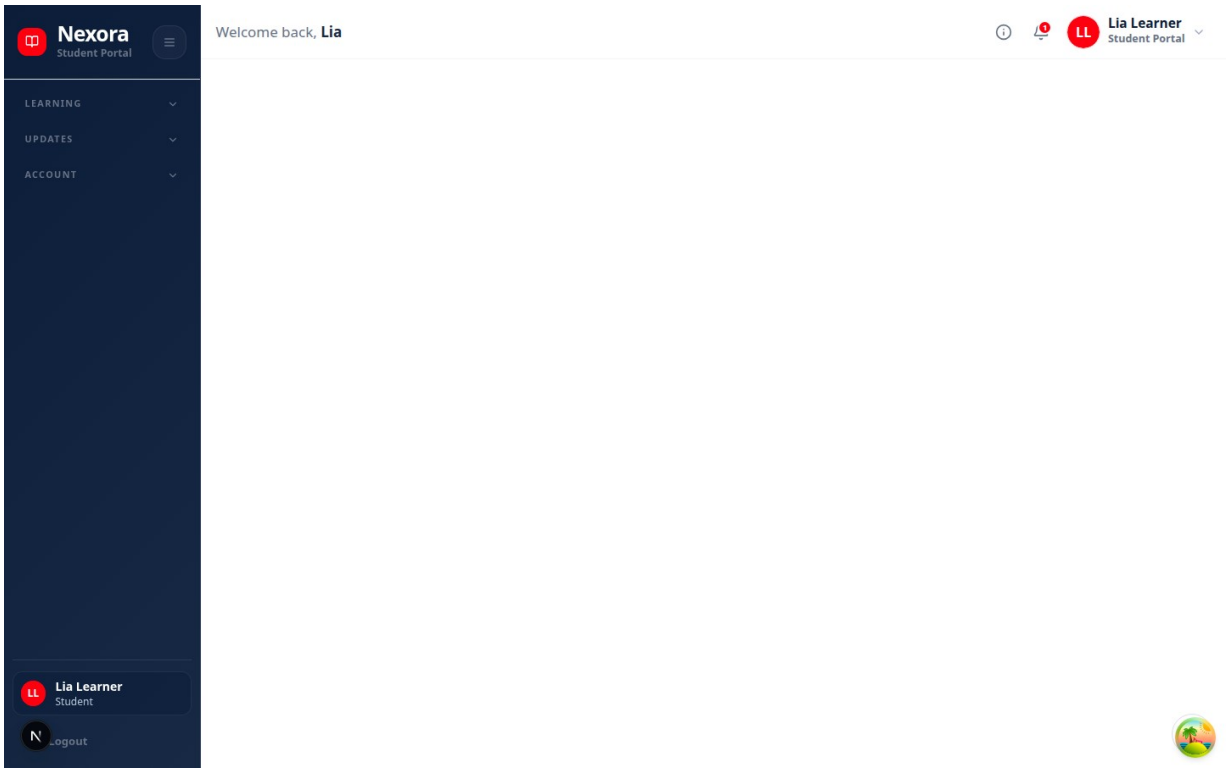

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/assessment-history/page.tsx · evidence 211483f0

## Assessments

**Role and path:** Learner · /dashboard/student/assessments

**Purpose:** Assessments rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Assessments from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

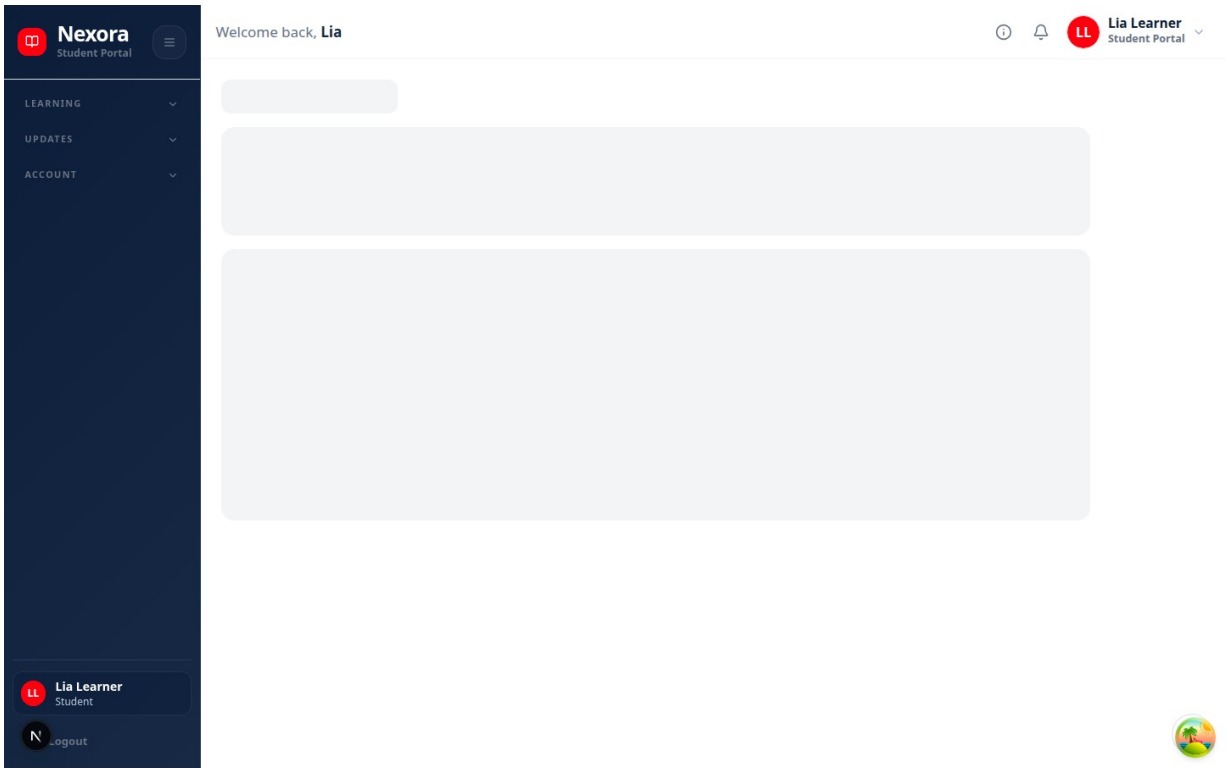

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/assessments/page.tsx · evidence 211483f0

## Assessments - selected item

**Role and path:** Learner · /dashboard/student/assessments/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Assessments - selected item from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

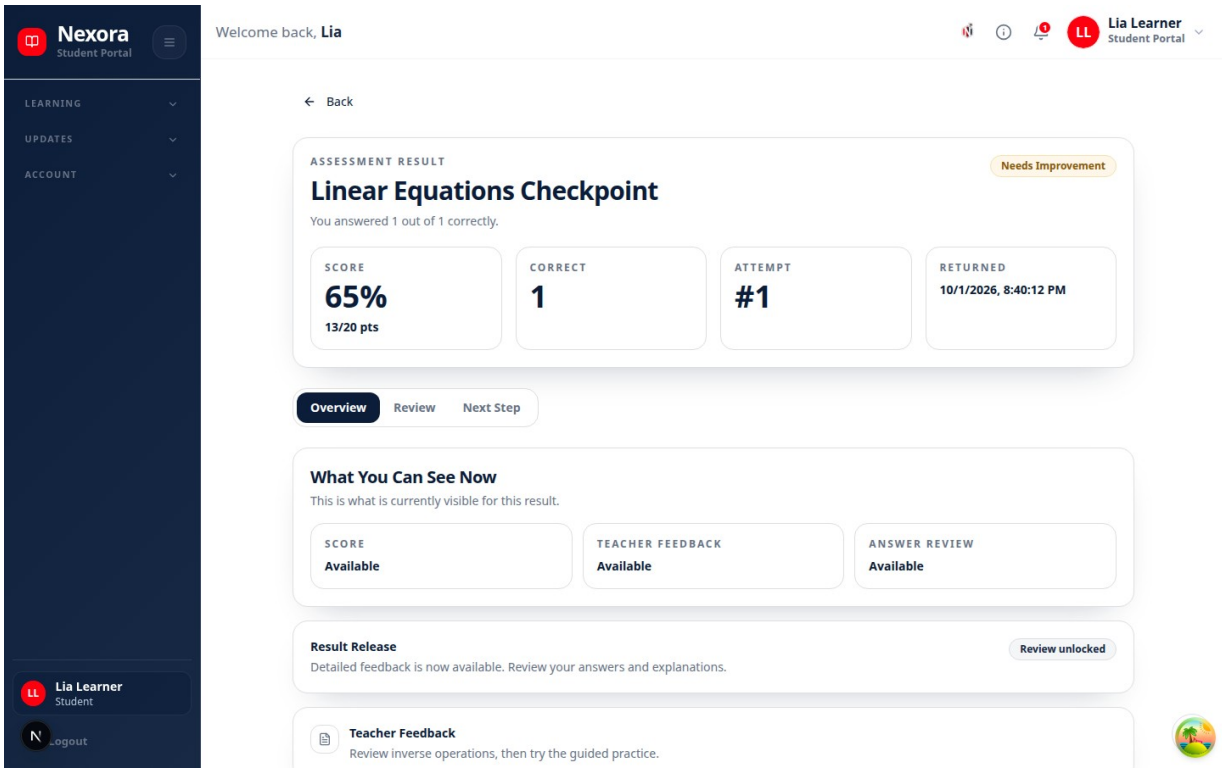

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/assessments/[id]/page.tsx · evidence 211483f0

## Results - selected item

**Role and path:** Learner · /dashboard/student/assessments/[id]/results/[attemptId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Results - selected item from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

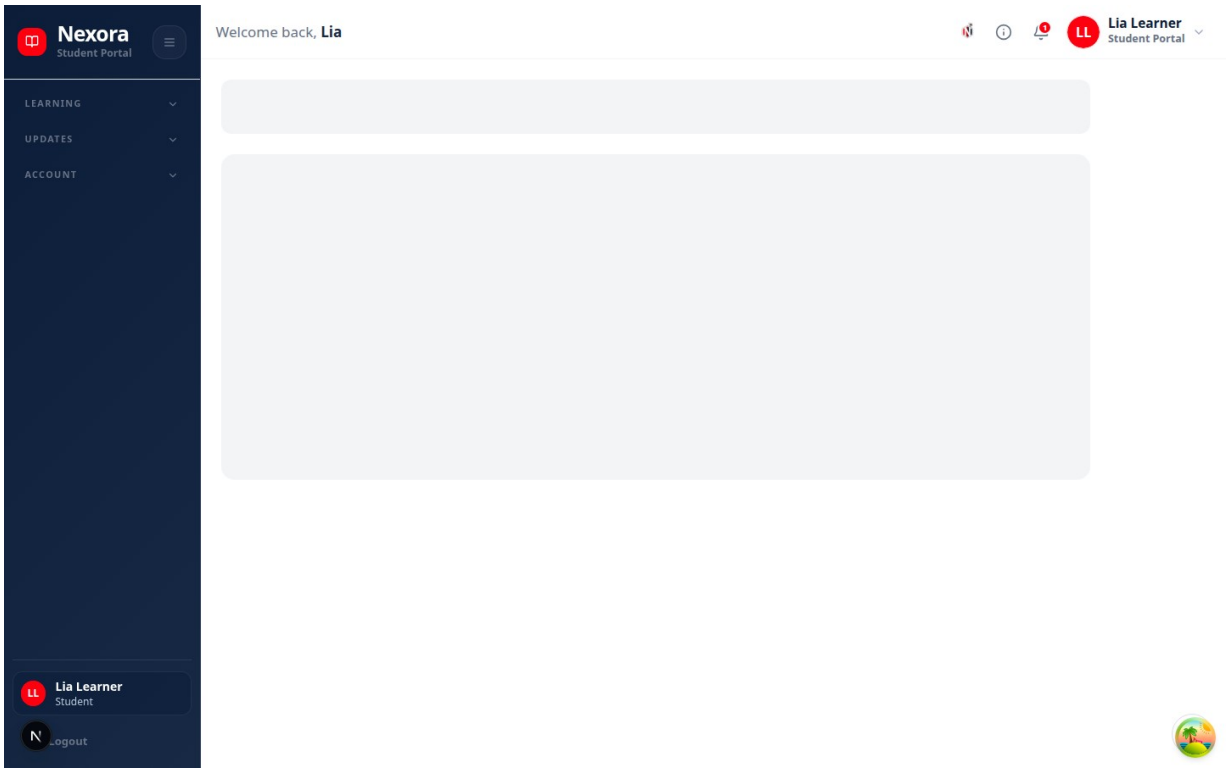

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/assessments/[id]/results/[attemptId]/page.tsx · evidence 211483f0

## Take

**Role and path:** Learner · /dashboard/student/assessments/[id]/take

**Purpose:** Take rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Take from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

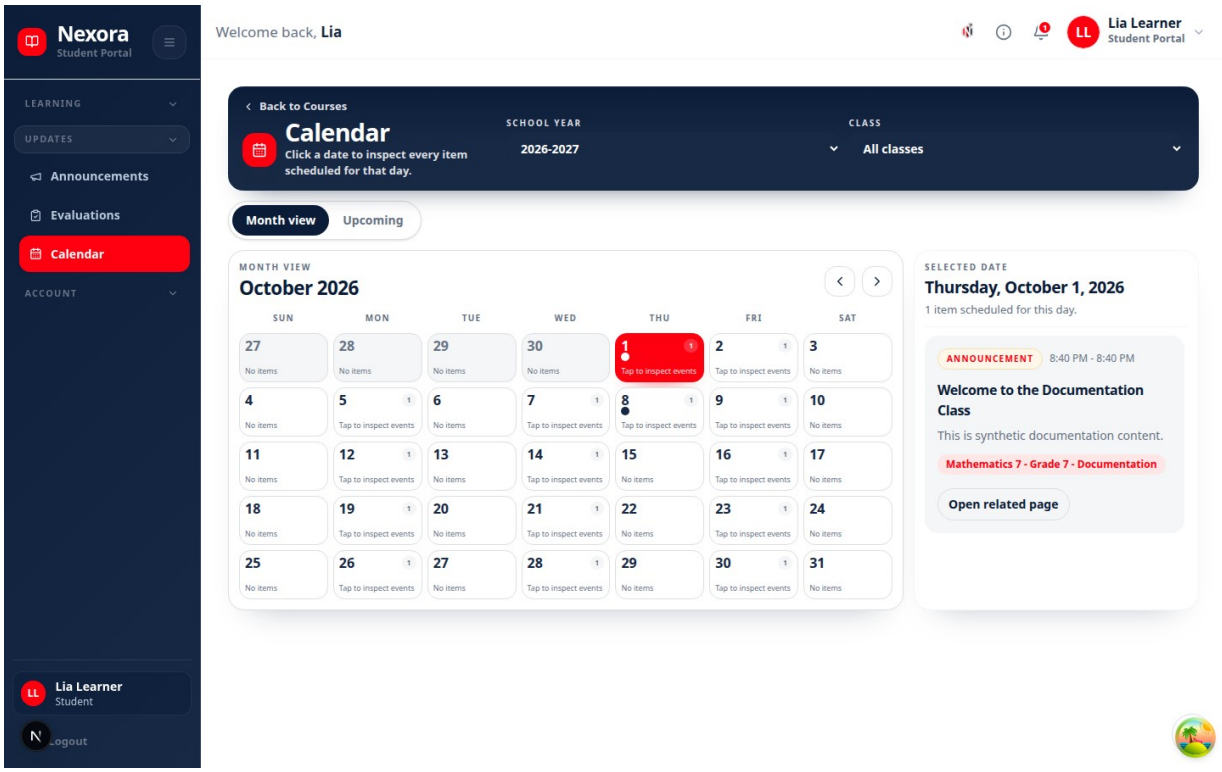

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/assessments/[id]/take/page.tsx · evidence 211483f0

## Calendar

**Role and path:** Learner · /dashboard/student/calendar

**Purpose:** Calendar rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Calendar from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

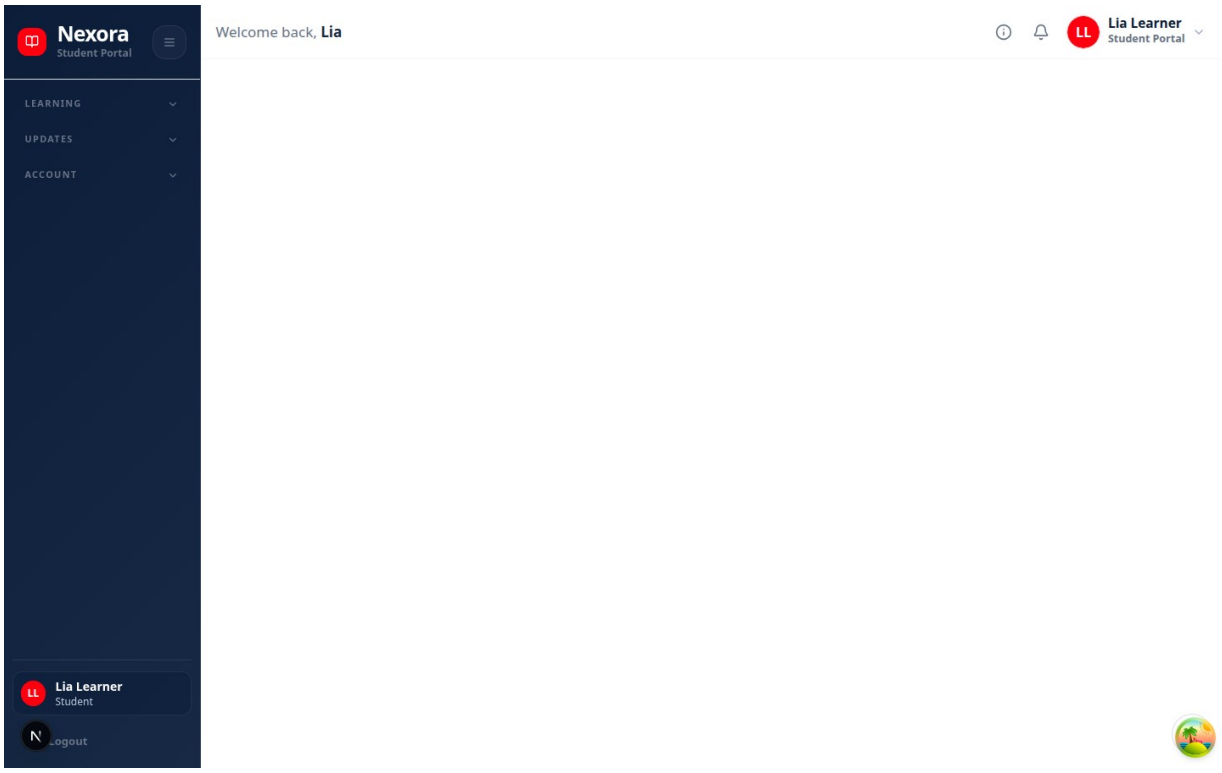

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/calendar/page.tsx · evidence 211483f0

## Chatbot

**Role and path:** Learner · /dashboard/student/chatbot

**Purpose:** Chatbot rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Chatbot from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

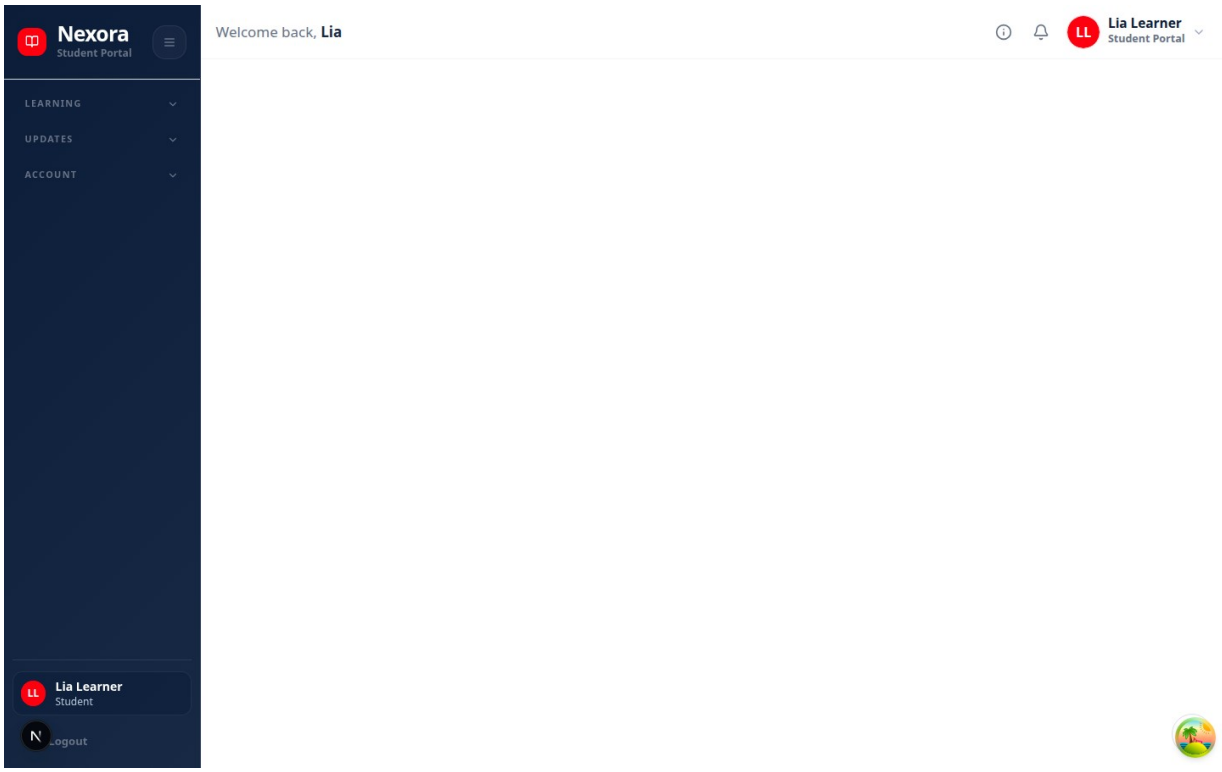

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/chatbot/page.tsx · evidence 211483f0

## Classes

**Role and path:** Learner · /dashboard/student/classes

**Purpose:** Classes rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Classes from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

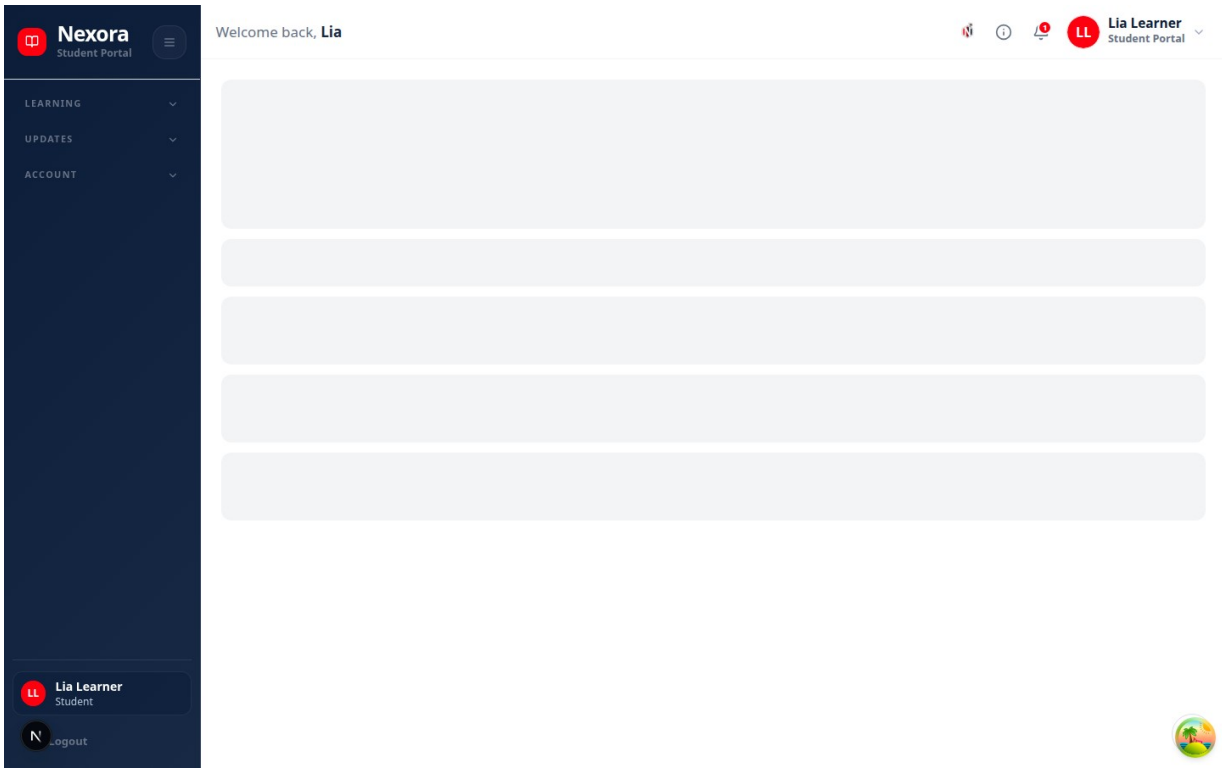

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/classes/page.tsx · evidence 211483f0

## Classes - selected item

**Role and path:** Learner · /dashboard/student/classes/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Classes - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

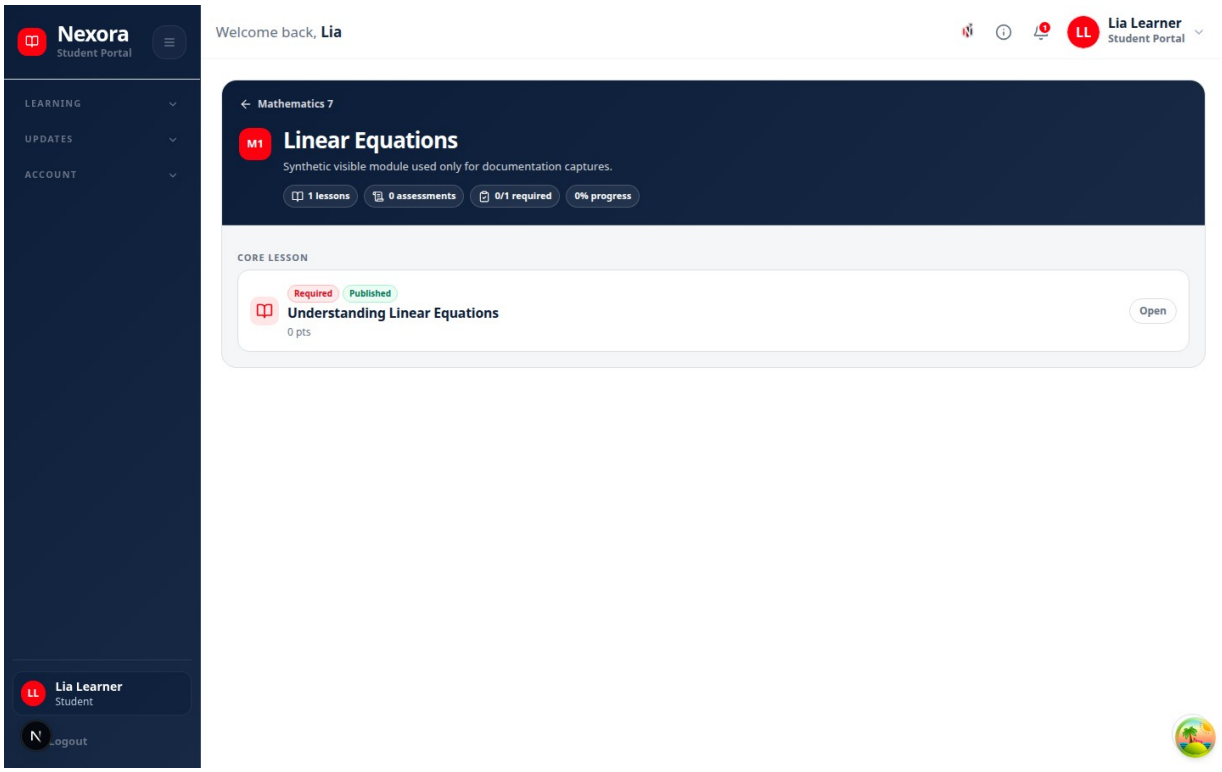

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/classes/[id]/page.tsx · evidence 211483f0

## Modules - selected item

**Role and path:** Learner · /dashboard/student/classes/[id]/modules/[moduleId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Modules - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

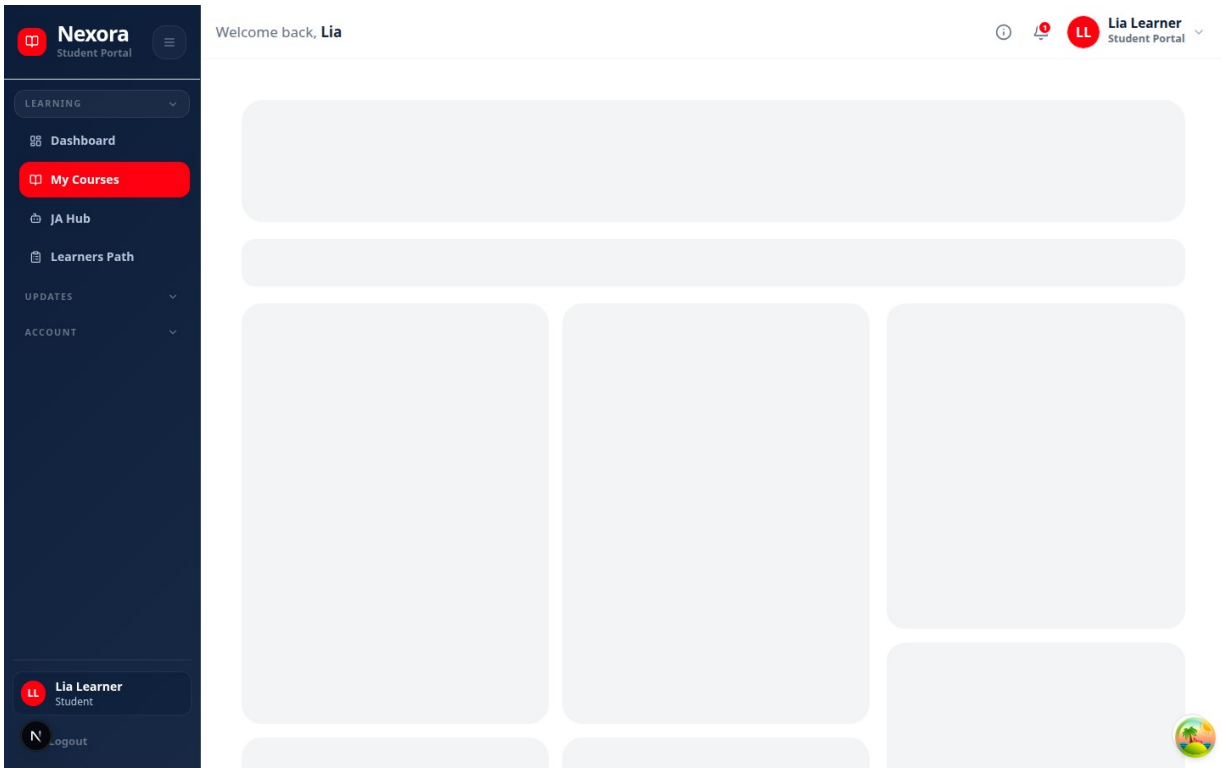

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/classes/[id]/modules/[moduleId]/page.tsx · evidence 211483f0

## Courses

**Role and path:** Learner · /dashboard/student/courses

**Purpose:** Courses rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Courses from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

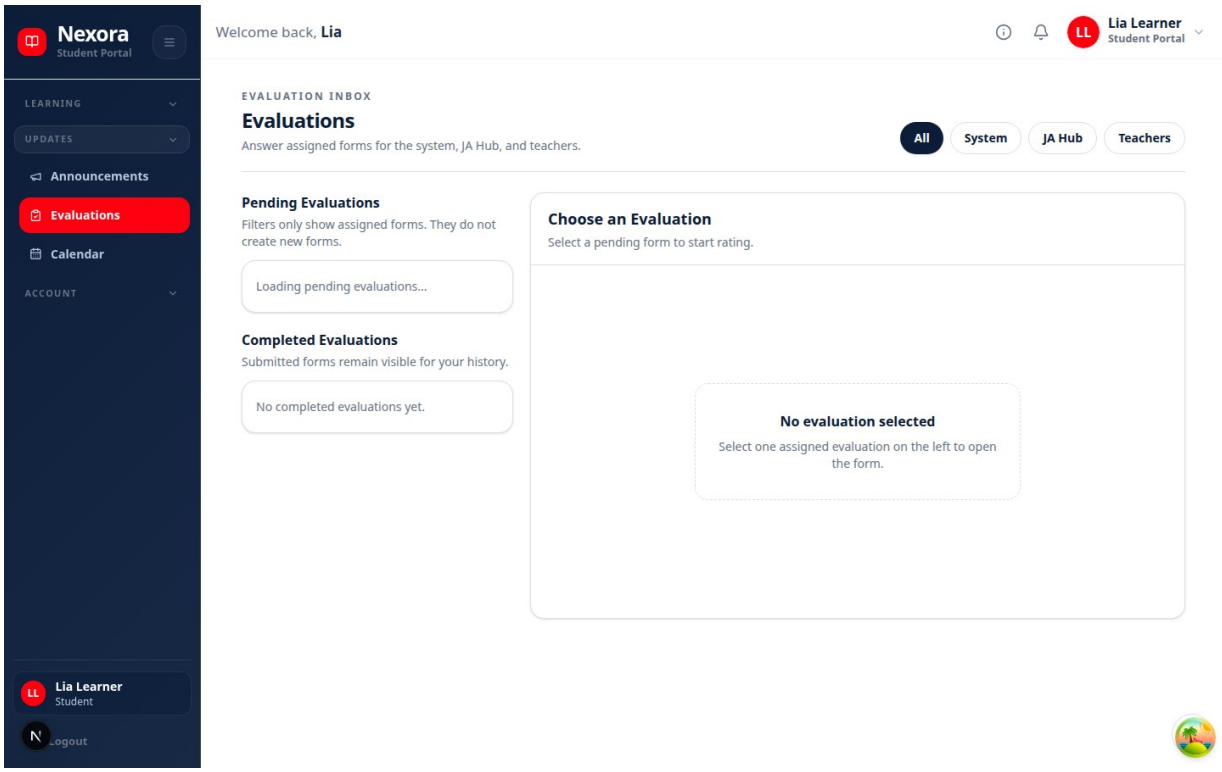

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

## Evaluations

**Role and path:** Learner · /dashboard/student/evaluations

**Purpose:** Evaluations rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Evaluations from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

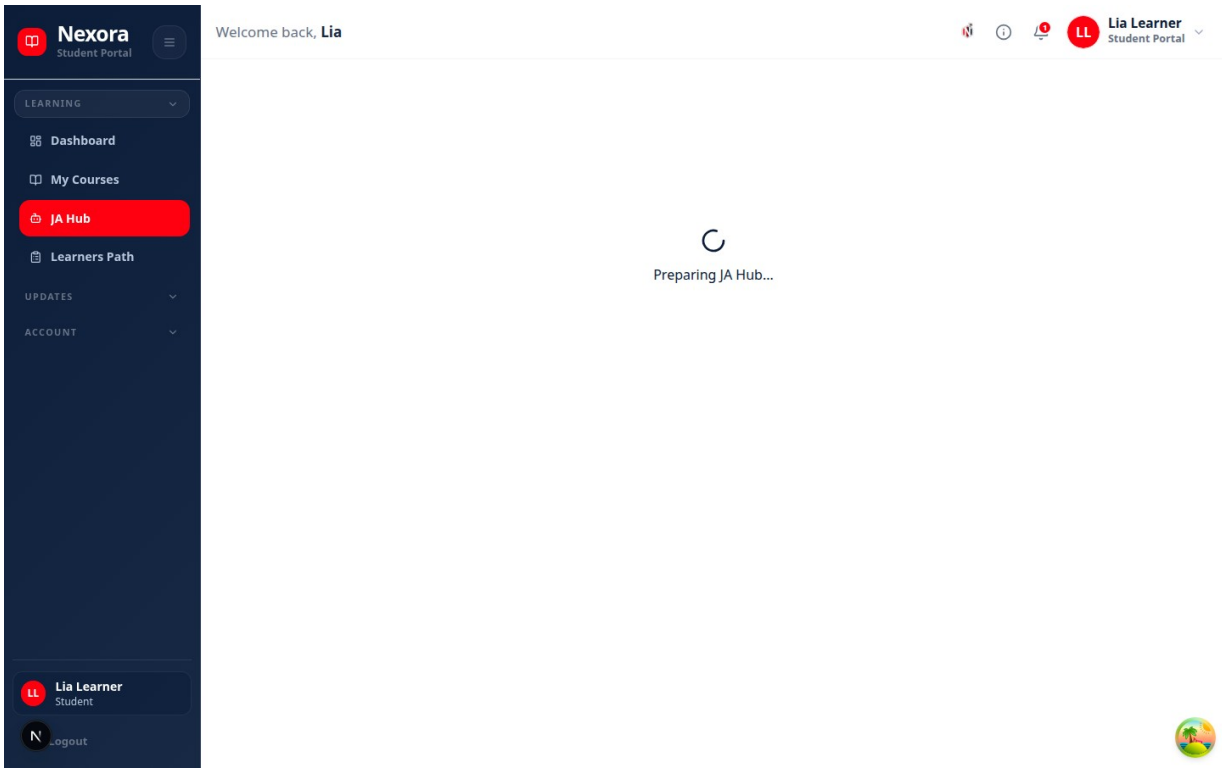

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/evaluations/page.tsx · evidence 211483f0

## Ja

**Role and path:** Learner · /dashboard/student/ja

**Purpose:** Ja rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Ja from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

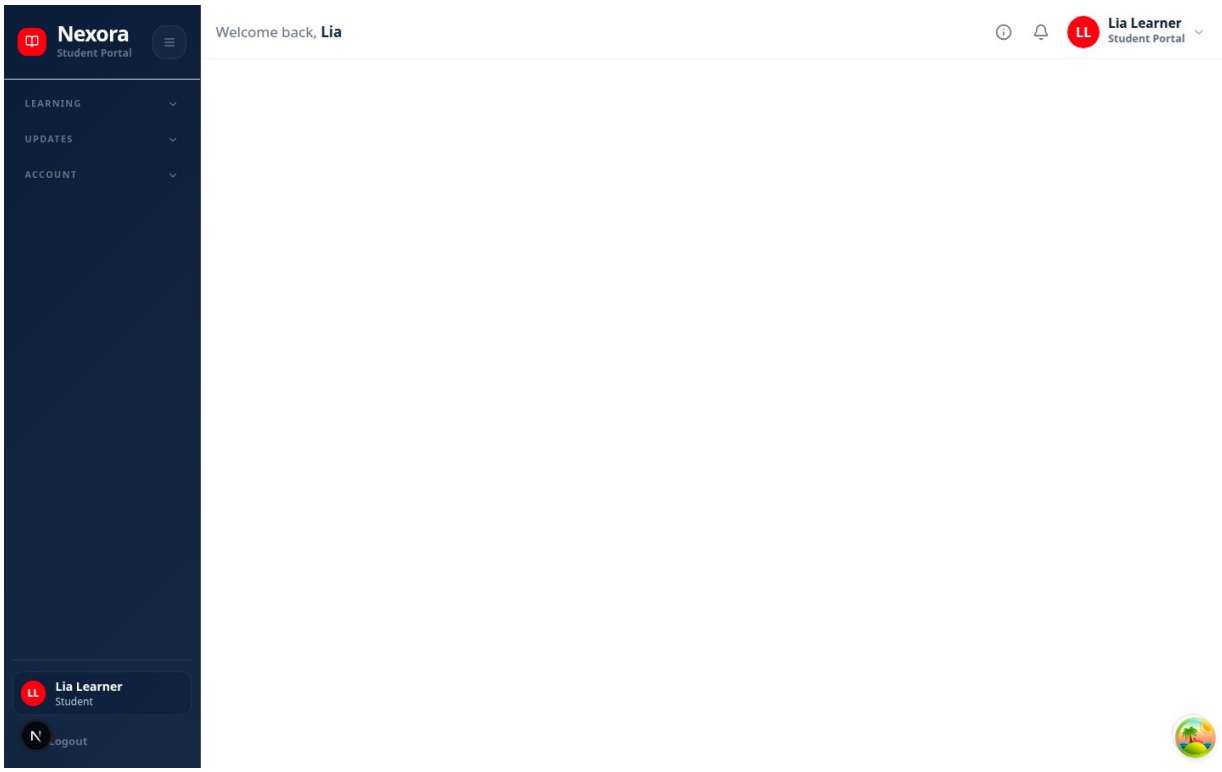

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/ja/page.tsx · evidence 211483f0

## Lessons

**Role and path:** Learner · /dashboard/student/lessons

**Purpose:** Lessons rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Lessons from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

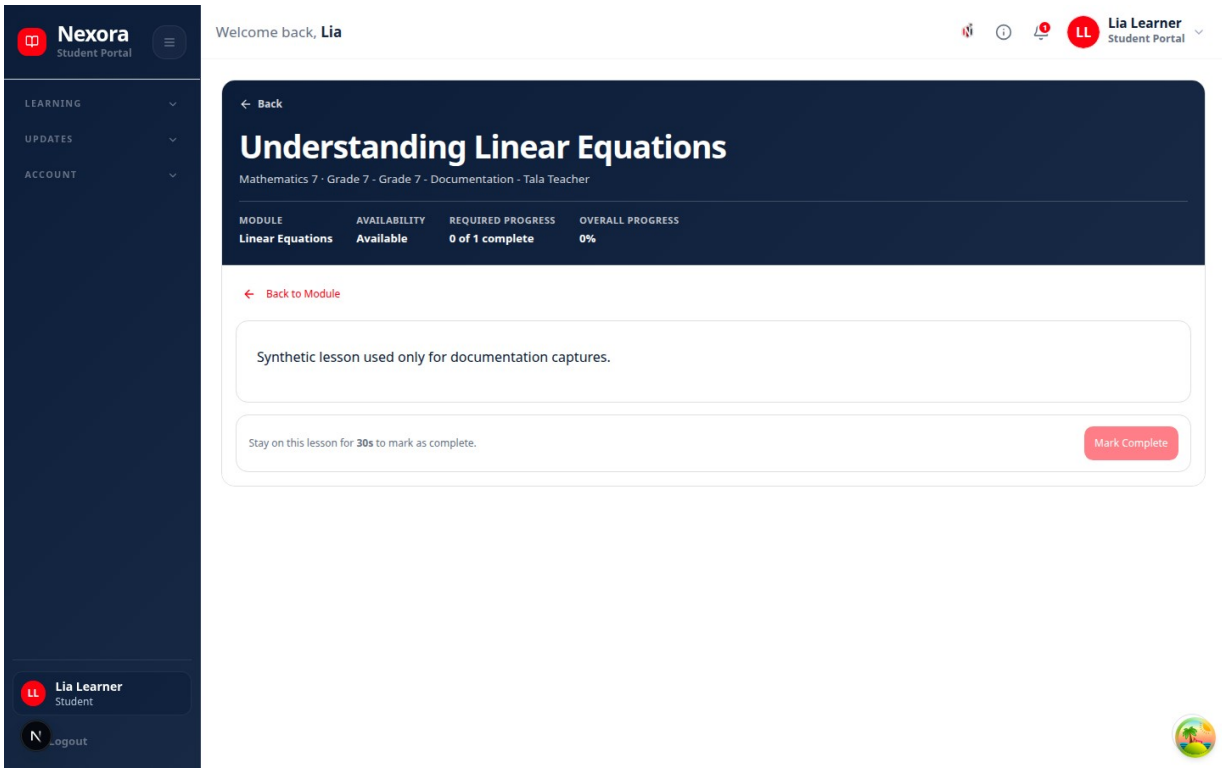

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/lessons/page.tsx · evidence 211483f0

## Lessons - selected item

**Role and path:** Learner · /dashboard/student/lessons/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Lessons - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

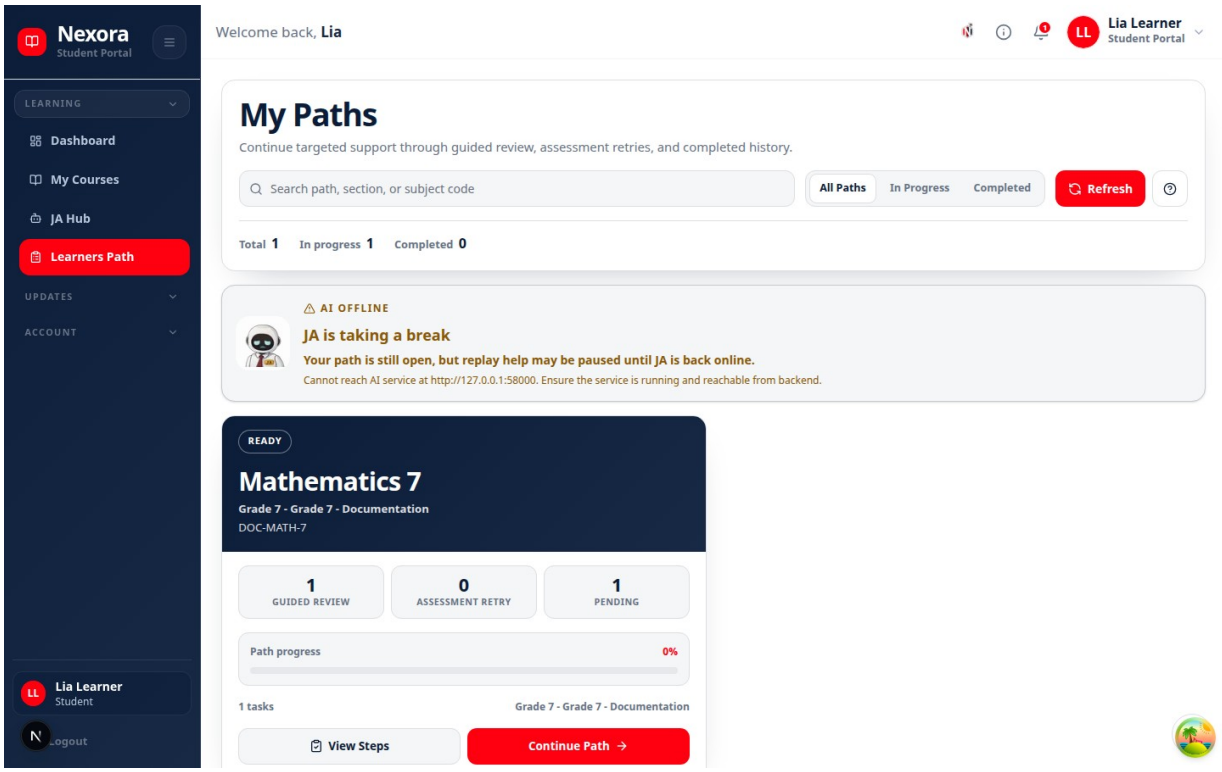

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/lessons/[id]/page.tsx · evidence 211483f0

## Lxp

**Role and path:** Learner · /dashboard/student/lxp

**Purpose:** Lxp rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Lxp from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

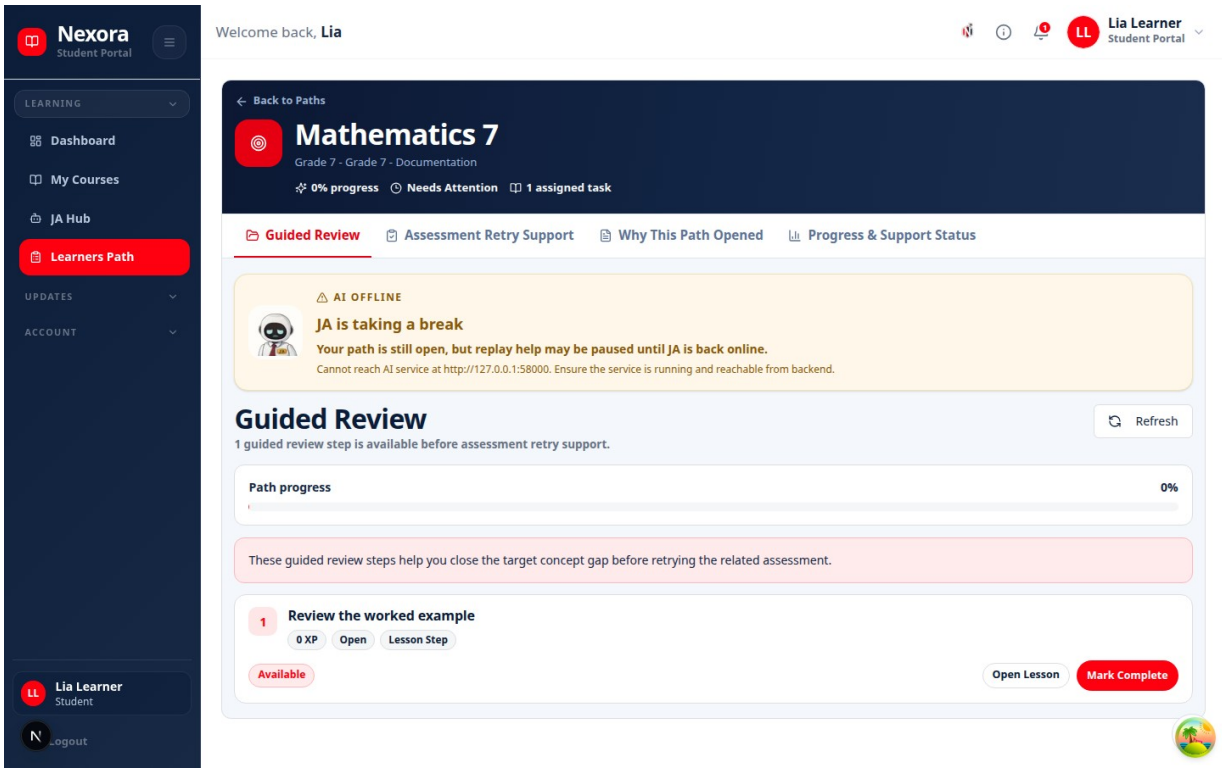

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

## Lxp - selected item

**Role and path:** Learner · /dashboard/student/lxp/[classId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Lxp - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

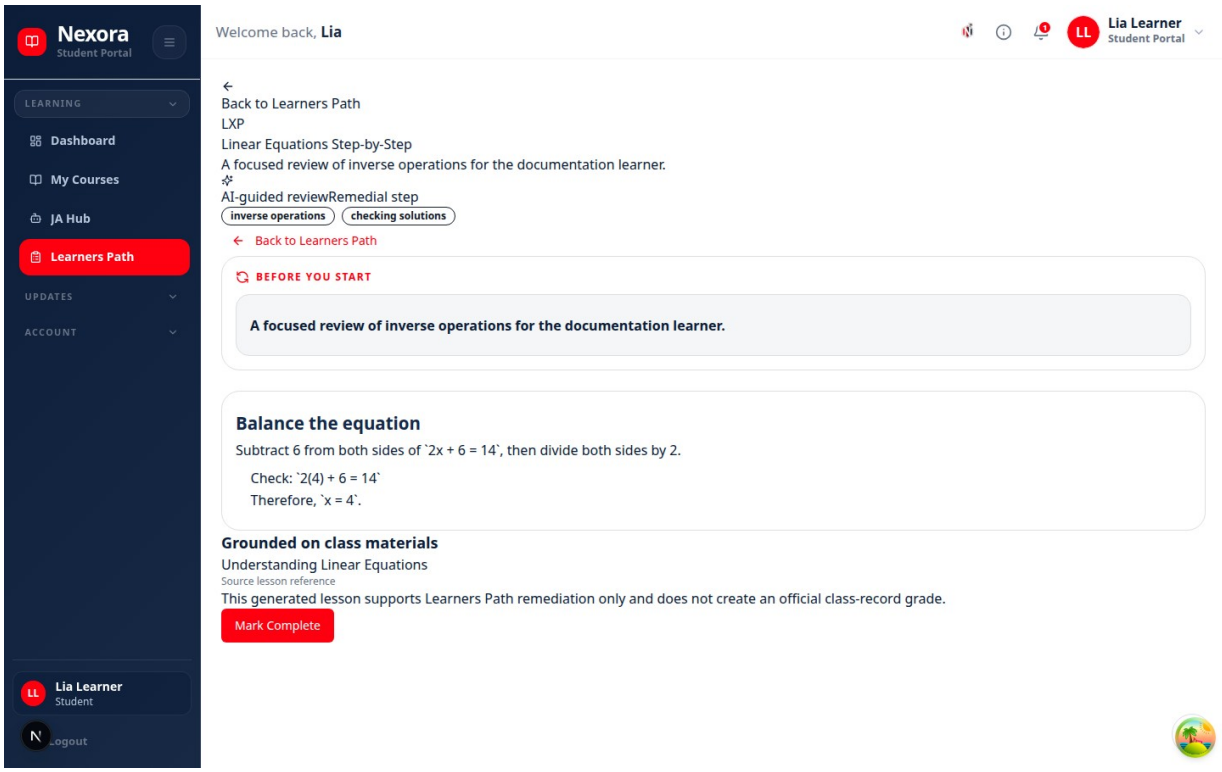

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/lxp/[classId]/page.tsx · evidence 211483f0

## Generated Lessons - selected item

**Role and path:** Learner · /dashboard/student/lxp/[classId]/generated-lessons/[assignmentId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Generated Lessons - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

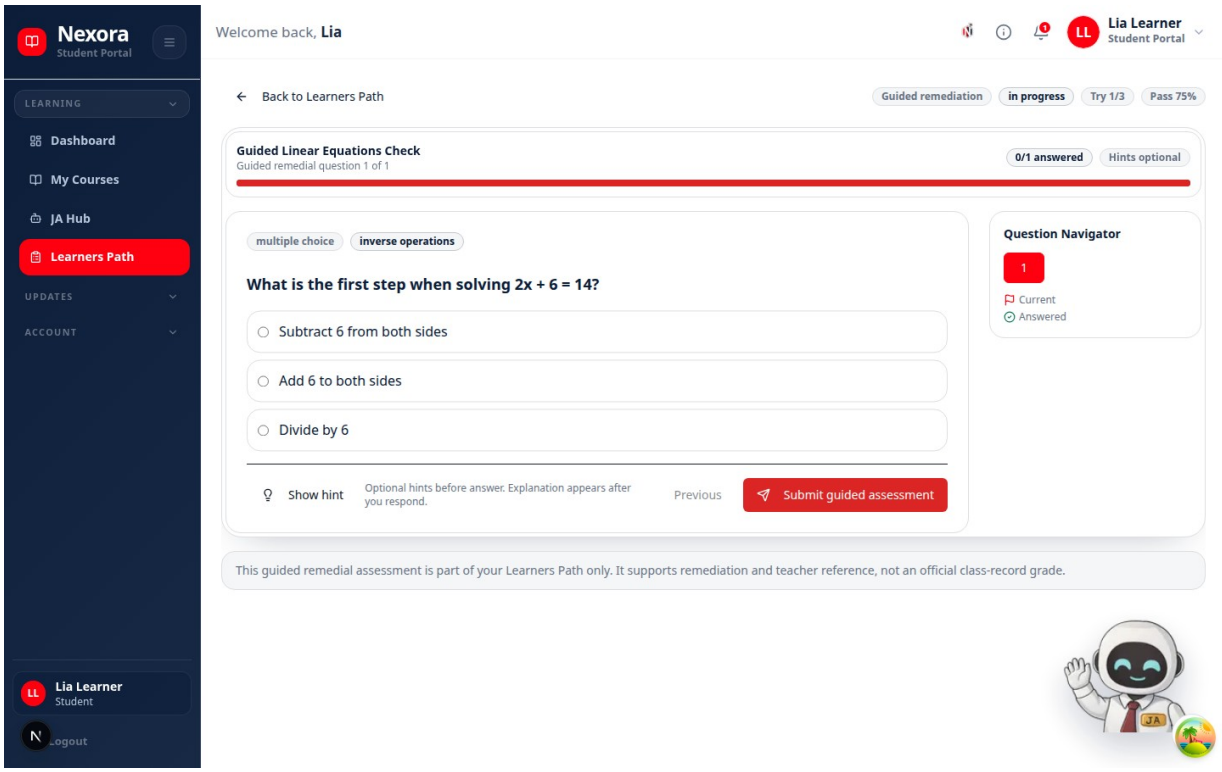

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/lxp/[classId]/generated-lessons/[assignmentId]/page.tsx · evidence 211483f0

## Guided Assessment - selected item

**Role and path:** Learner · /dashboard/student/lxp/[classId]/guided-assessment/[assignmentId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Guided Assessment - selected item from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

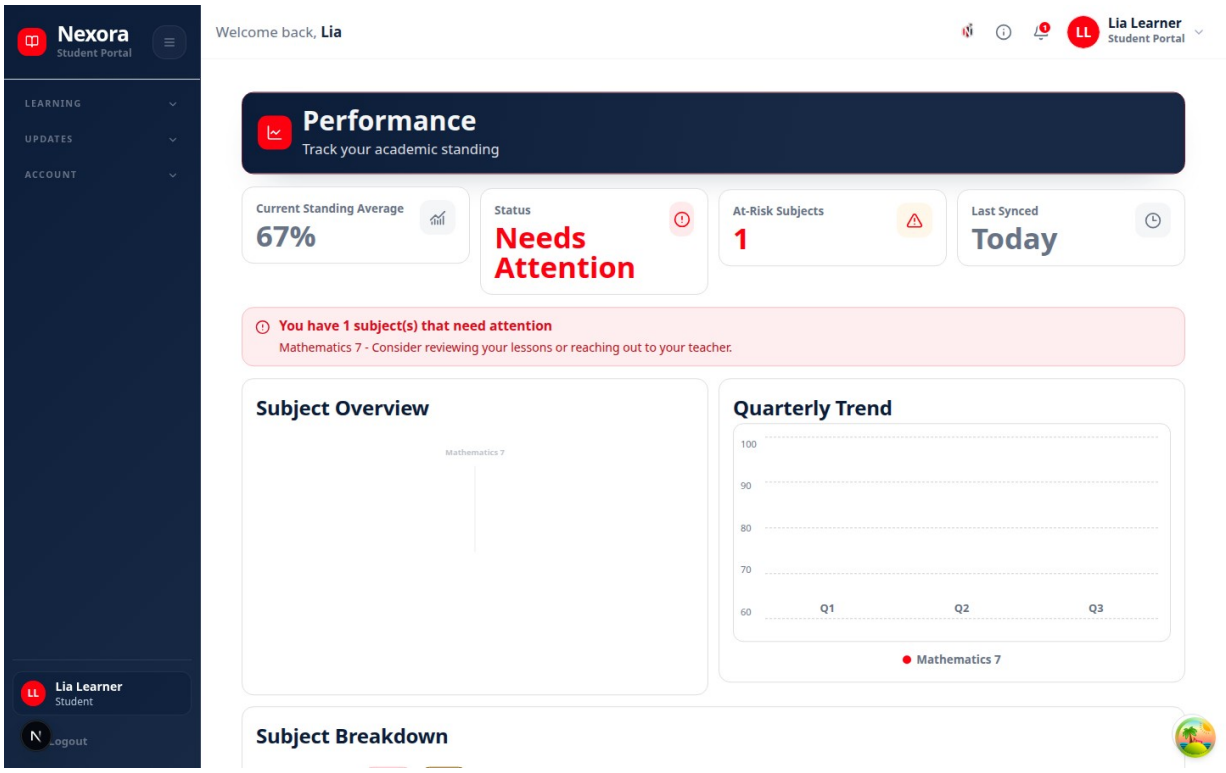

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/lxp/[classId]/guided-assessment/[assignmentId]/page.tsx · evidence 211483f0

## Performance

**Role and path:** Learner · /dashboard/student/performance

**Purpose:** Performance rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Performance from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

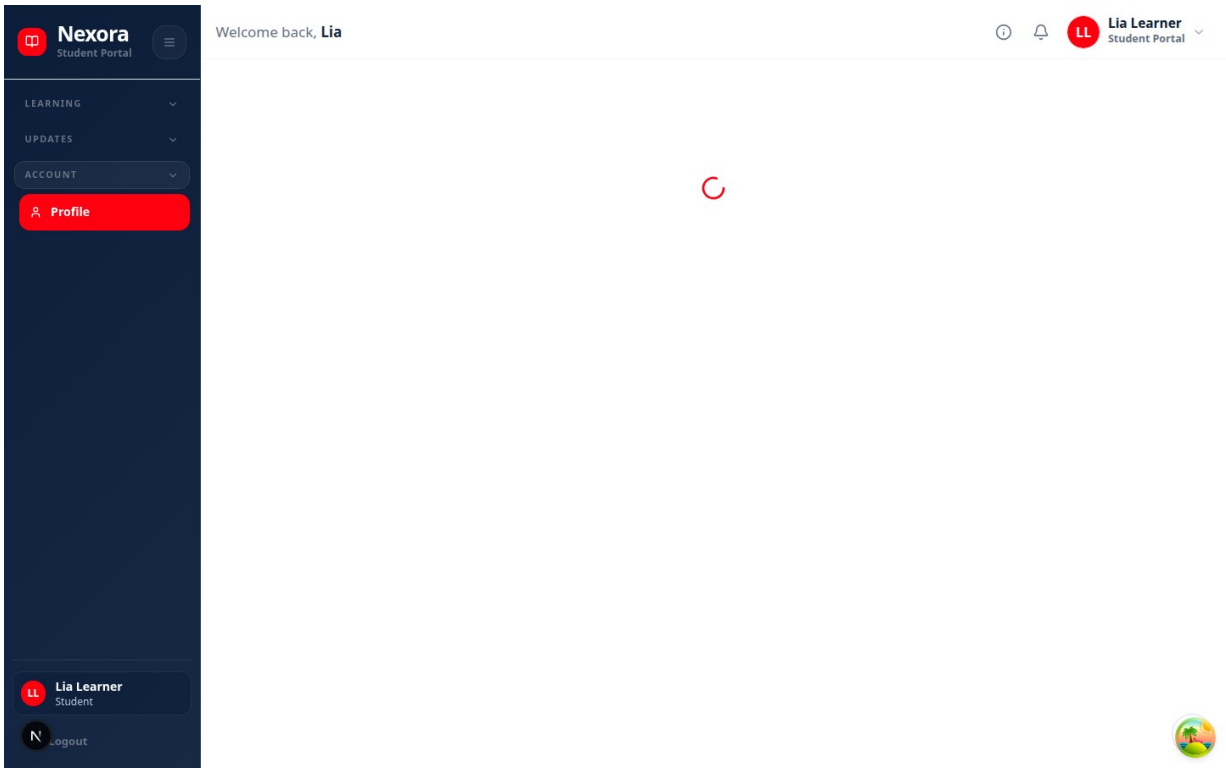

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/performance/page.tsx · evidence 211483f0

## Profile

**Role and path:** Learner · /dashboard/student/profile

**Purpose:** Profile rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Profile from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

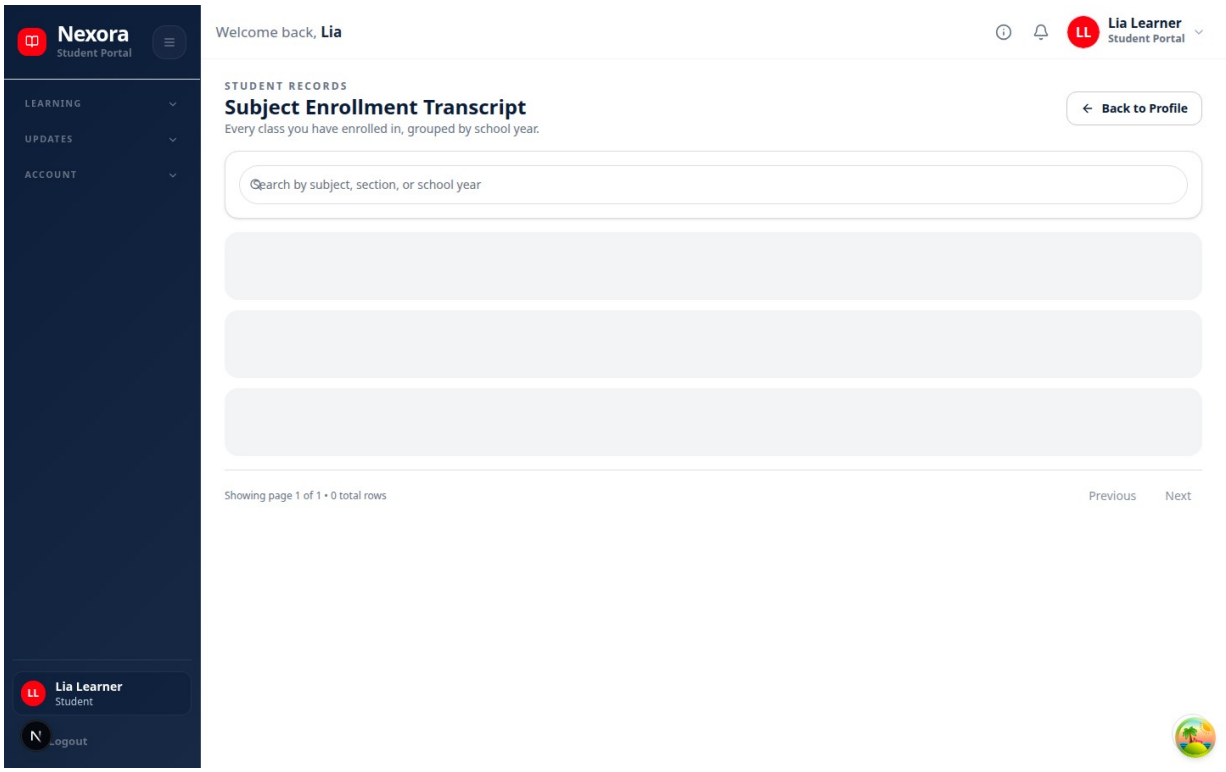

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/profile/page.tsx · evidence 211483f0

## Transcript

**Role and path:** Learner · /dashboard/student/transcript

**Purpose:** Transcript rendered from the locked application snapshot

### Do this

1. Sign in with an active student account.
2. Open Transcript from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/student/transcript/page.tsx · evidence 211483f0

## Sections

**Role and path:** Teacher · /dashboard/teacher/sections

**Purpose:** Sections rendered from the locked application snapshot

### Do this

1. Sign in with an active teacher account.
2. Open Sections from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

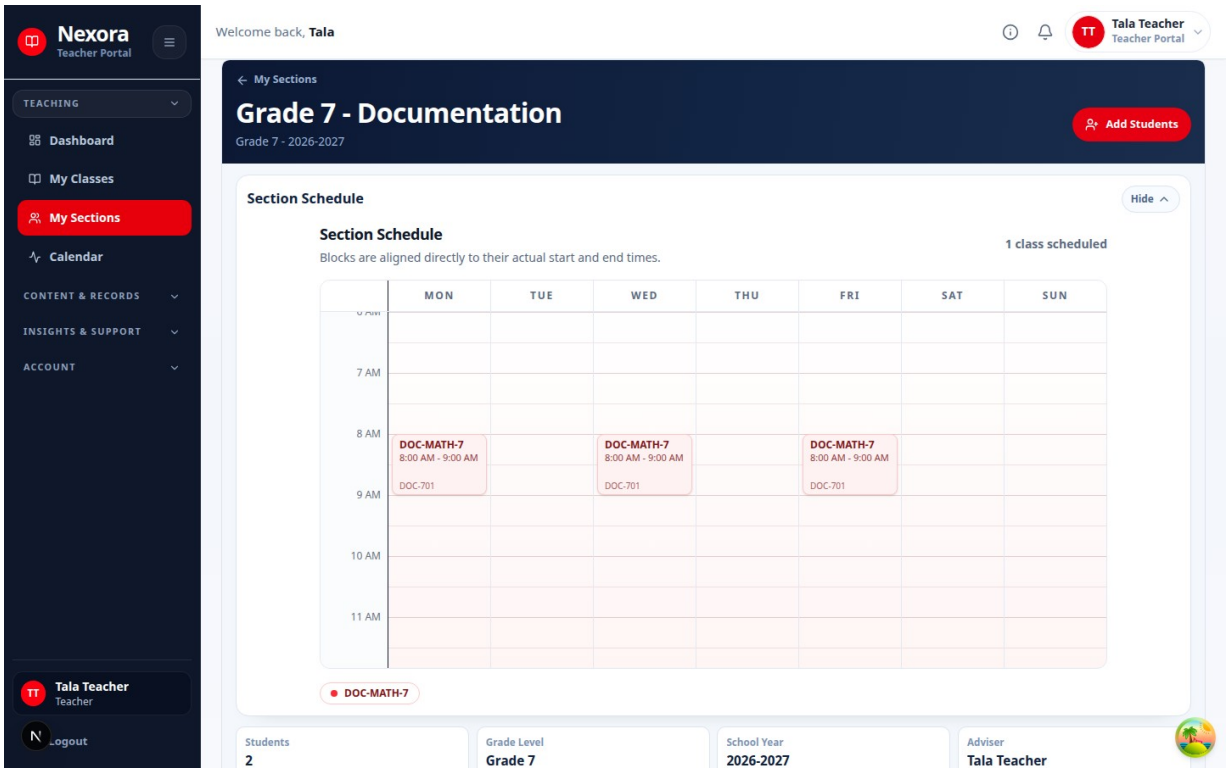

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/teacher/sections/page.tsx · evidence 211483f0

## Roster

**Role and path:** Teacher · /dashboard/teacher/sections/[id]/roster

**Purpose:** Roster rendered from the locked application snapshot

## Do this

1. Sign in with an active teacher account.
2. Open Roster from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

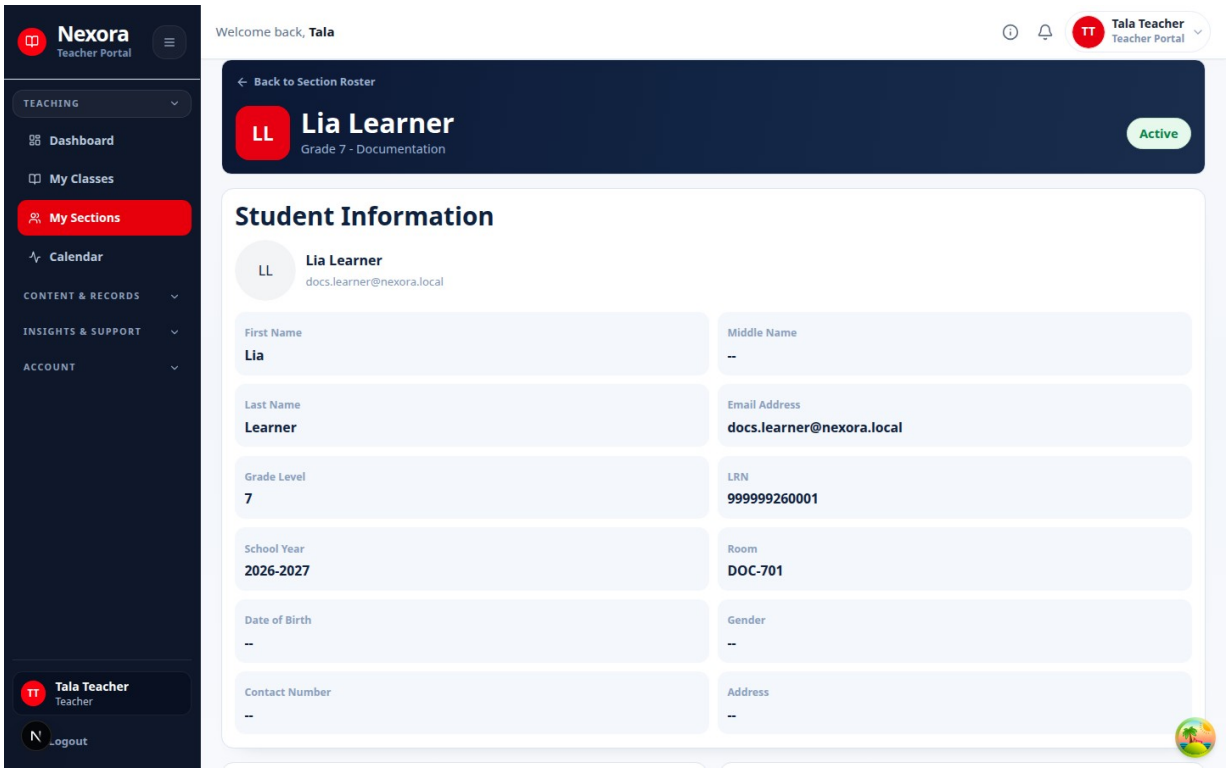

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/teacher/sections/[id]/roster/page.tsx · evidence 211483f0

## Students - selected item

**Role and path:** Teacher · /dashboard/teacher/sections/[id]/students/[studentId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active teacher account.
2. Open Students - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

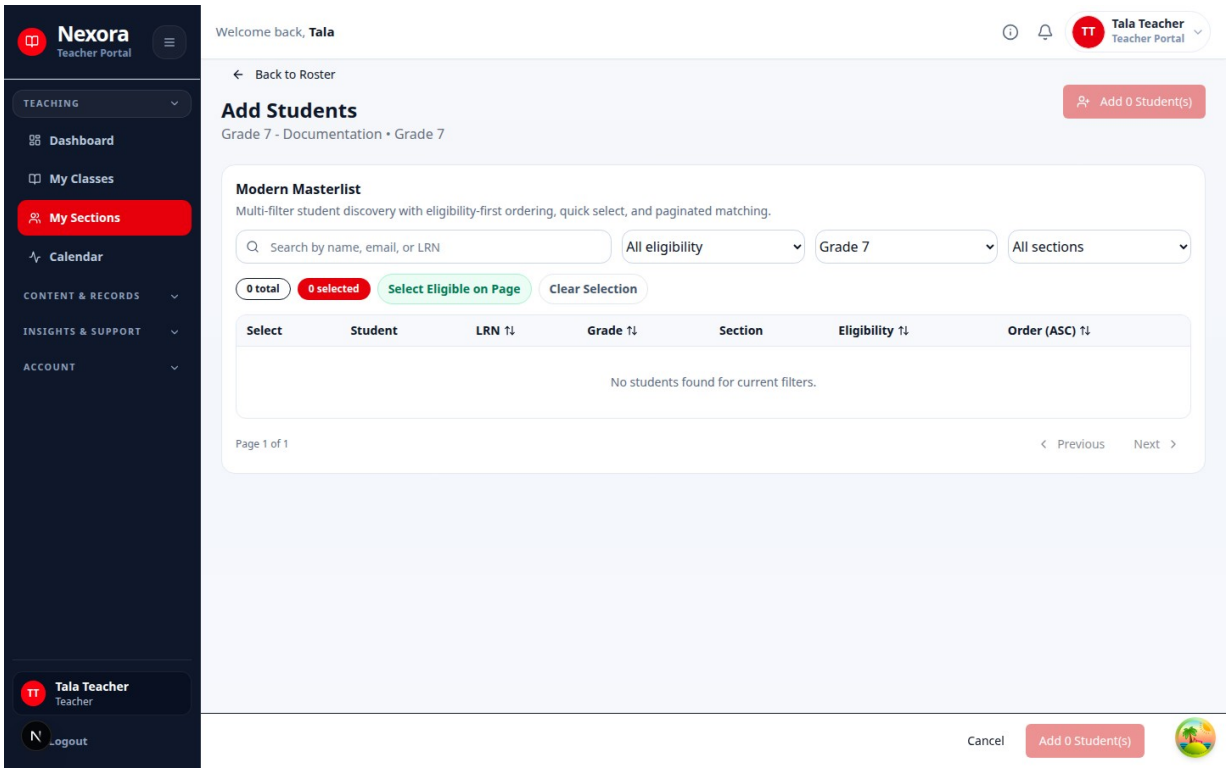

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/teacher/sections/[id]/students/[studentId]/page.tsx · evidence 211483f0

## Add

**Role and path:** Teacher · /dashboard/teacher/sections/[id]/students/add

**Purpose:** Add rendered from the locked application snapshot

## Do this

1. Sign in with an active teacher account.
2. Open Add from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/teacher/sections/[id]/students/add/page.tsx · evidence 211483f0

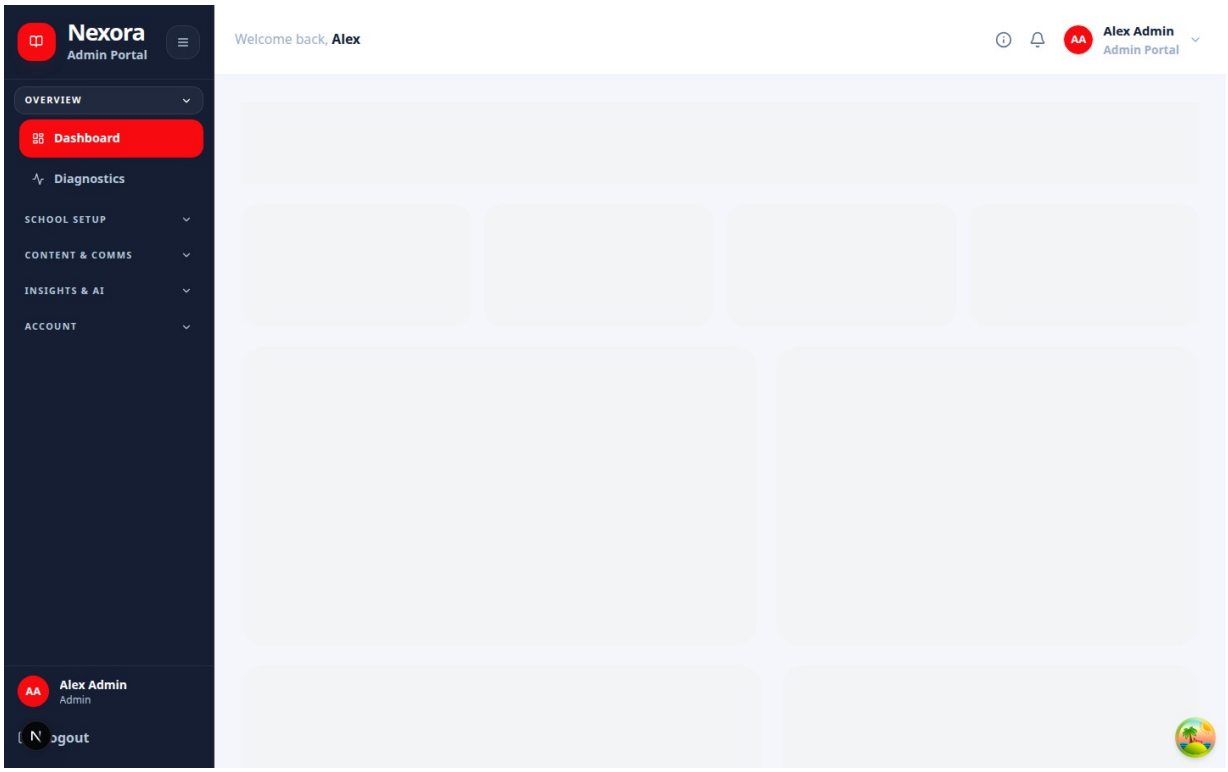

**Administrator web screens**

**Admin workflows**

## Admin

**Role and path:** Administrator · /dashboard/admin

**Purpose:** Admin rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Admin from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

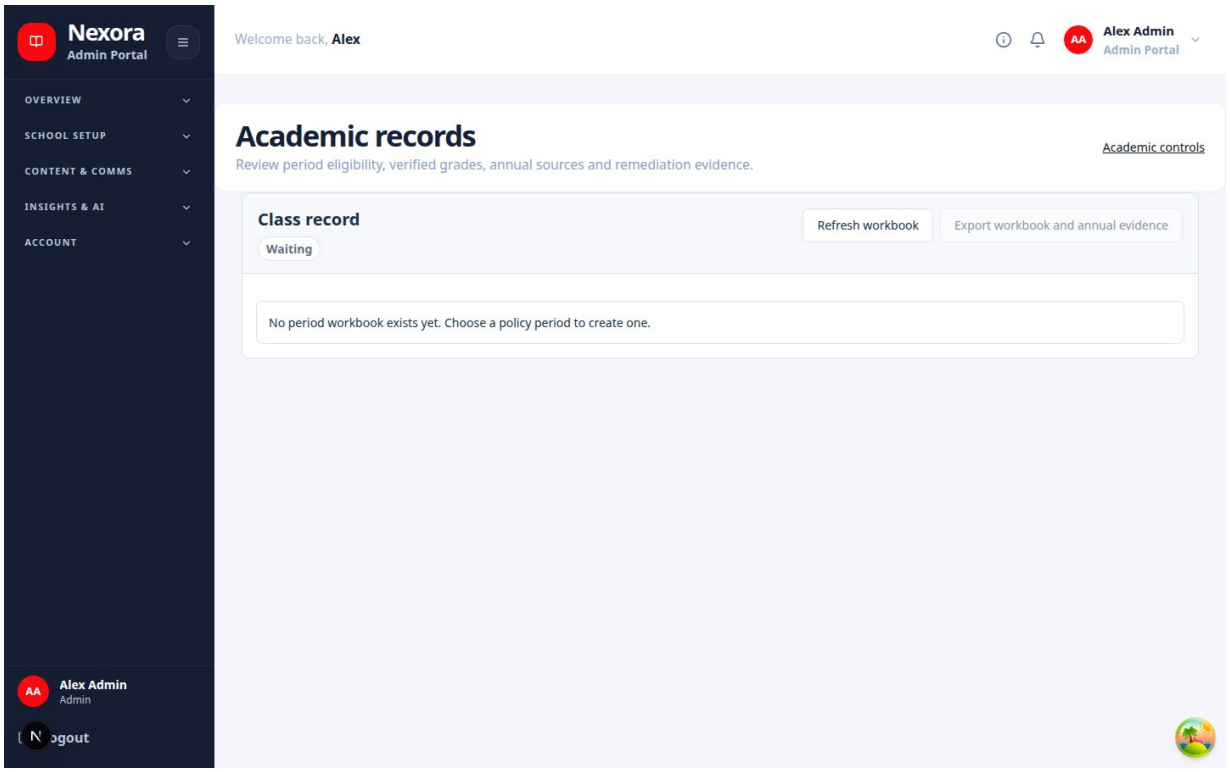

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/page.tsx · evidence 211483f0

## Academic Records - selected item

**Role and path:** Administrator · /dashboard/admin/academic-records/[classId]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Academic Records - selected item from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

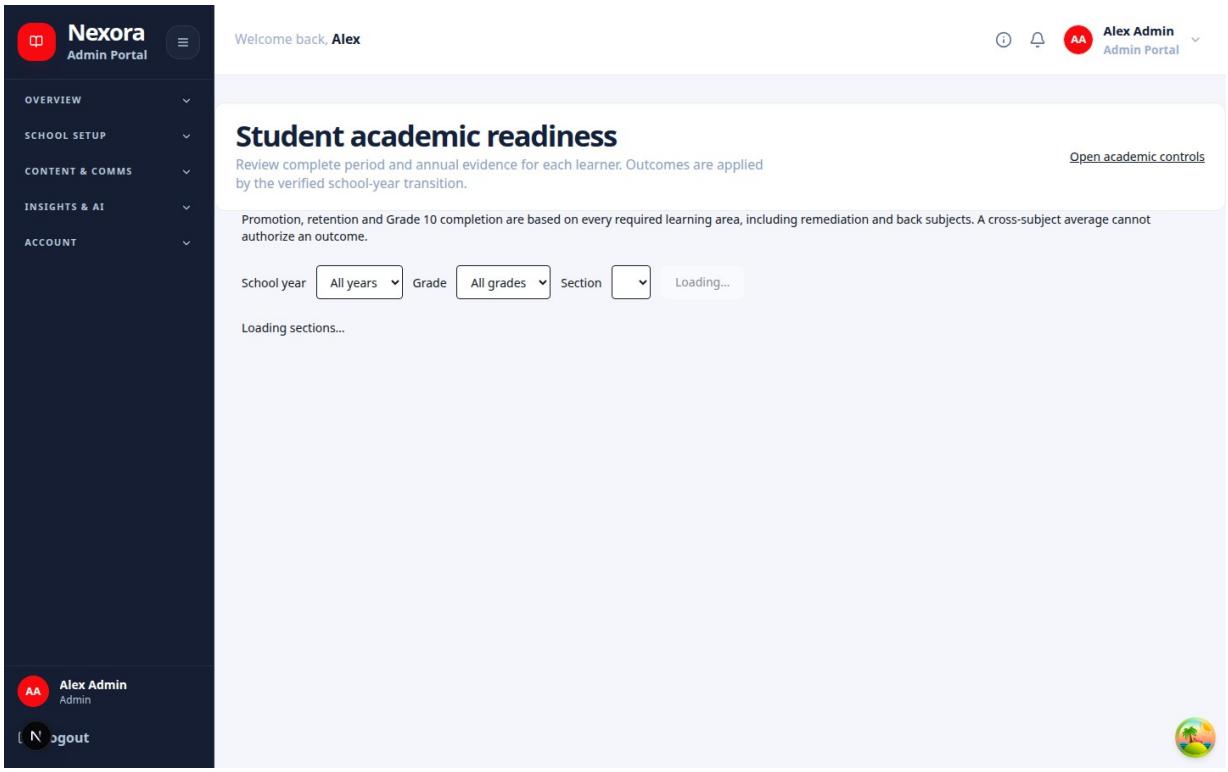

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/academic-records/[classId]/page.tsx · evidence 211483f0

## Access Students

**Role and path:** Administrator · /dashboard/admin/access-students

**Purpose:** Access Students rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Access Students from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

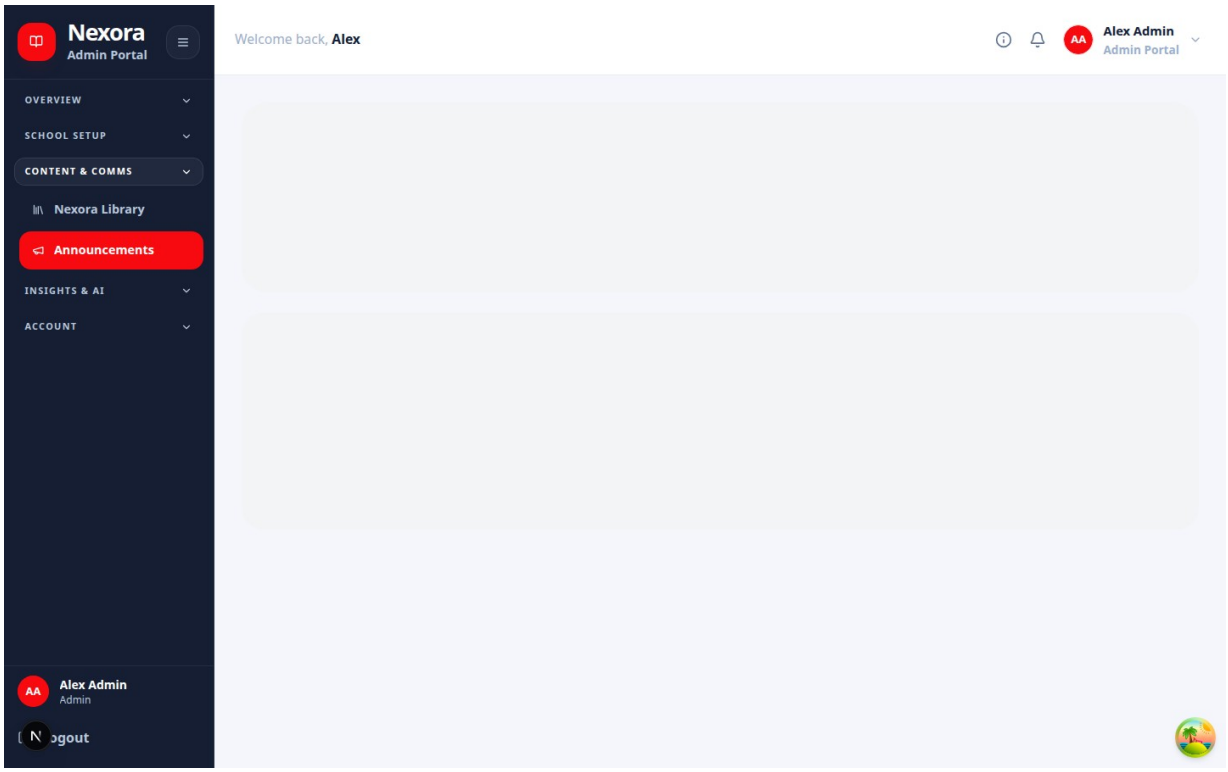

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/access-students/page.tsx · evidence 211483f0

## Announcements

**Role and path:** Administrator · /dashboard/admin/announcements

**Purpose:** Announcements rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Announcements from the visible navigation or its parent workspace.
3. Choose the relevant date or audience, open the item, and verify its schedule or publication state.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

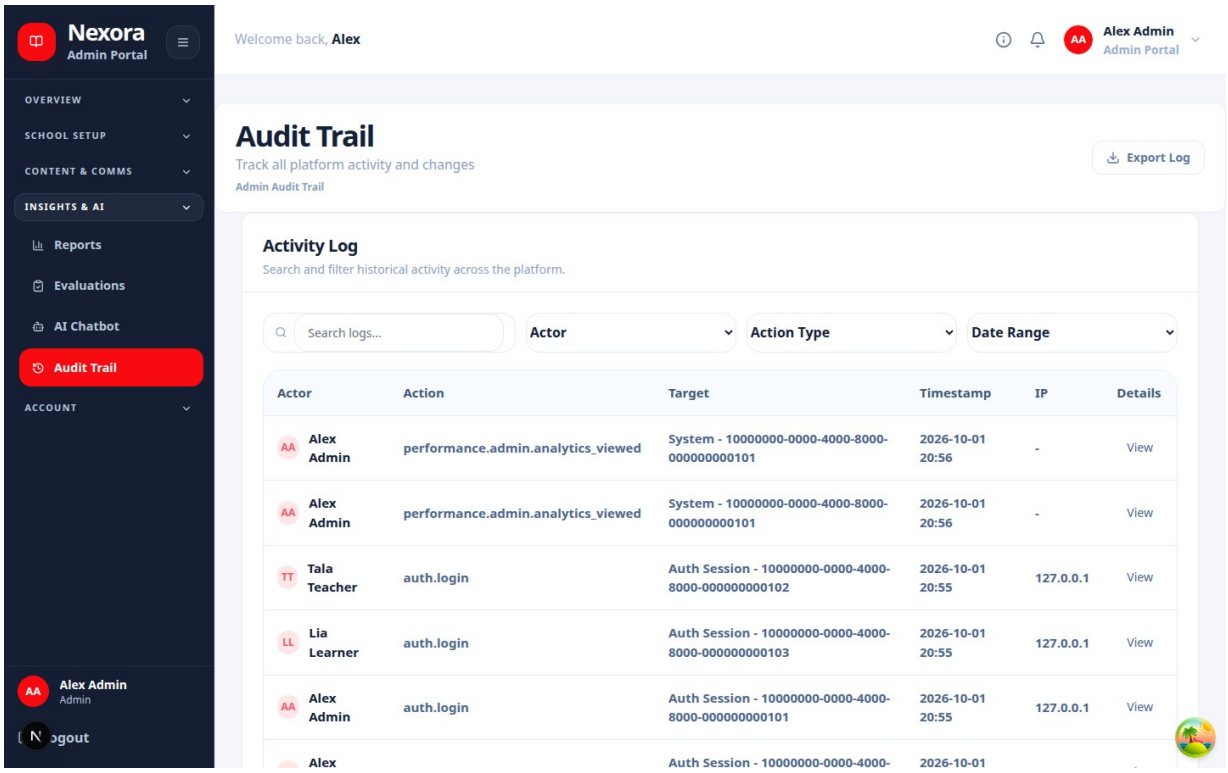

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/announcements/page.tsx · evidence 211483f0

## Audit

**Role and path:** Administrator · /dashboard/admin/audit

**Purpose:** Audit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Audit from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

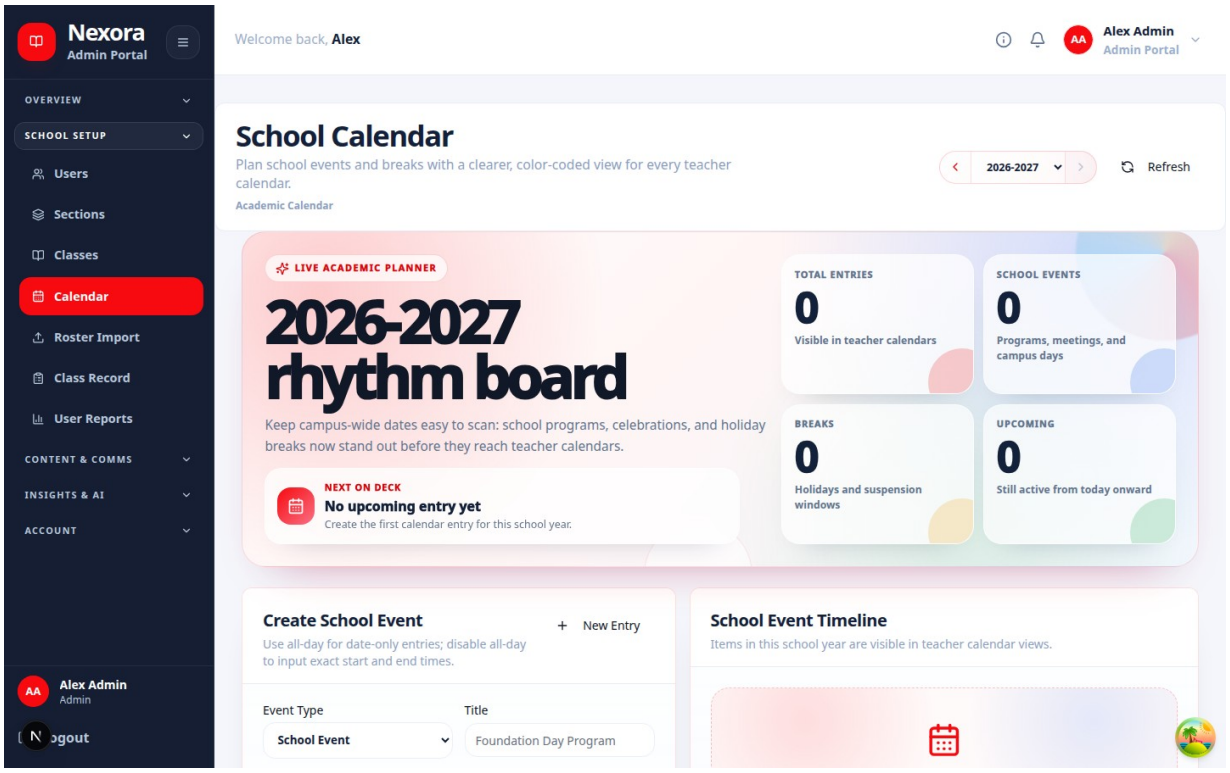

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/audit/page.tsx · evidence 211483f0

## Calendar

**Role and path:** Administrator · /dashboard/admin/calendar

**Purpose:** Calendar rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Calendar from the visible navigation or its parent workspace.
3. Choose the relevant date or audience, open the item, and verify its schedule or publication state.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

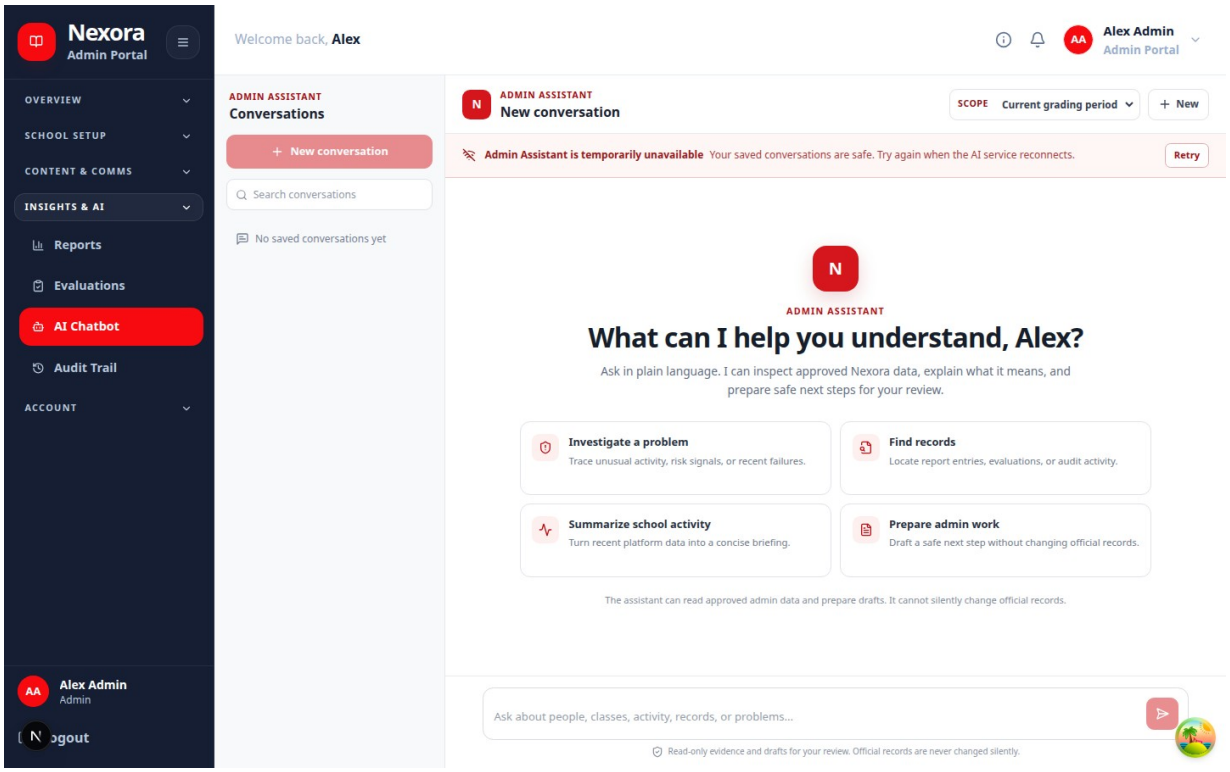

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/calendar/page.tsx · evidence 211483f0

## Chatbot

**Role and path:** Administrator · /dashboard/admin/chatbot

**Purpose:** Chatbot rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Chatbot from the visible navigation or its parent workspace.
3. Choose an approved class or source, ask one focused question, and review AI output before applying it.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

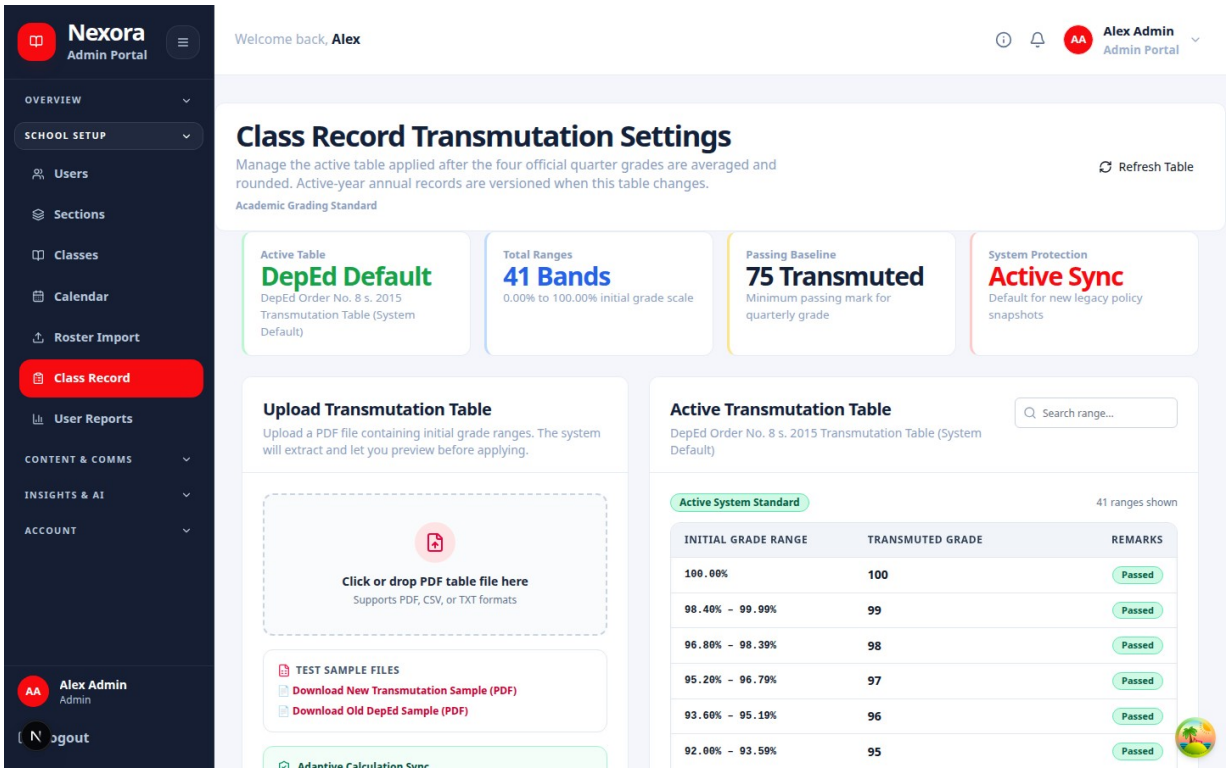

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/chatbot/page.tsx · evidence 211483f0

## Class Record

**Role and path:** Administrator · /dashboard/admin/class-record

**Purpose:** Class Record rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Class Record from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

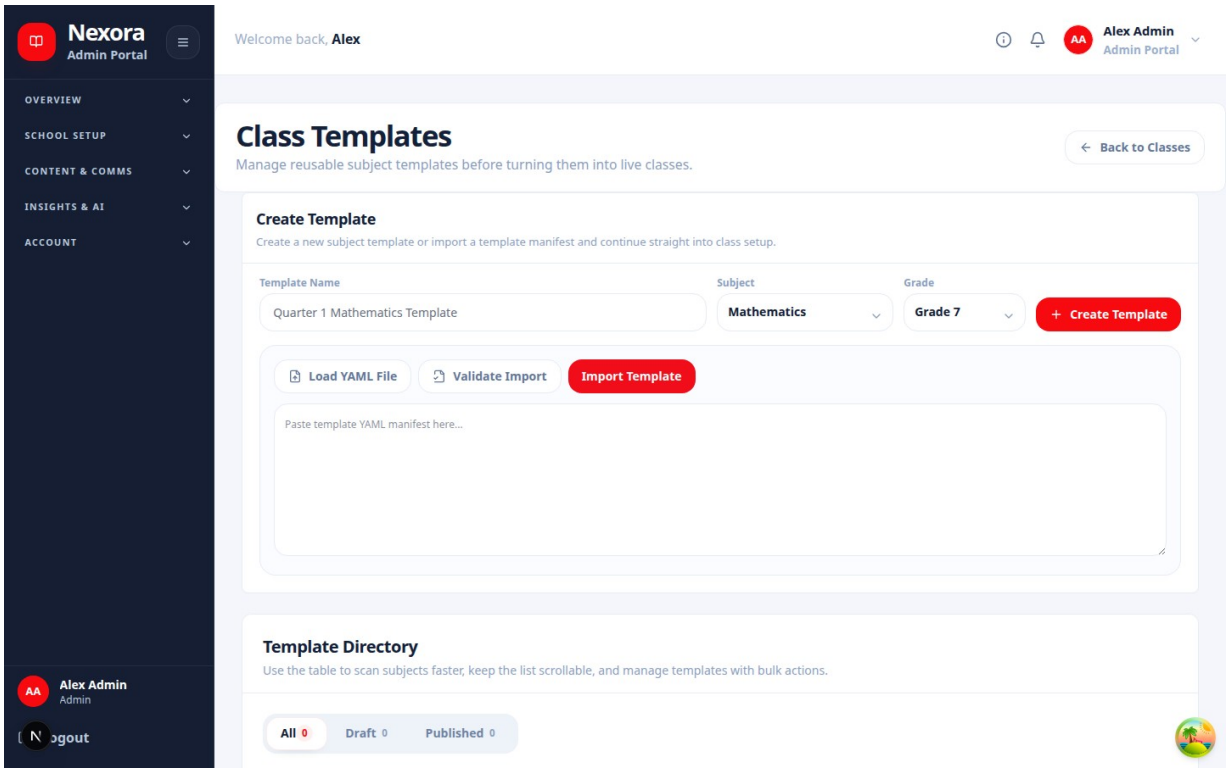

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-record/page.tsx · evidence 211483f0

## Class Templates

**Role and path:** Administrator · /dashboard/admin/class-templates

**Purpose:** Class Templates rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Class Templates from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

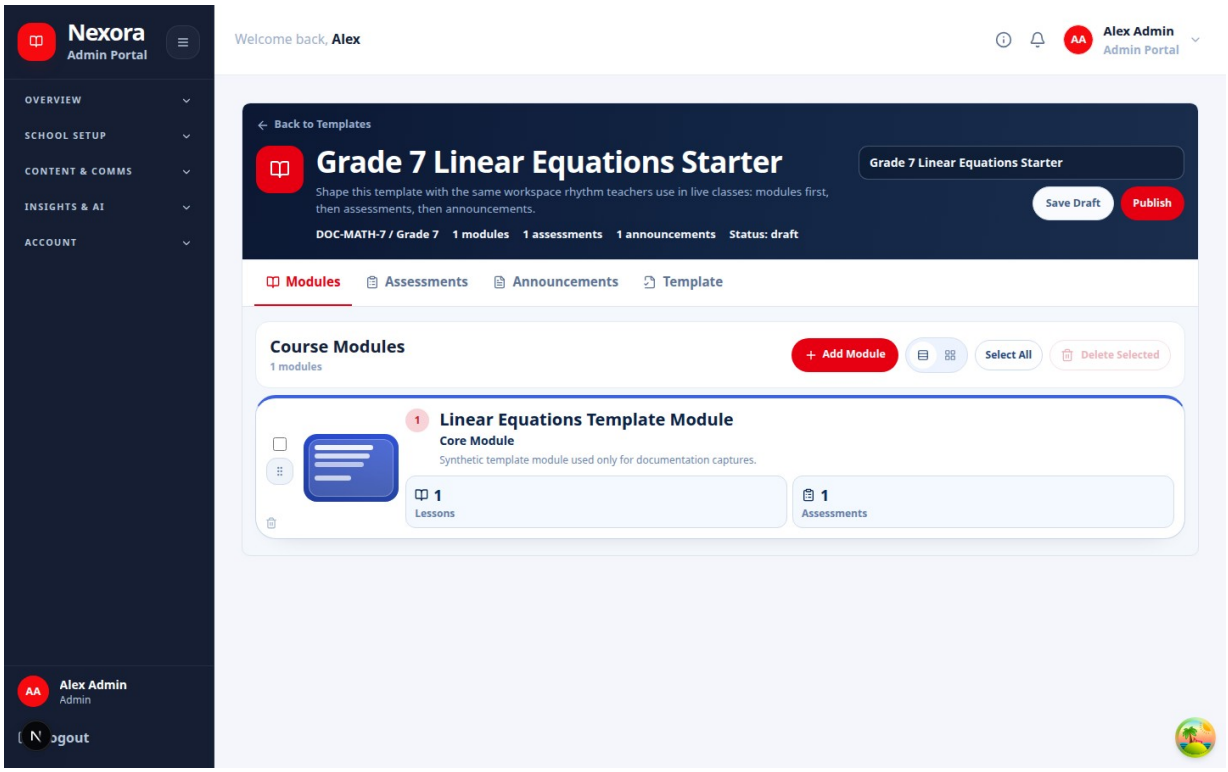

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/page.tsx · evidence 211483f0

## Class Templates - selected item

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Class Templates - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

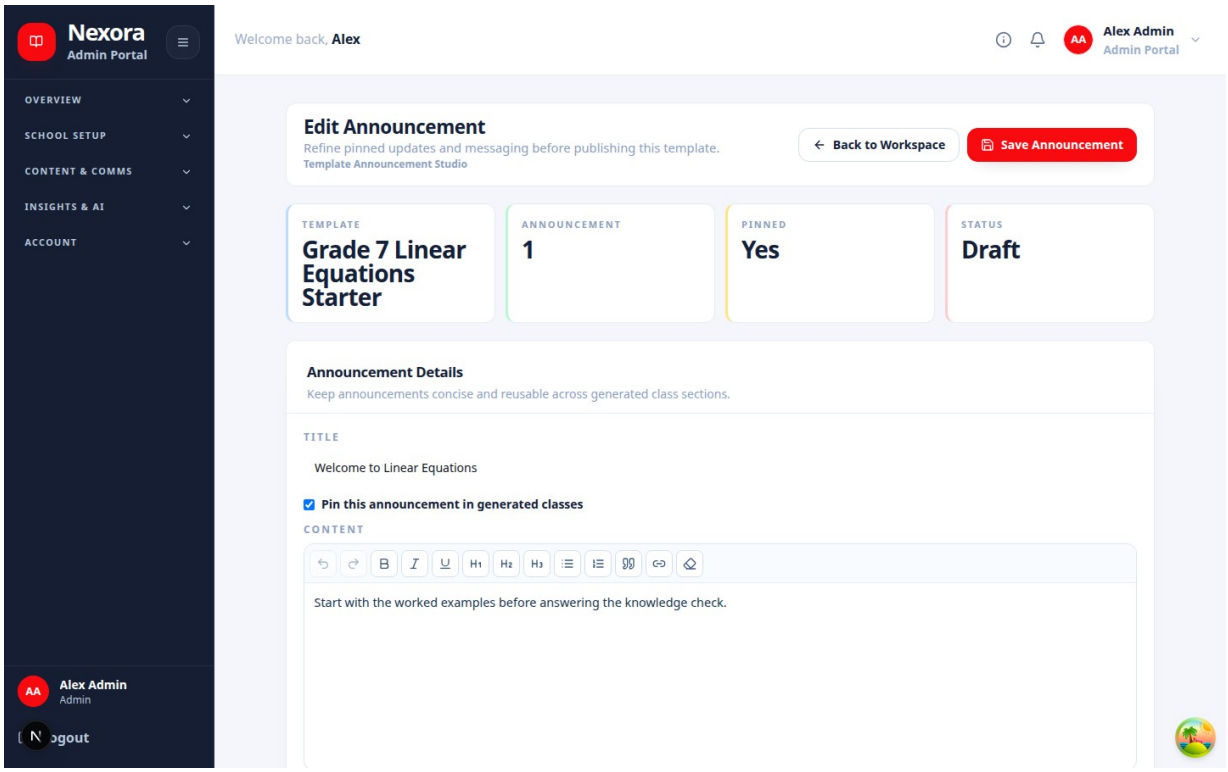

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/page.tsx · evidence 211483f0

## Edit

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]/announcements/[announcementKey]/edit

**Purpose:** Edit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Edit from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

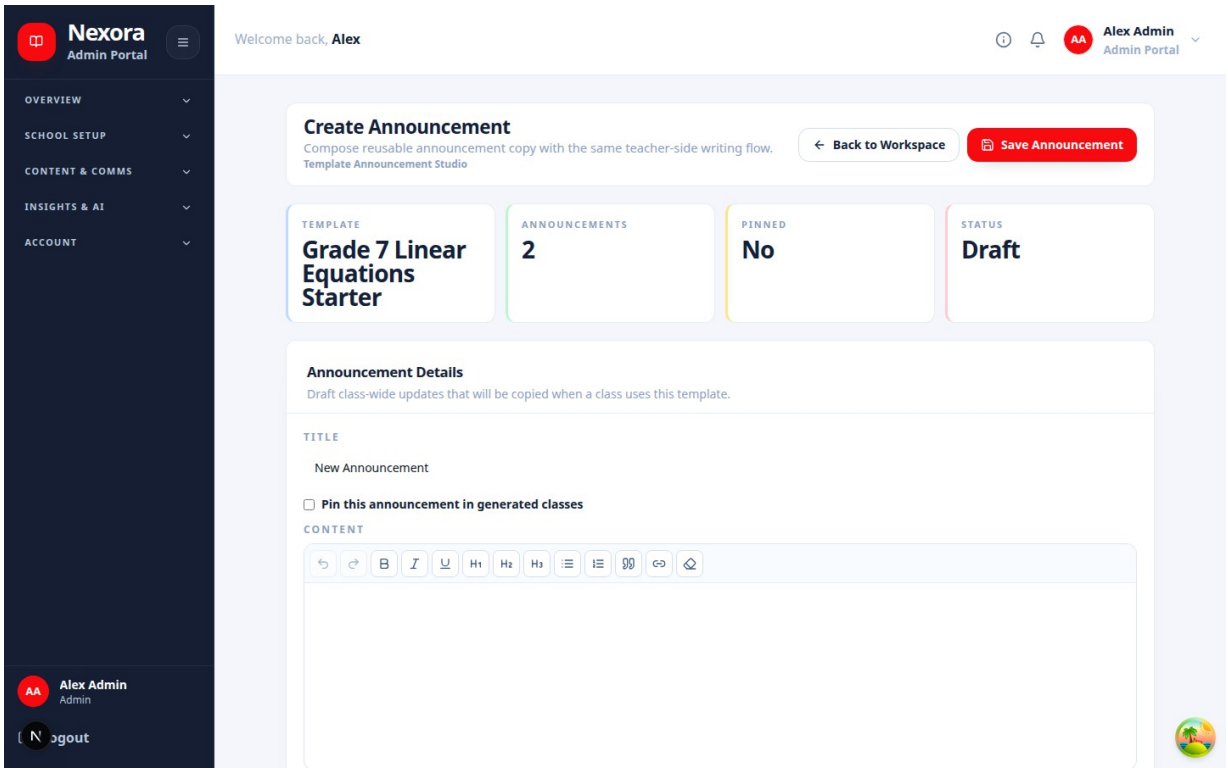

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/announcements/[announcementKey]/edit/page.tsx · evidence 211483f0

## New

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]/announcements/new

**Purpose:** New rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open New from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

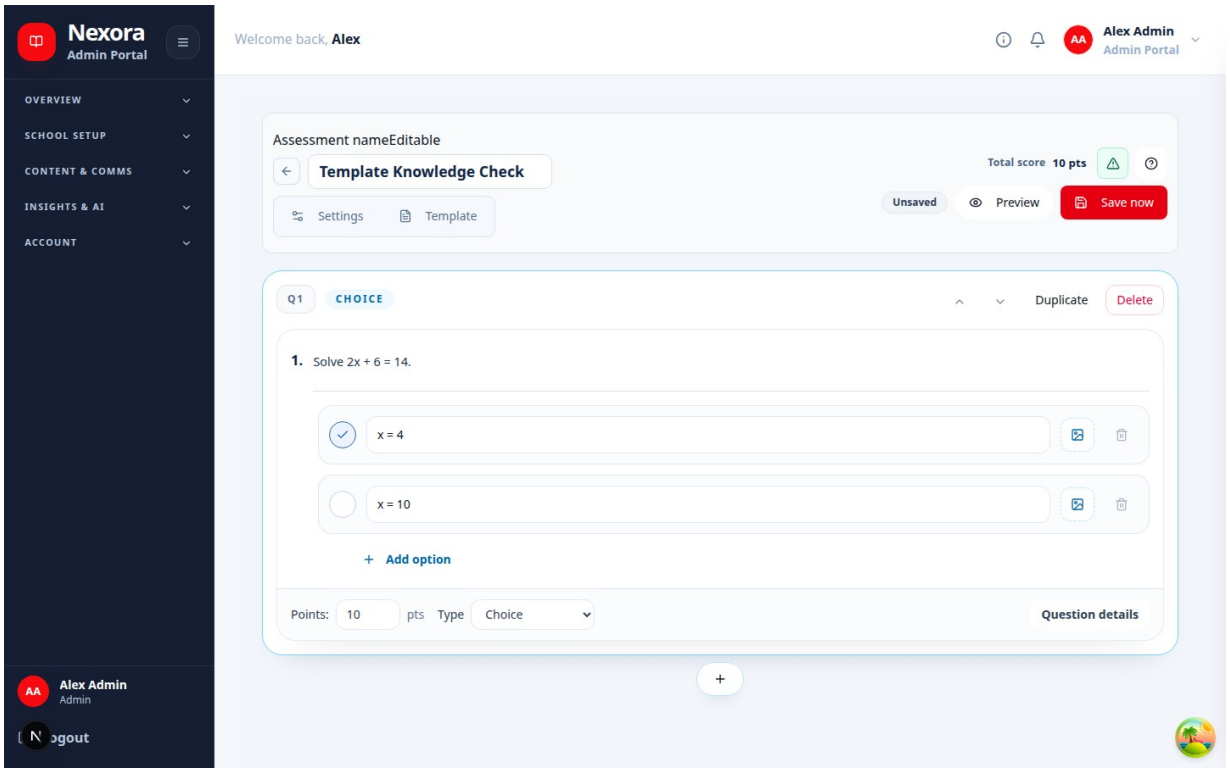

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/announcements/new/page.tsx · evidence 211483f0

## Edit

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]/assessments/[assessmentKey]/edit

**Purpose:** Edit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Edit from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

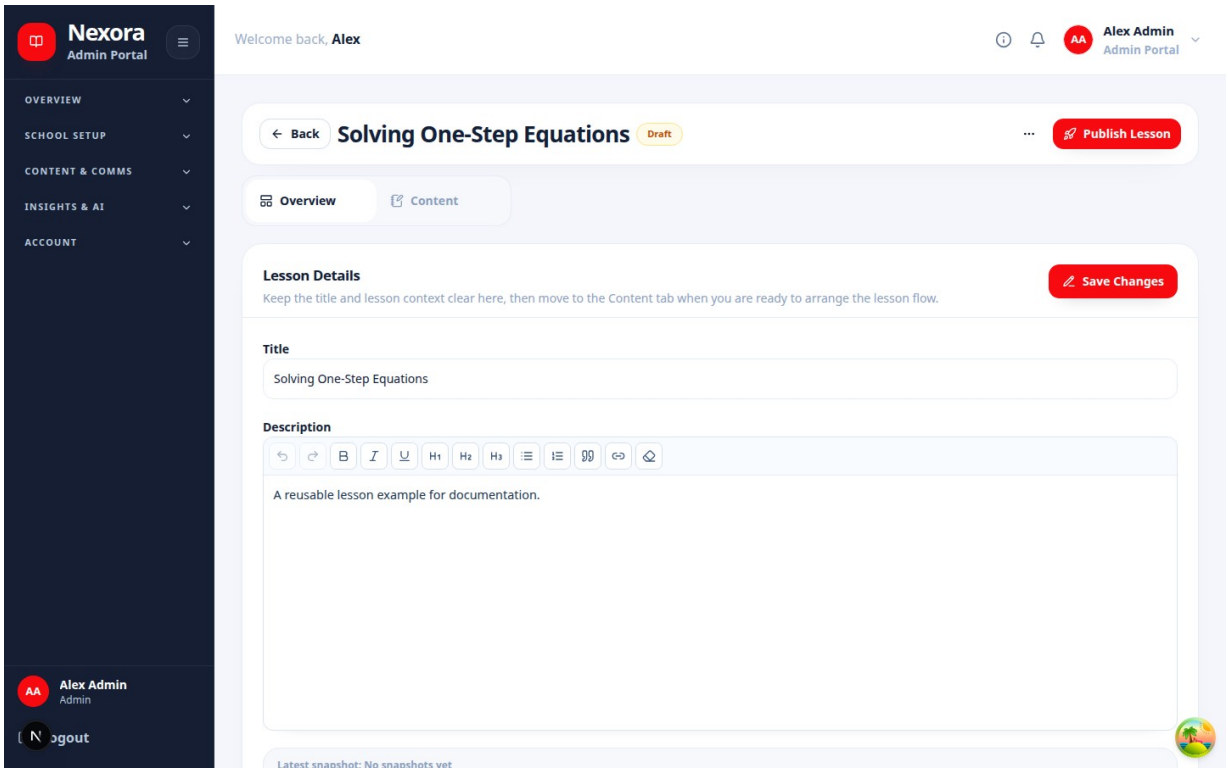

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/assessments/[assessmentKey]/edit/page.tsx · evidence 211483f0

## Edit

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]/lessons/[lessonKey]/edit

**Purpose:** Edit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Edit from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

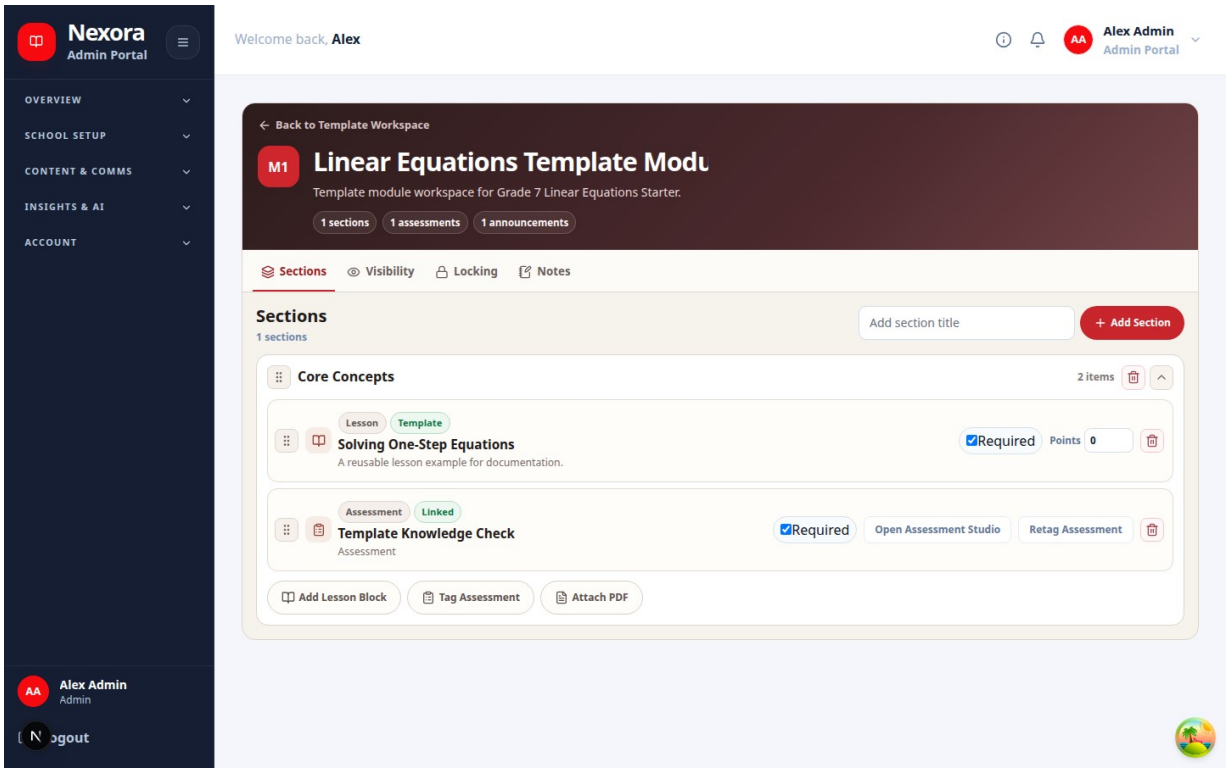

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/lessons/[lessonKey]/edit/page.tsx · evidence 211483f0

## Modules - selected item

**Role and path:** Administrator · /dashboard/admin/class-templates/[id]/modules/[moduleKey]

**Purpose:** Record detail rendered from the locked application snapshot

## Do this

1. Sign in with an active admin account.
2. Open Modules - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

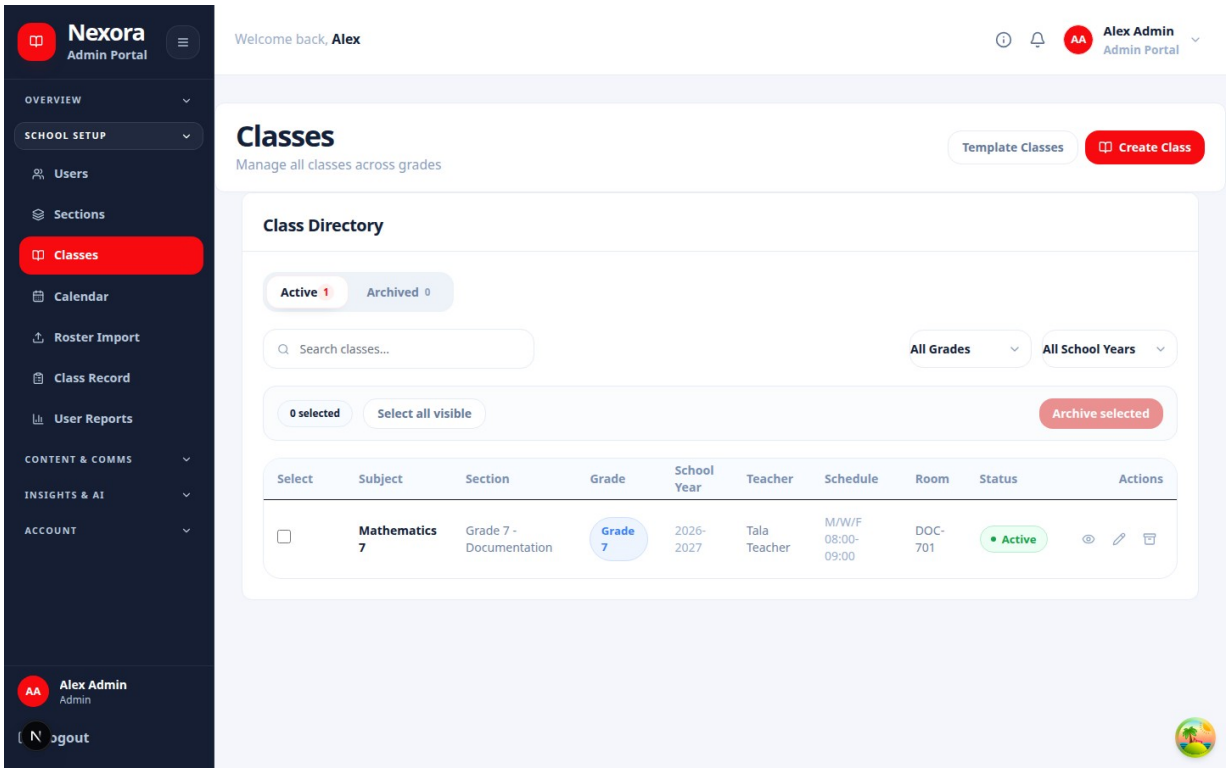

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/class-templates/[id]/modules/[moduleKey]/page.tsx · evidence 211483f0

## Classes

**Role and path:** Administrator · /dashboard/admin/classes

**Purpose:** Classes rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Classes from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

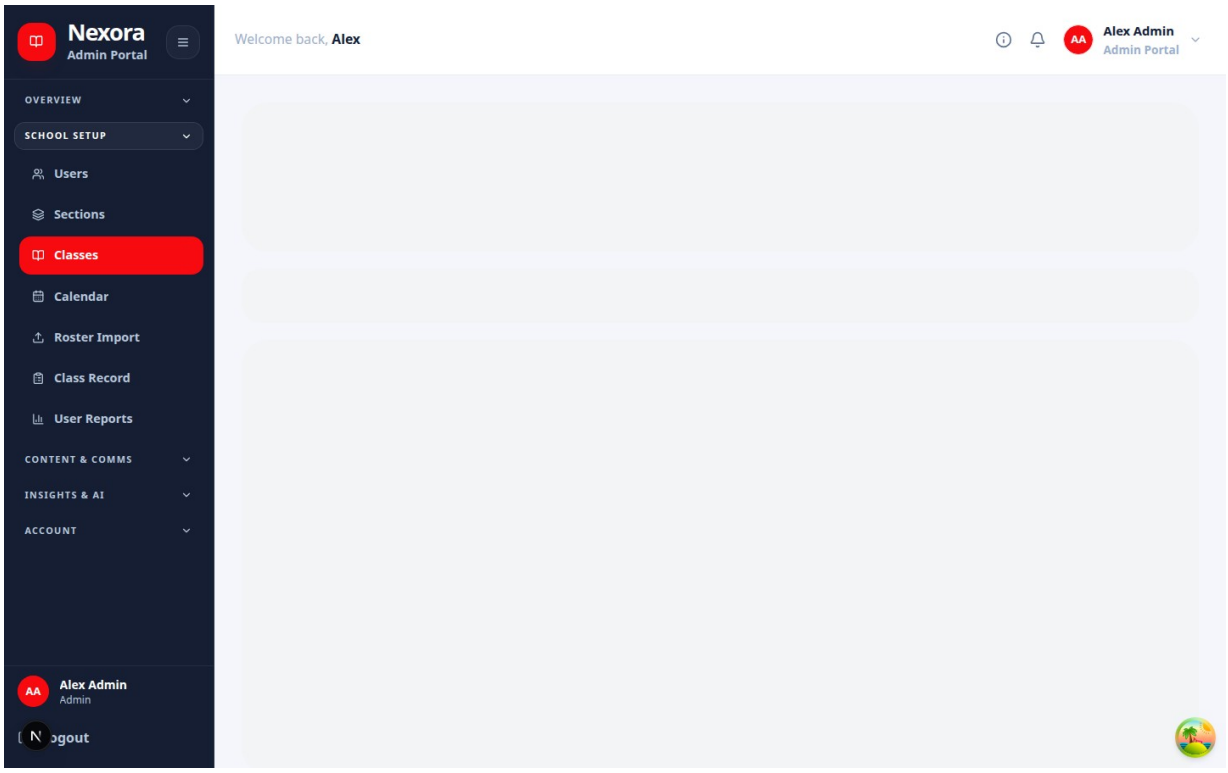

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/classes/page.tsx · evidence 211483f0

## Classes - selected item

**Role and path:** Administrator · /dashboard/admin/classes/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Classes - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

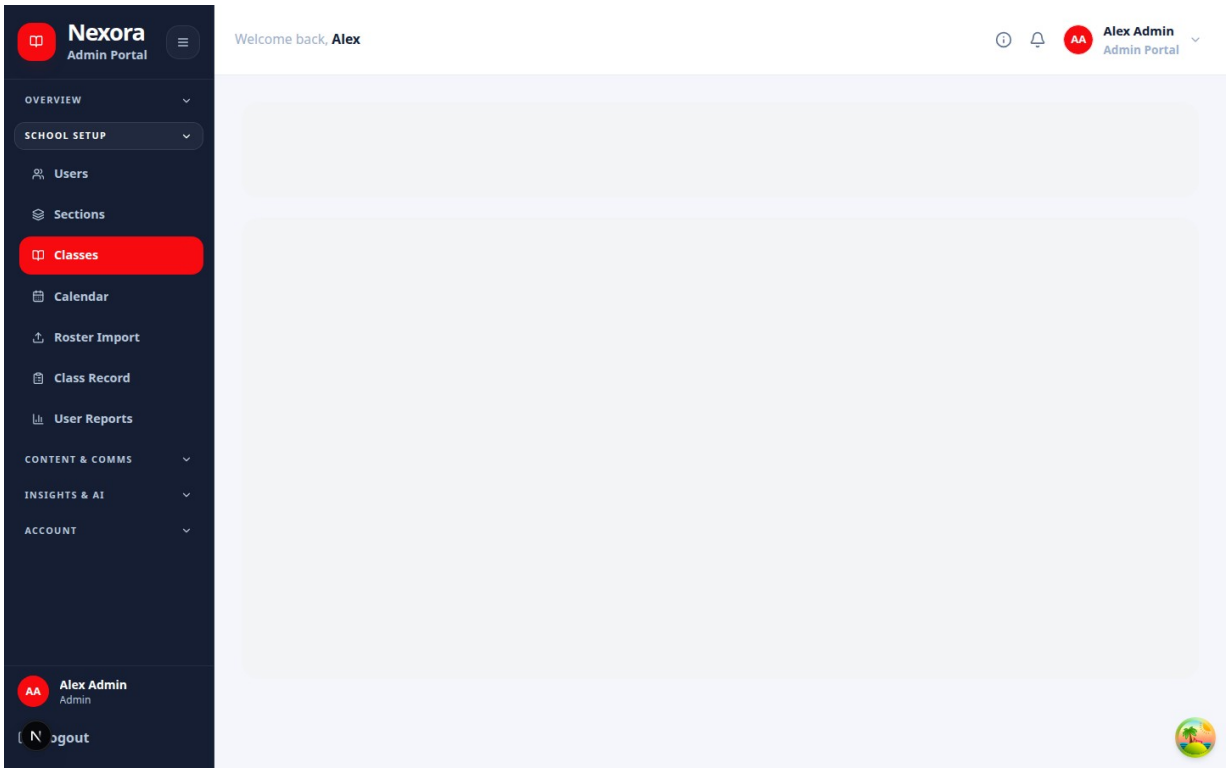

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/classes/[id]/page.tsx · evidence 211483f0

## Edit

**Role and path:** Administrator · /dashboard/admin/classes/[id]/edit

**Purpose:** Edit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Edit from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

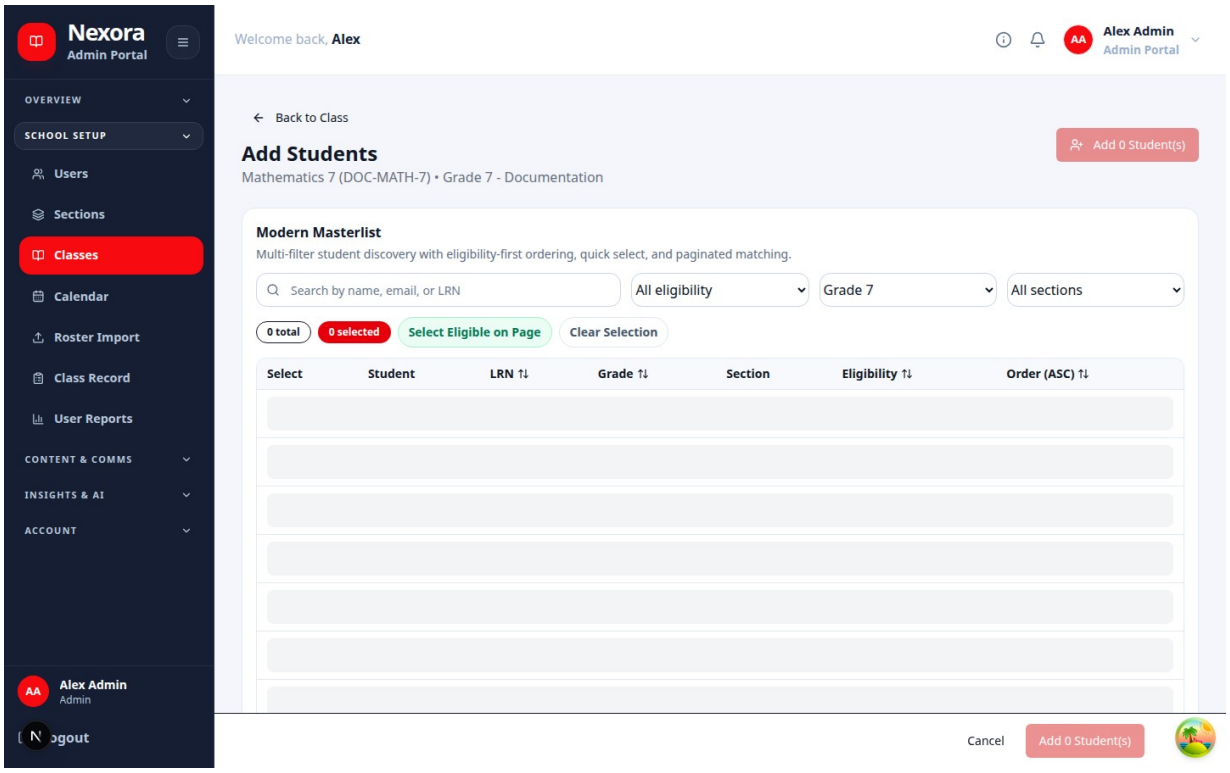

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/classes/[id]/edit/page.tsx · evidence 211483f0

## Add

**Role and path:** Administrator · /dashboard/admin/classes/[id]/students/add

**Purpose:** Add rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Add from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

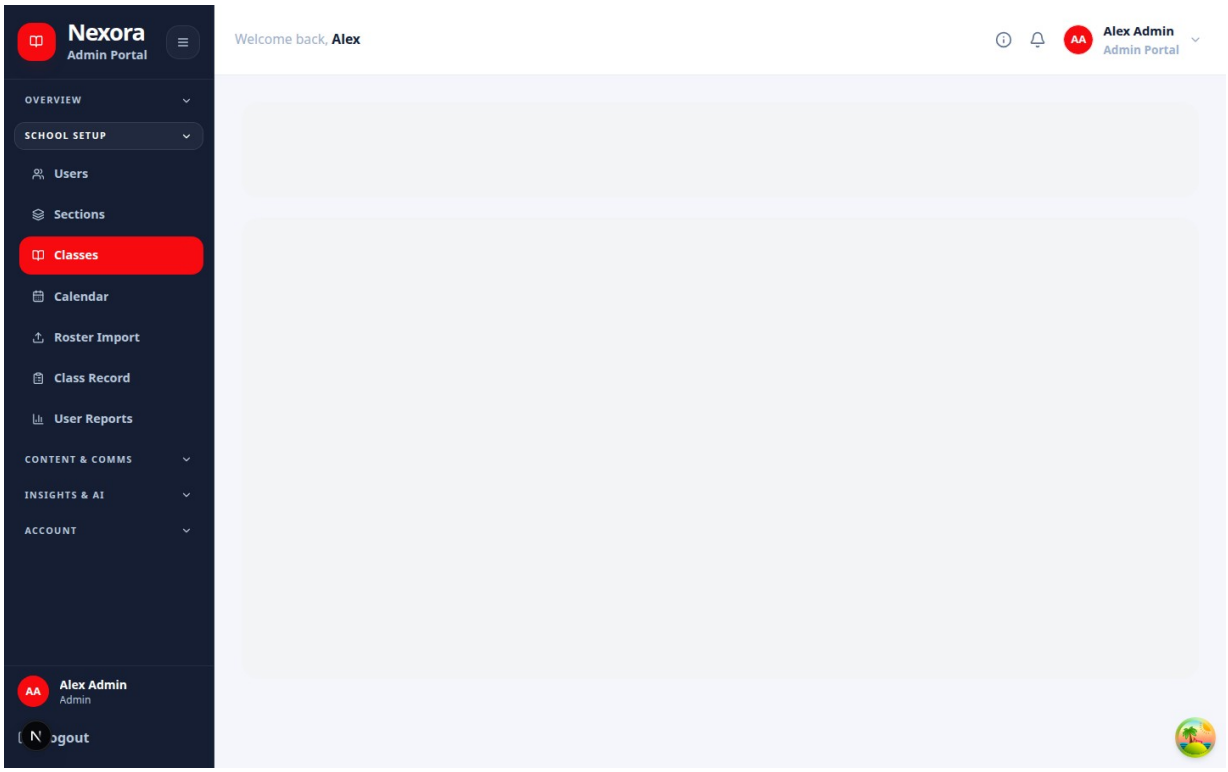

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/classes/[id]/students/add/page.tsx · evidence 211483f0

## New

**Role and path:** Administrator · /dashboard/admin/classes/new

**Purpose:** New rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open New from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

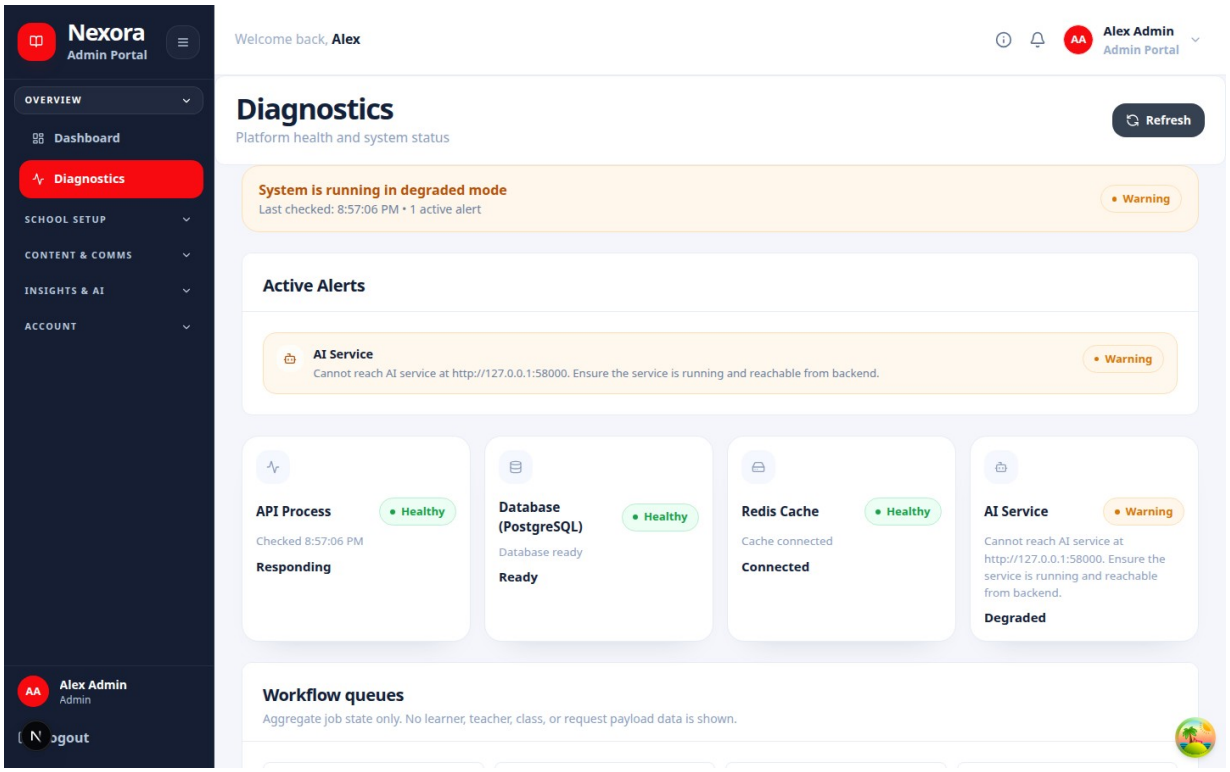

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/classes/new/page.tsx · evidence 211483f0

## Diagnostics

**Role and path:** Administrator · /dashboard/admin/diagnostics

**Purpose:** Diagnostics rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Diagnostics from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

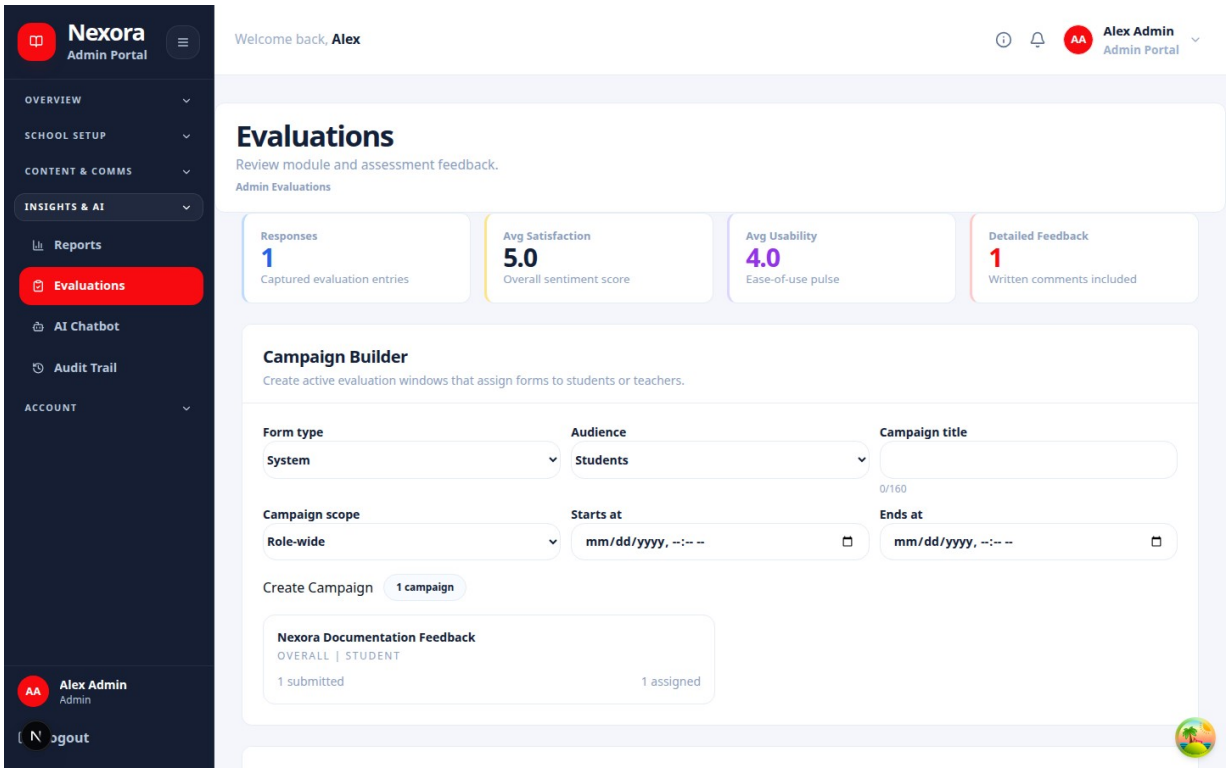

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/diagnostics/page.tsx · evidence 211483f0

## Evaluations

**Role and path:** Administrator · /dashboard/admin/evaluations

**Purpose:** Evaluations rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Evaluations from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

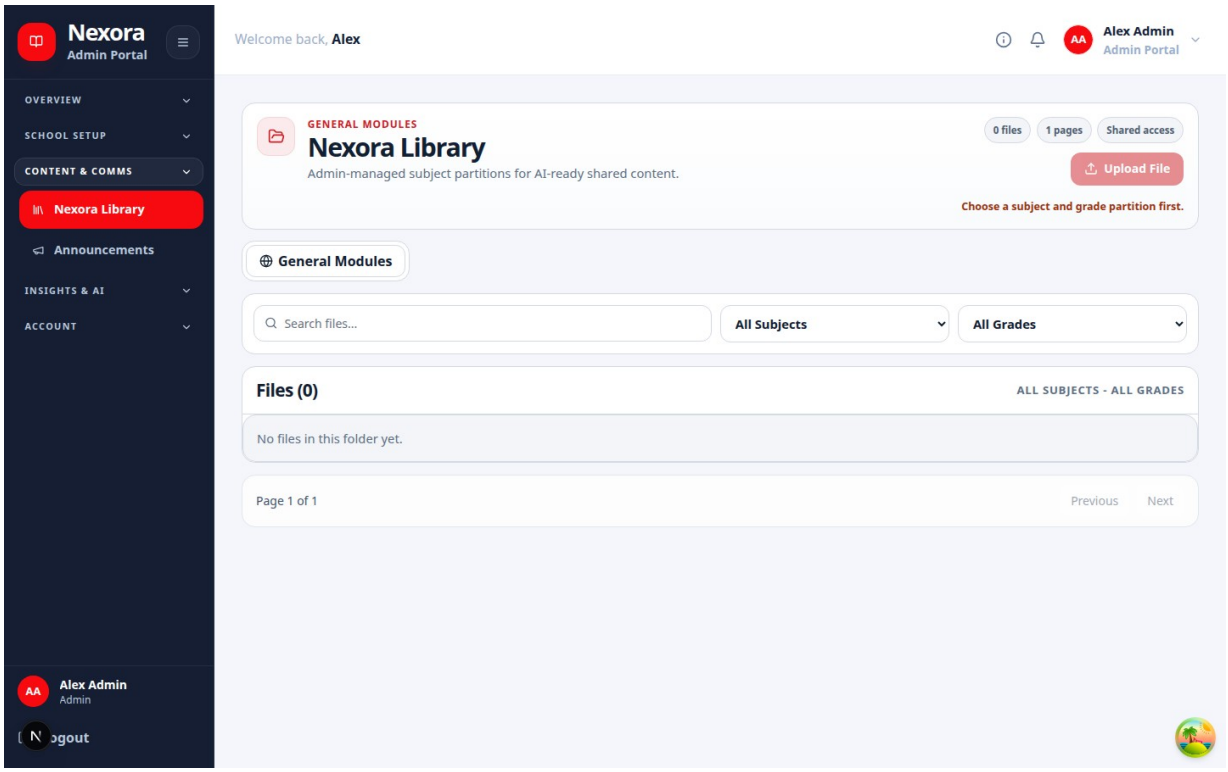

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/evaluations/page.tsx · evidence 211483f0

## Library

**Role and path:** Administrator · /dashboard/admin/library

**Purpose:** Library rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Library from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

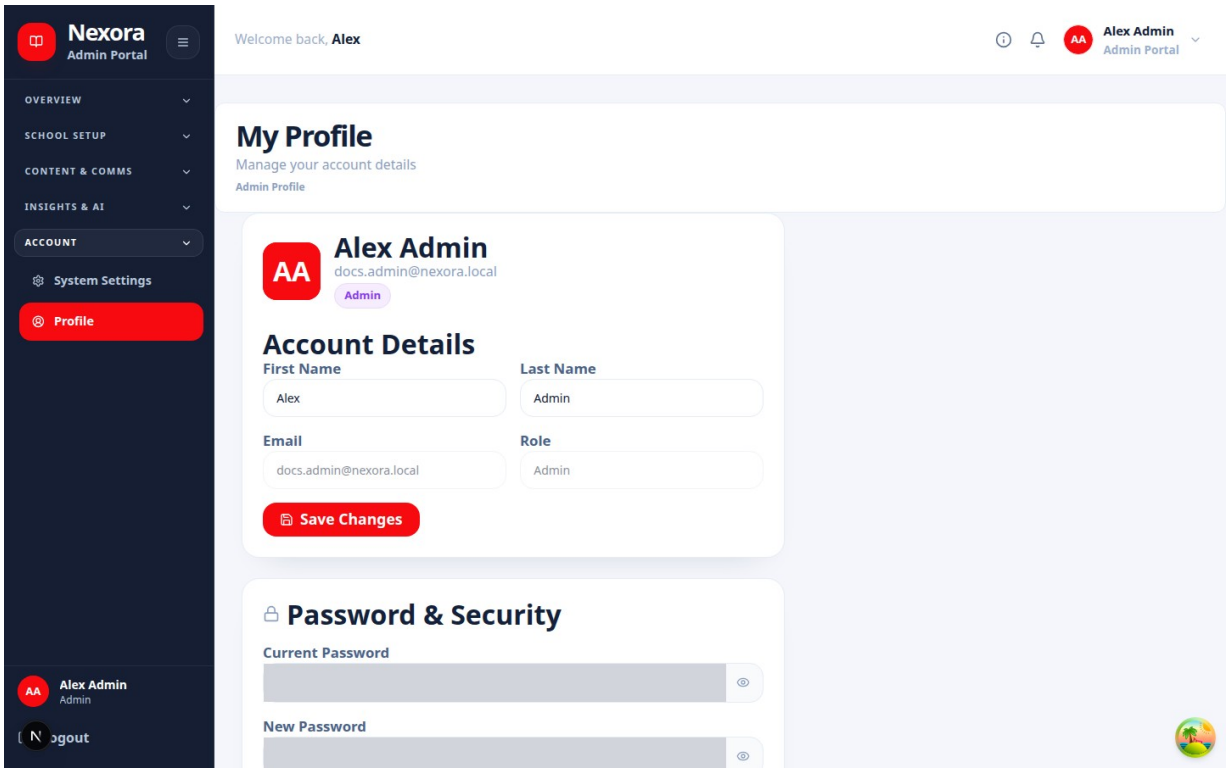

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/library/page.tsx · evidence 211483f0

## Profile

**Role and path:** Administrator · /dashboard/admin/profile

**Purpose:** Profile rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Profile from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

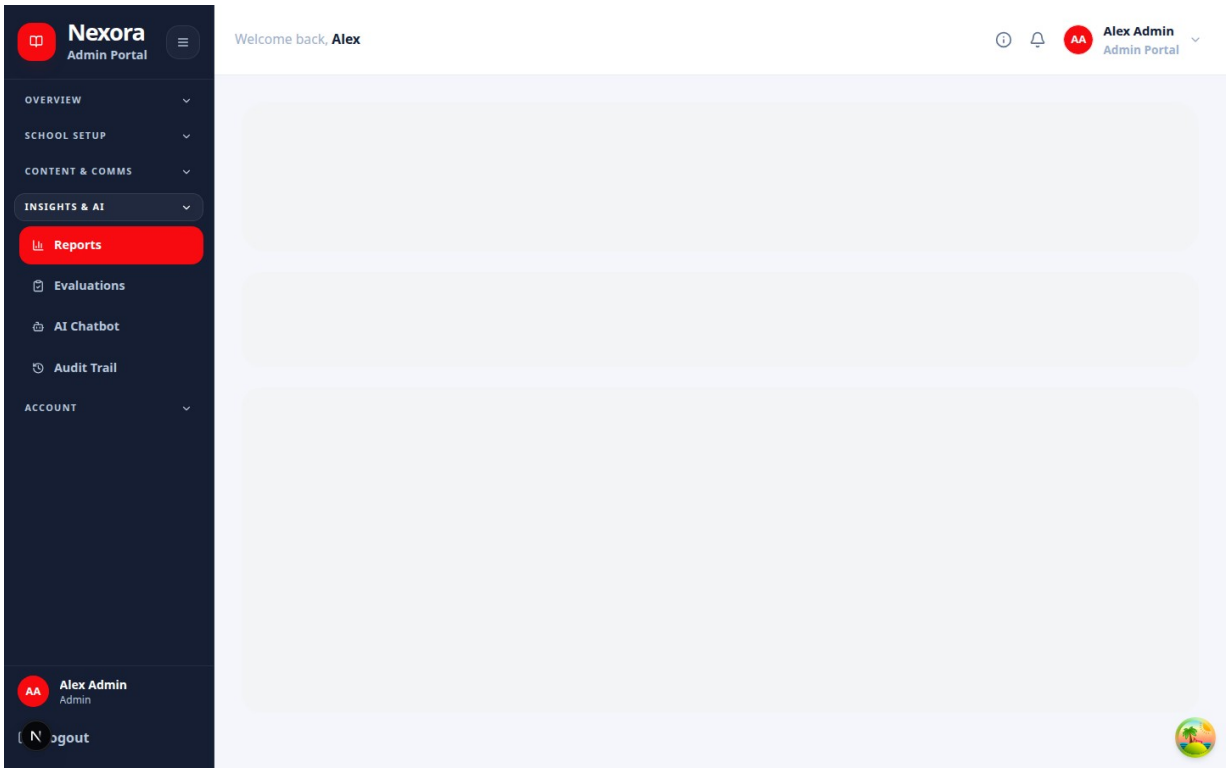

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/profile/page.tsx · evidence 211483f0

## Reports

**Role and path:** Administrator · /dashboard/admin/reports

**Purpose:** Reports rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Reports from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

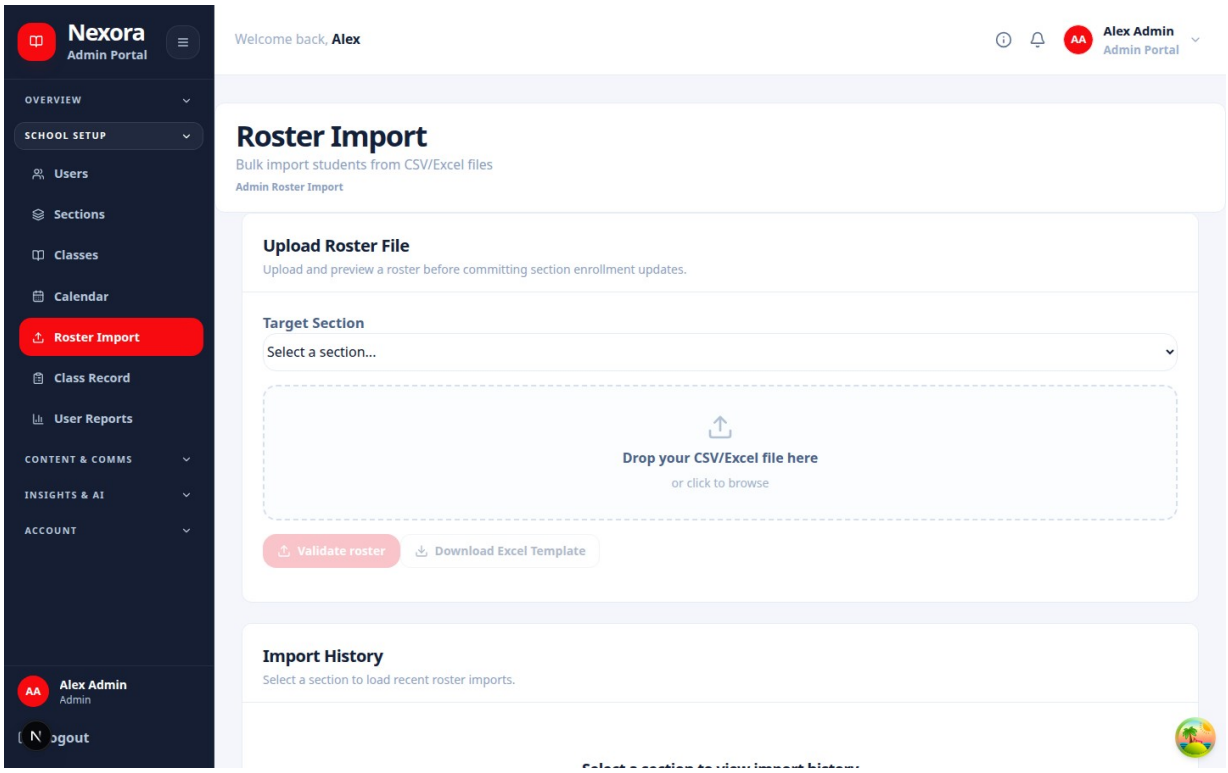

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/reports/page.tsx · evidence 211483f0

## Roster Import

**Role and path:** Administrator · /dashboard/admin/roster-import

**Purpose:** Roster Import rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Roster Import from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

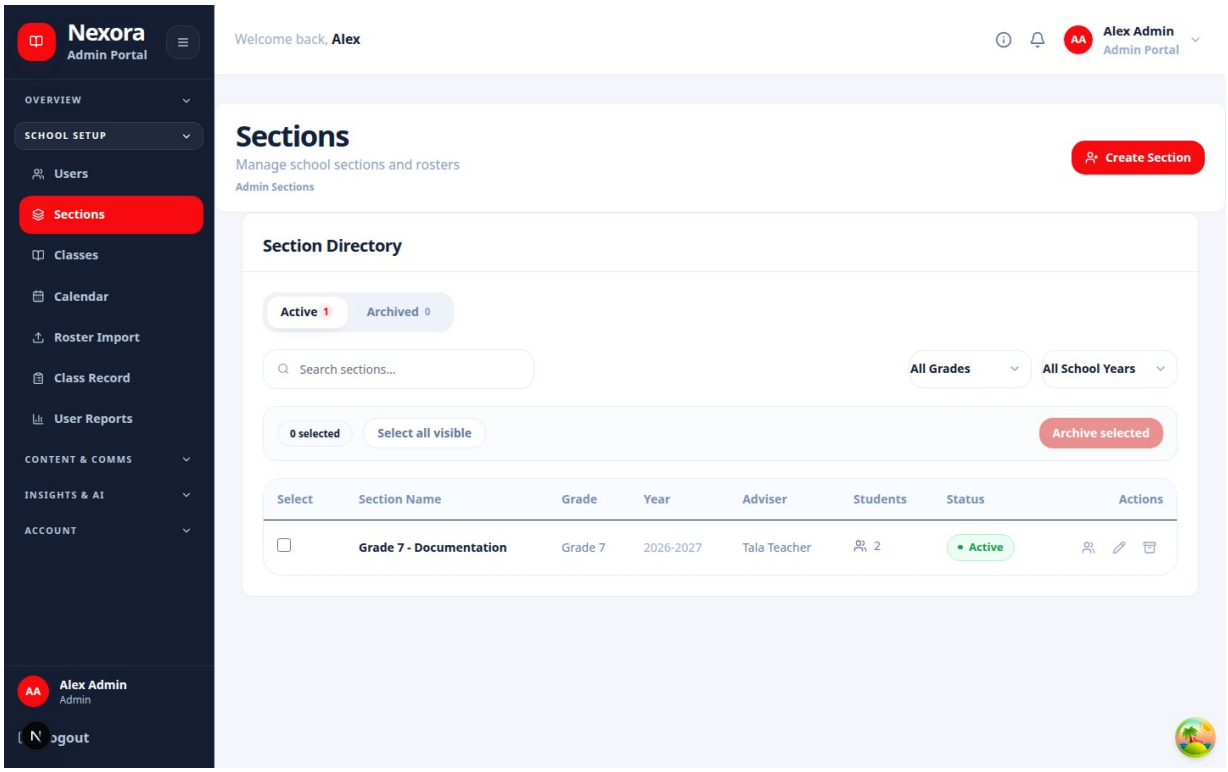

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/roster-import/page.tsx · evidence 211483f0

## Sections

**Role and path:** Administrator · /dashboard/admin/sections

**Purpose:** Sections rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Sections from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

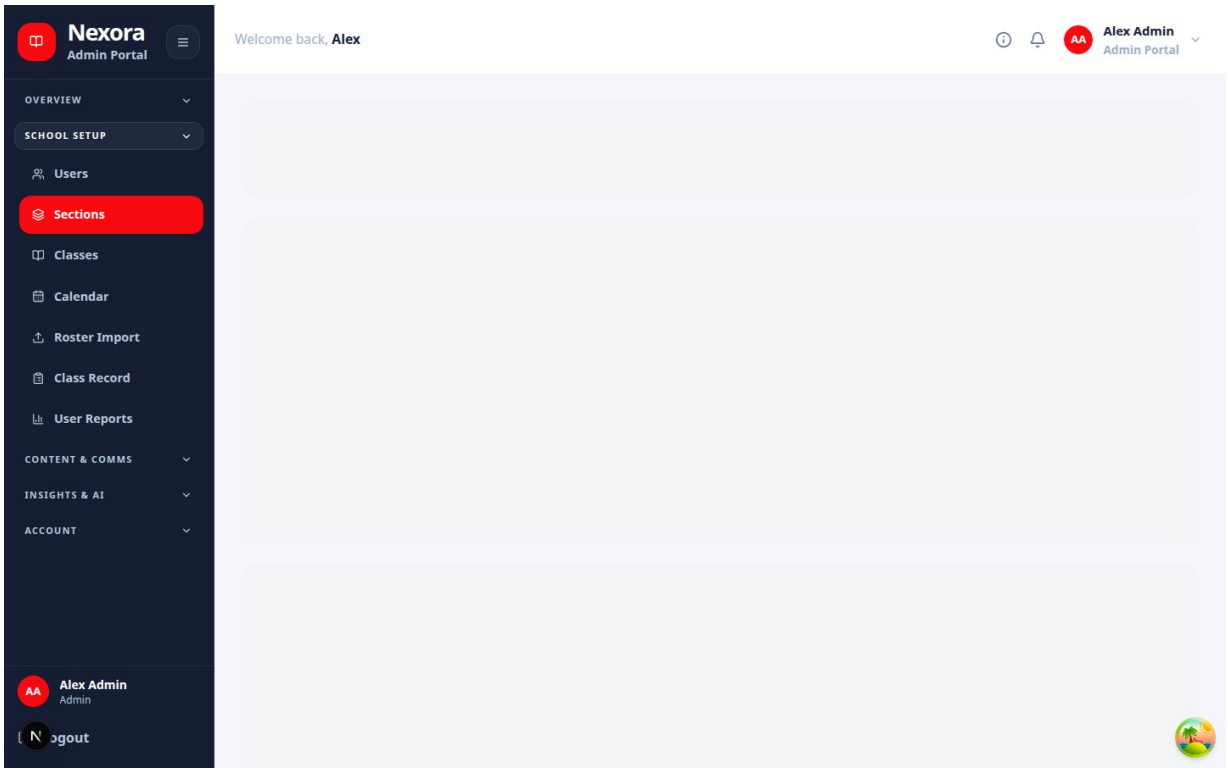

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/sections/page.tsx · evidence 211483f0

## Edit

**Role and path:** Administrator · /dashboard/admin/sections/[id]/edit

**Purpose:** Edit rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Edit from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

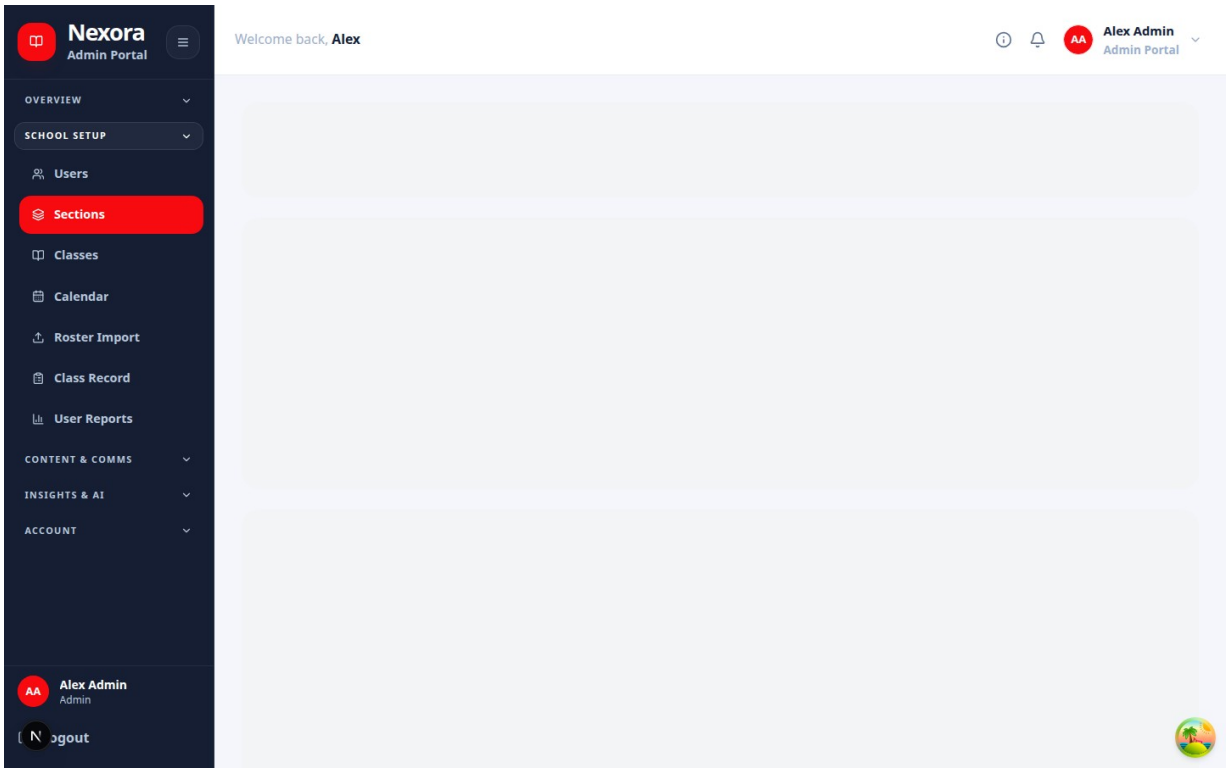

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/sections/[id]/edit/page.tsx · evidence 211483f0

## Roster

**Role and path:** Administrator · /dashboard/admin/sections/[id]/roster

**Purpose:** Roster rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Roster from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

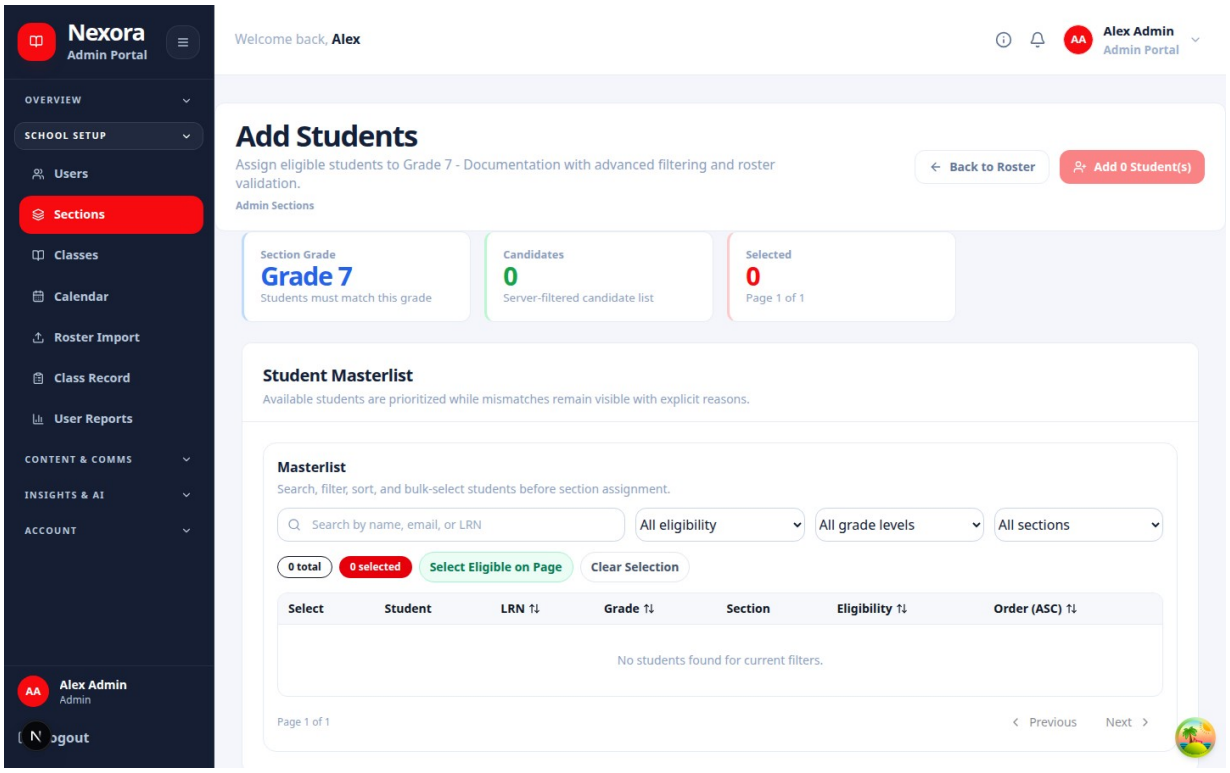

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

## New

**Role and path:** Administrator · /dashboard/admin/sections/new

**Purpose:** New rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open New from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

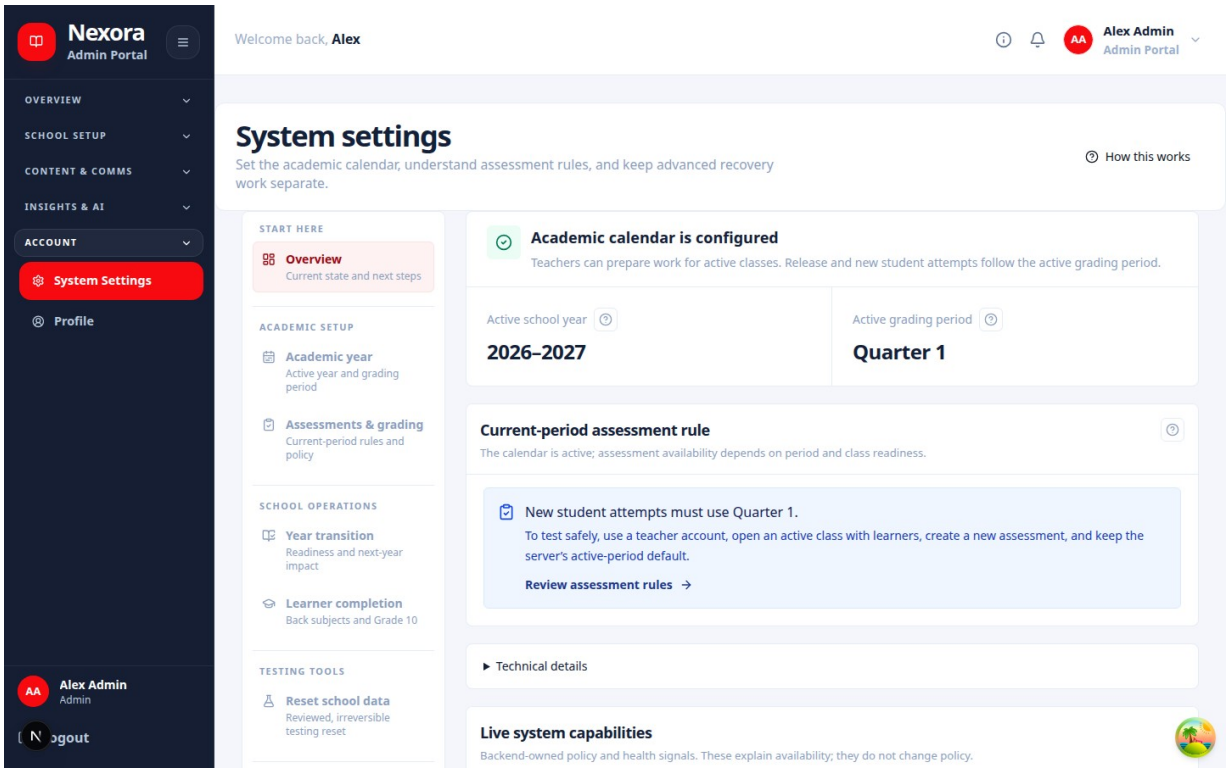

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/sections/new/page.tsx · evidence 211483f0

## System Settings

**Role and path:** Administrator · /dashboard/admin/system-settings

**Purpose:** System Settings rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open System Settings from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

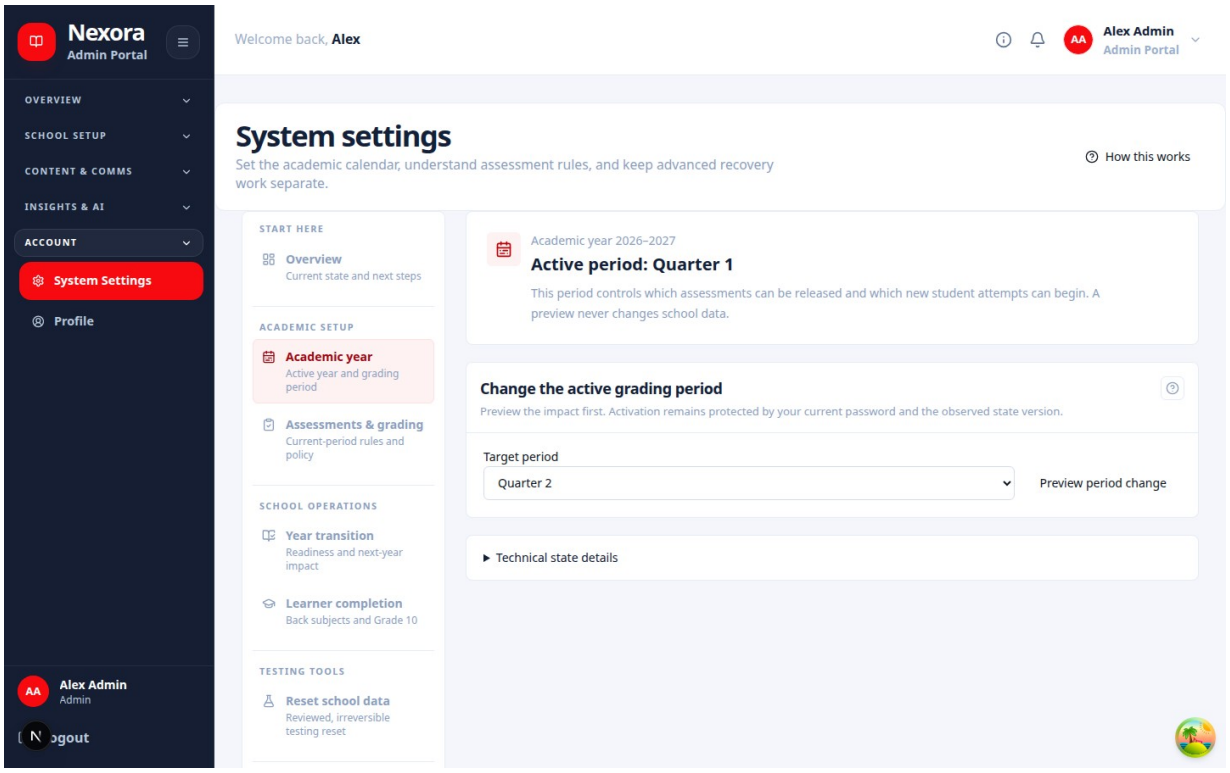

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/page.tsx · evidence 211483f0

## Academic Year

**Role and path:** Administrator · /dashboard/admin/system-settings/academic-year

**Purpose:** Academic Year rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Academic Year from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

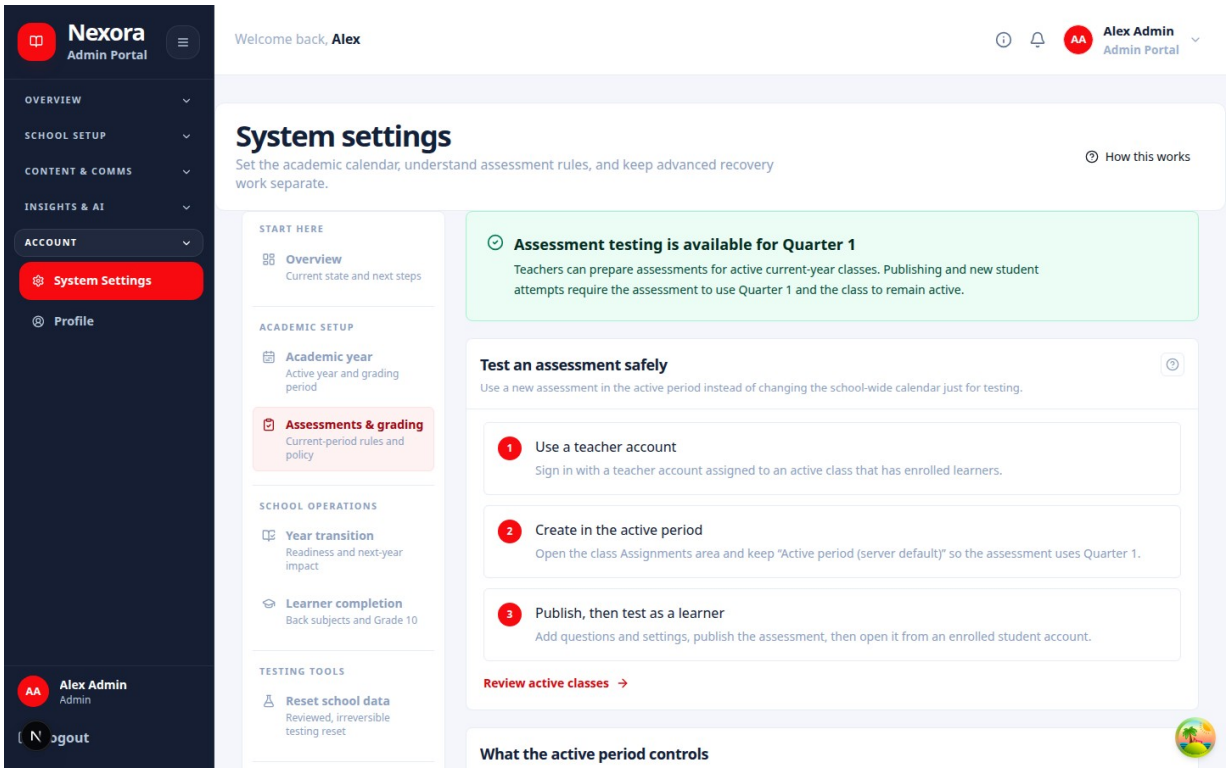

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/academic-year/page.tsx · evidence 211483f0

## Assessments Grading

**Role and path:** Administrator · /dashboard/admin/system-settings/assessments-grading

**Purpose:** Assessments Grading rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Assessments Grading from the visible navigation or its parent workspace.
3. Choose the class and assessment state, open the intended item, then author, take, review, or grade as permitted.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

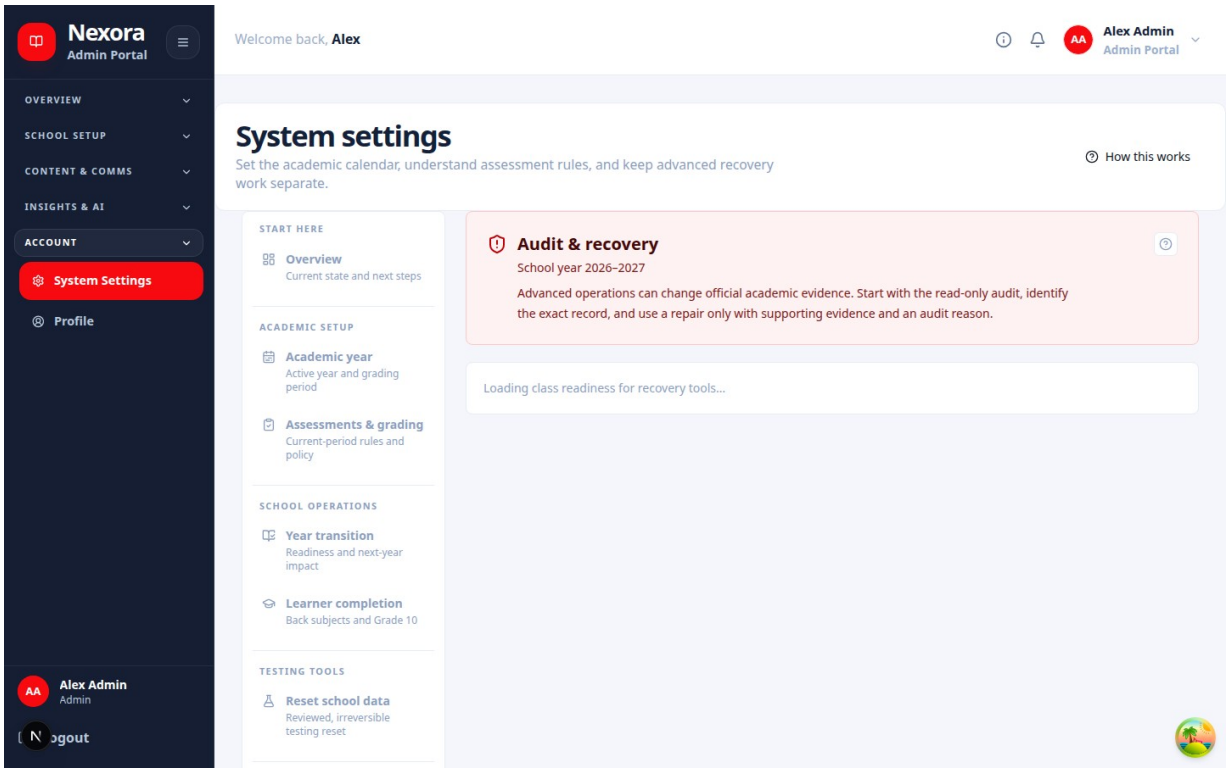

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/assessments-grading/page.tsx · evidence 211483f0

## Audit Recovery

**Role and path:** Administrator · /dashboard/admin/system-settings/audit-recovery

**Purpose:** Audit Recovery rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Audit Recovery from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

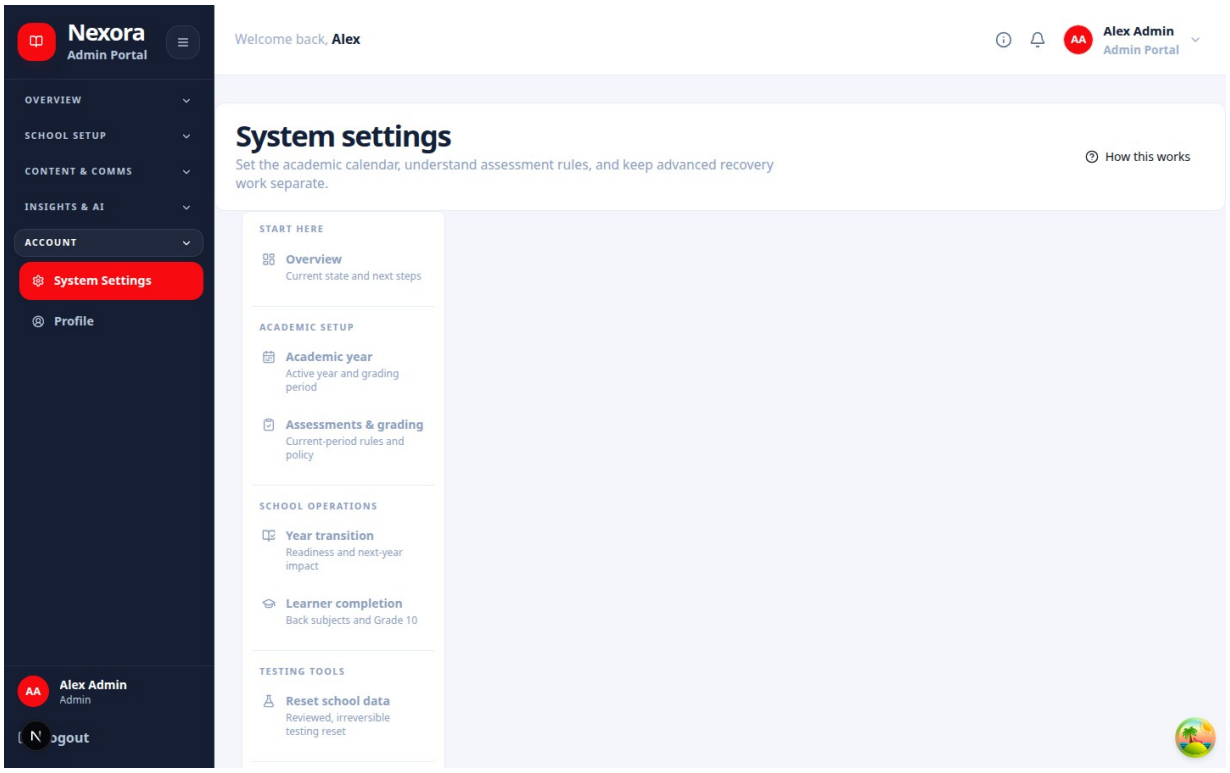

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

## Demo Mode

**Role and path:** Administrator · /dashboard/admin/system-settings/demo-mode

**Purpose:** Demo Mode rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Demo Mode from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

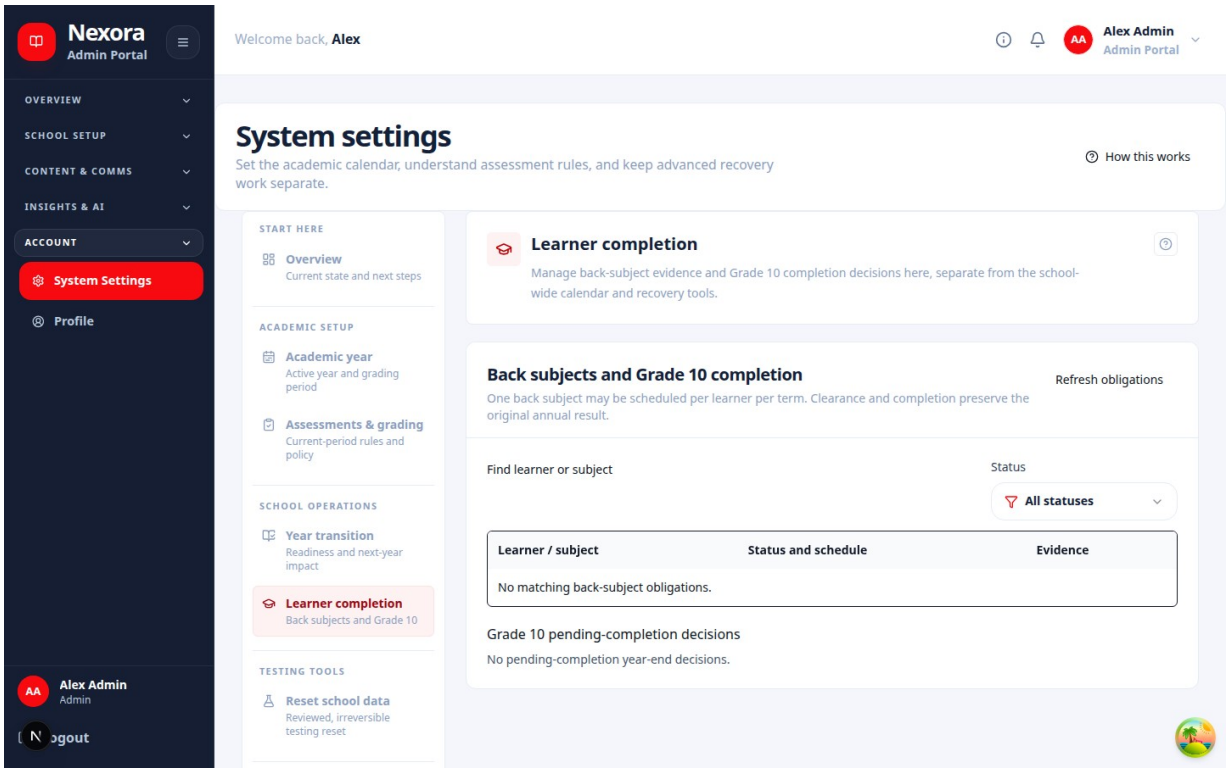

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/demo-mode/page.tsx · evidence 211483f0

## Learner Completion

**Role and path:** Administrator · /dashboard/admin/system-settings/learner-completion

**Purpose:** Learner Completion rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Learner Completion from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

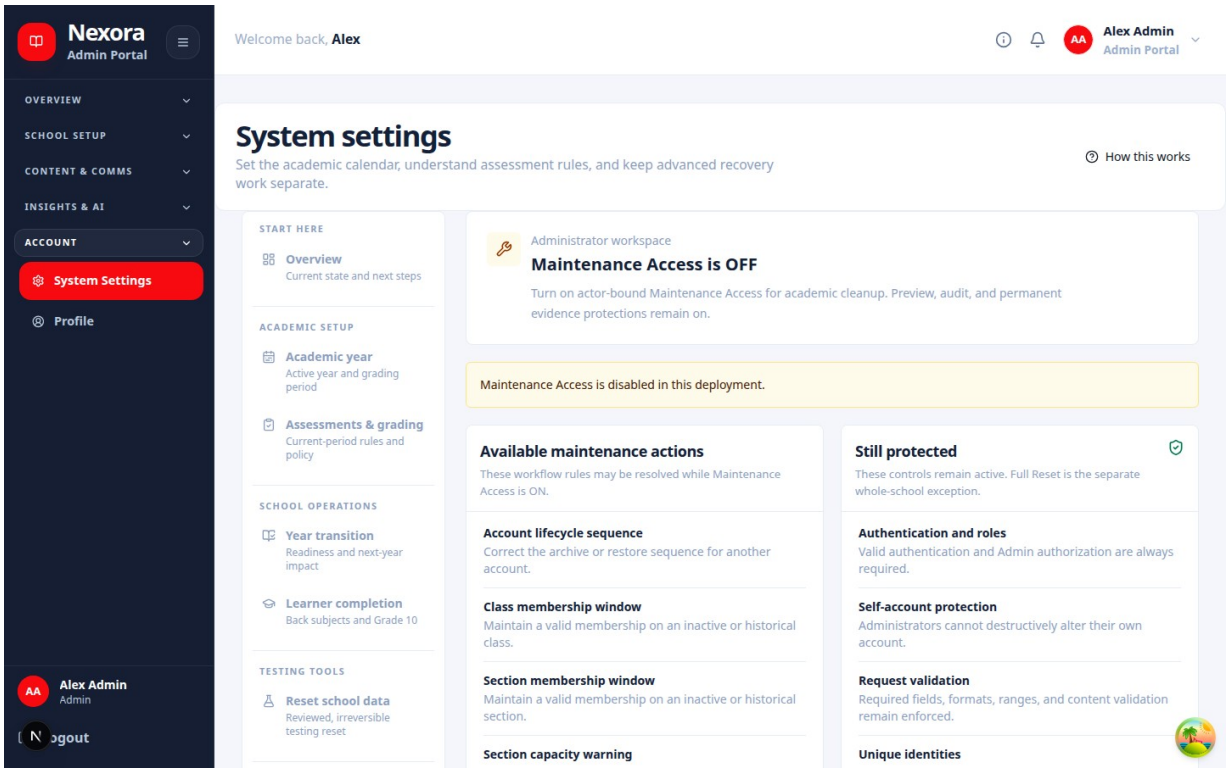

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/learner-completion/page.tsx · evidence 211483f0

## Maintenance Access

**Role and path:** Administrator · /dashboard/admin/system-settings/maintenance-access

**Purpose:** Maintenance Access rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Maintenance Access from the visible navigation or its parent workspace.
3. Preview the impact, read every blocker, reauthenticate, and confirm only when the evidence is correct.
4. Stop if the preview, blockers, or affected records differ from the intended scope.

**Done when:** The preview, confirmation, resulting state, and audit evidence agree.

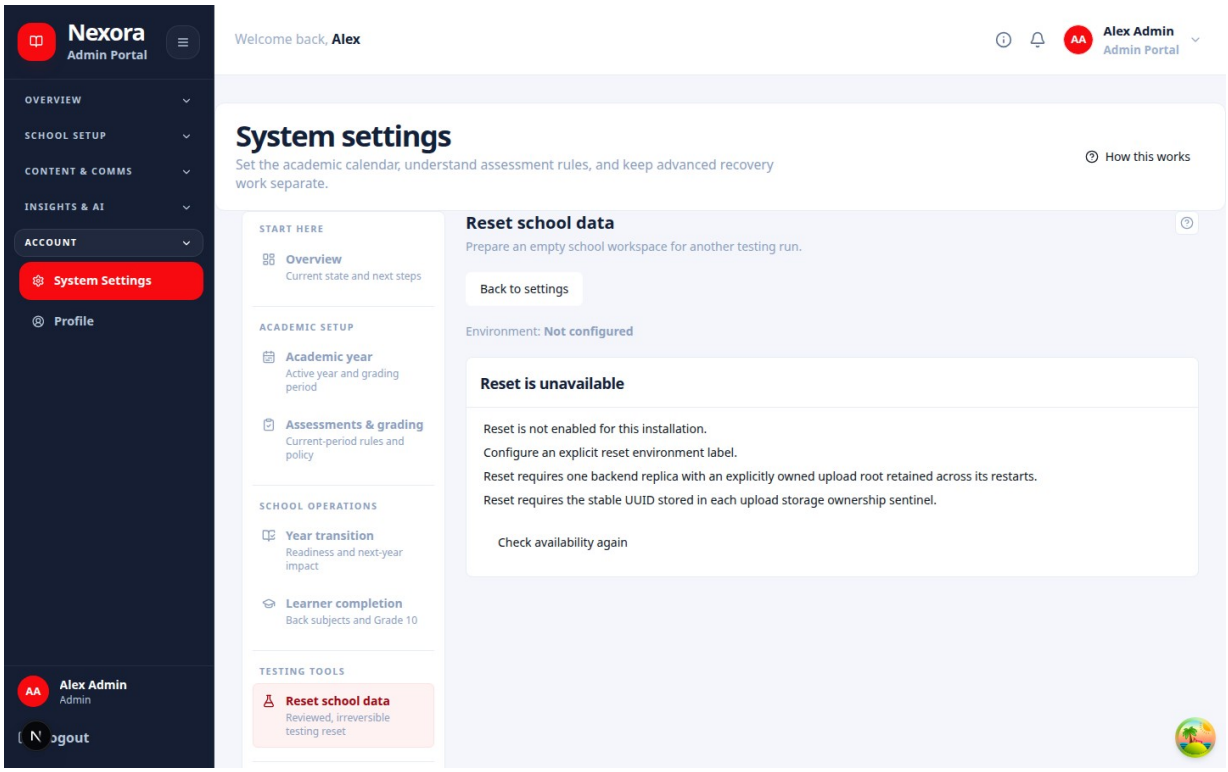

**If stuck:** Stop. Save the blocker text and ask an administrator to verify policy and readiness before retrying.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/maintenance-access/page.tsx · evidence 211483f0

## Reset School Data

**Role and path:** Administrator · /dashboard/admin/system-settings/reset-school-data

**Purpose:** Reset School Data rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Reset School Data from the visible navigation or its parent workspace.
3. Read the page heading and current state, choose the intended item, and use the primary action shown on screen.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

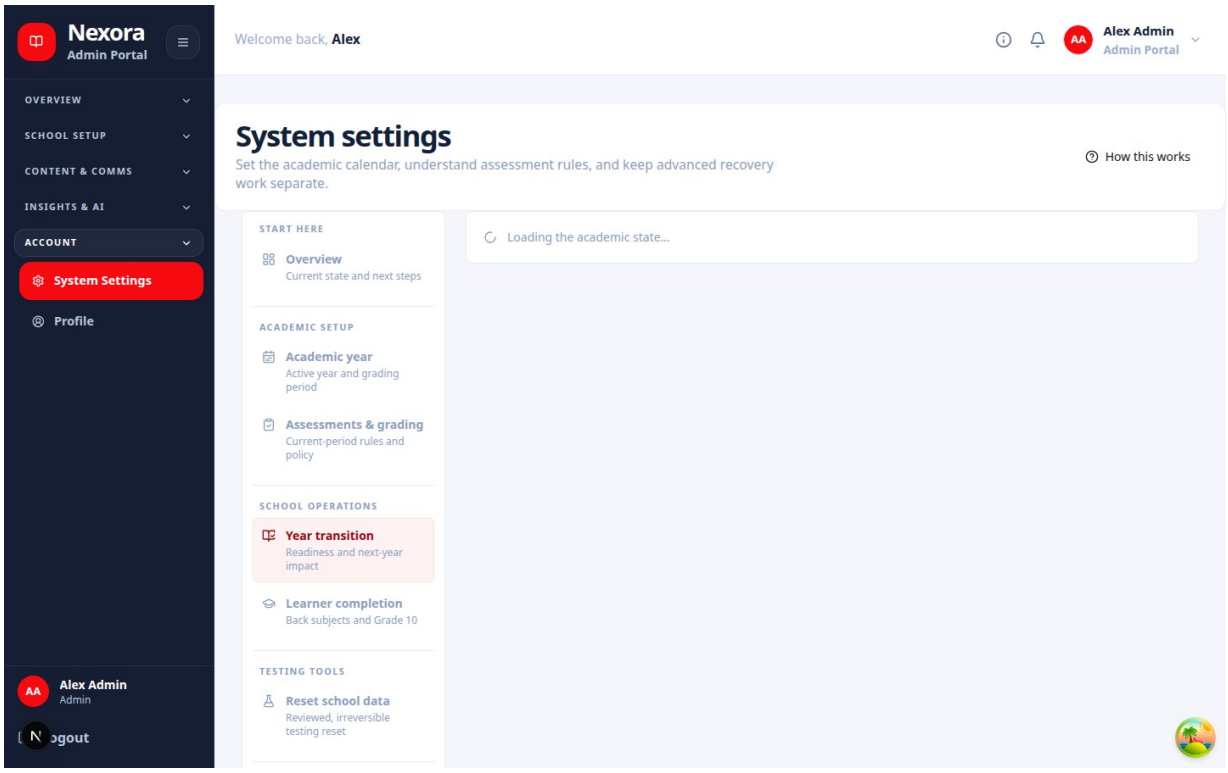

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/reset-school-data/page.tsx · evidence 211483f0

## Year Transition

**Role and path:** Administrator · /dashboard/admin/system-settings/year-transition

**Purpose:** Year Transition rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Year Transition from the visible navigation or its parent workspace.
3. Preview the impact, read every blocker, reauthenticate, and confirm only when the evidence is correct.
4. Stop if the preview, blockers, or affected records differ from the intended scope.

**Done when:** The preview, confirmation, resulting state, and audit evidence agree.

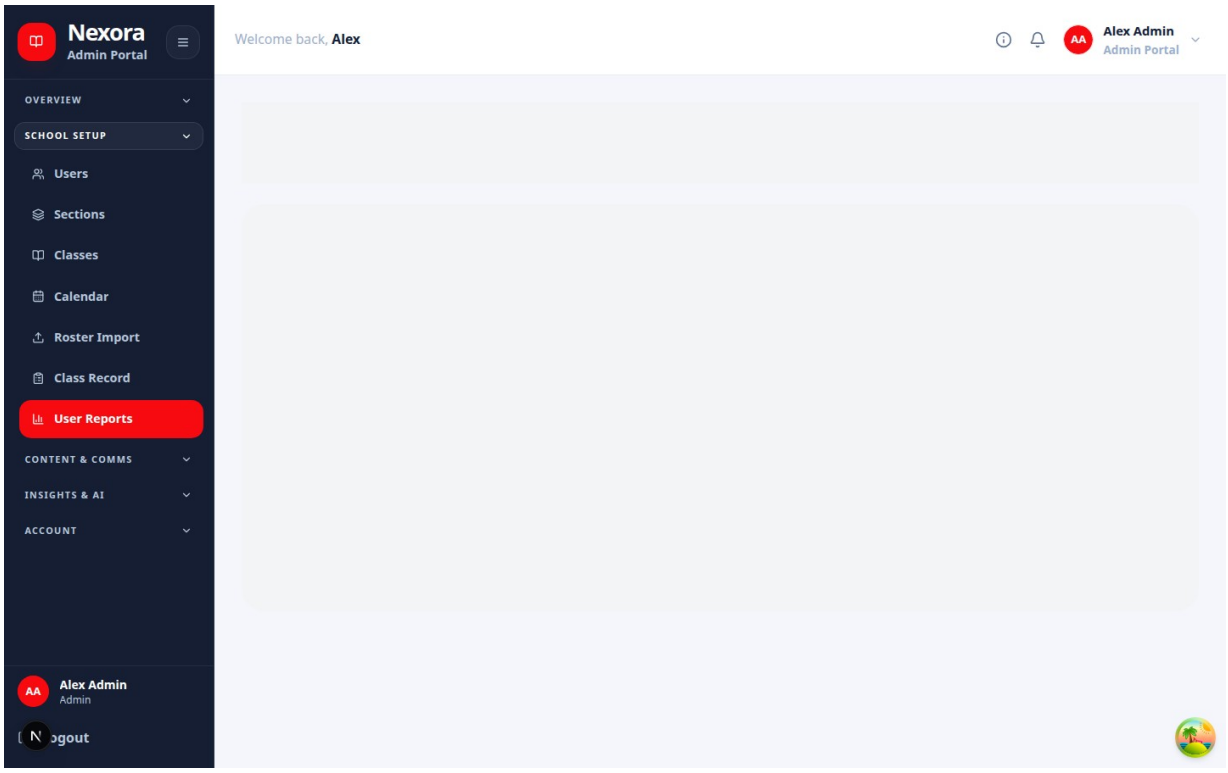

**If stuck:** Stop. Save the blocker text and ask an administrator to verify policy and readiness before retrying.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/system-settings/year-transition/page.tsx · evidence 211483f0

## User Reports

**Role and path:** Administrator · /dashboard/admin/user-reports

**Purpose:** User Reports rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open User Reports from the visible navigation or its parent workspace.
3. Choose the correct scope and filters, inspect the evidence, then export or record the result if needed.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

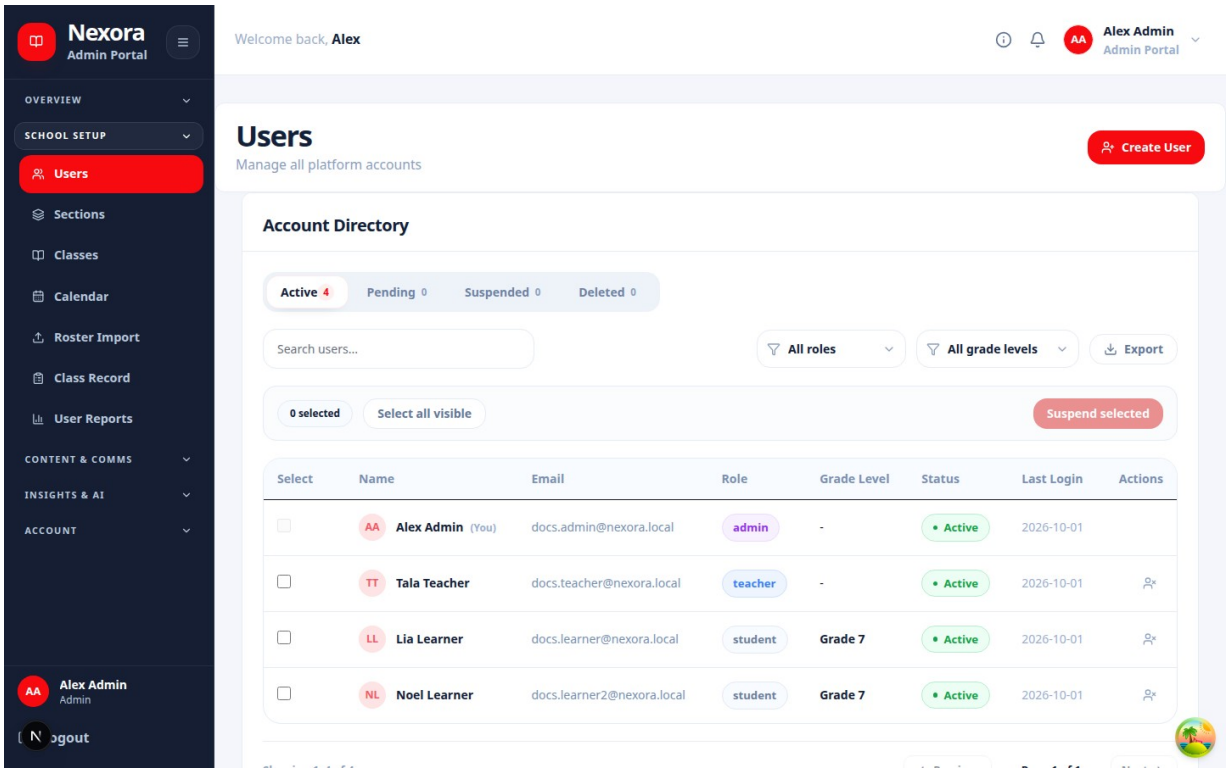

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/user-reports/page.tsx · evidence 211483f0

## Users

**Role and path:** Administrator · /dashboard/admin/users

**Purpose:** Users rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Users from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

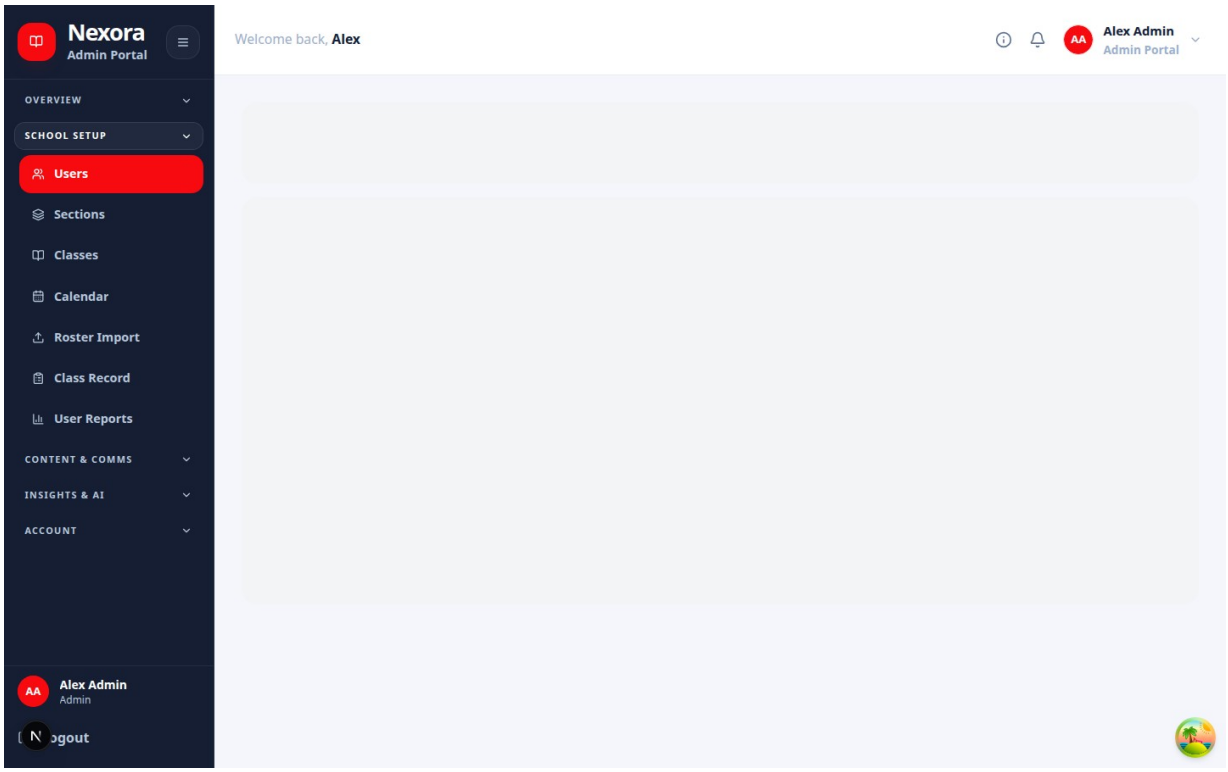

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/users/page.tsx · evidence 211483f0

## Users - selected item

**Role and path:** Administrator · /dashboard/admin/users/[id]

**Purpose:** Record detail rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Users - selected item from the visible navigation or its parent workspace.
3. Search for the correct person or class, open it, and use only the actions shown for your role.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

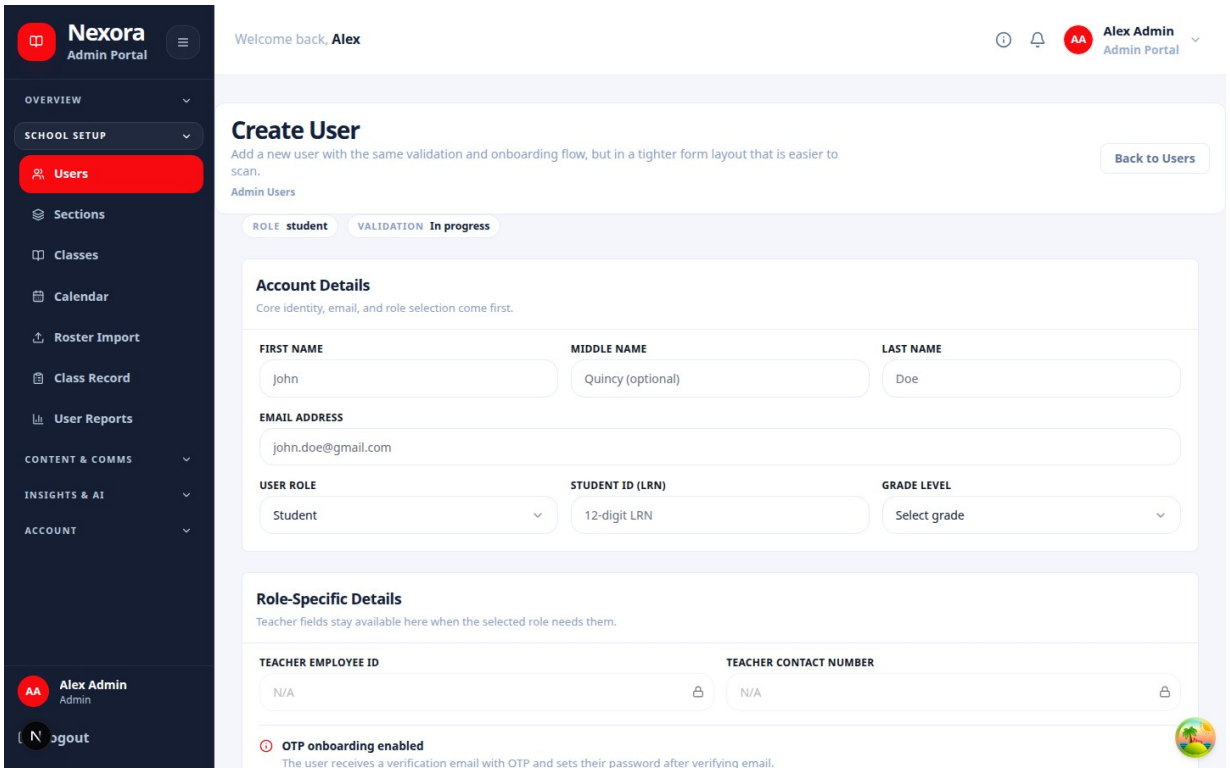

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/users/[id]/page.tsx · evidence 211483f0

## Create

**Role and path:** Administrator · /dashboard/admin/users/create

**Purpose:** Create rendered from the locked application snapshot

### Do this

1. Sign in with an active admin account.
2. Open Create from the visible navigation or its parent workspace.
3. Complete every required field, review the summary, then save or publish once.
4. Wait for the success state, then refresh once to confirm the saved result.

**Done when:** The expected page state or saved result remains correct after refresh.

**If stuck:** Check the account role, internet connection, selected school year/class, and visible error. Refresh once; do not repeat a write action blindly.

**Behind the screen:** next-frontend/app/(dashboard)/dashboard/admin/users/create/page.tsx · evidence 211483f0

## Glossary

**Academic state:** The backend-owned school year, grading period, and lifecycle rules that govern what work is allowed.

**Audit evidence:** A durable record showing who performed an important action, when, and against which target.

**Draft:** Work that is not yet official or visible to its final audience.

**Preview:** A read-only impact check that must be reviewed before a consequential action.

**Synthetic data:** Invented documentation records that do not identify real people.
